Gaining Ground Evenkis Land And Reform In Southeastern Siberia:

Gaining Ground? Gail Fondahl, 1998 *Gaining Ground Evenkis Land and Reform in Southeastern Siberia* provides an assessment of how land reform in the Russian Federation is affecting indigenous peoples. Based on fieldwork in thirteen native Evenki villages in Southeastern Siberia, it contrasts the intent of legislation passed in Moscow with the real life experiences of indigenous persons who are trying to gain greater control over their lives and historic homelands. *Gaining Ground* situates the current reforms and their implementation in the historical geography of land alienation experienced by the Evenkis since the coming of the Russians to this part of Siberia. The book offers information on traditional land tenure systems, the persistence of these during various reforms, and the gradual erosion of access to resources which the Evenkis experienced under Soviet rule. It catalogues the hurdles Evenkis face today in trying to realize new opportunities provided by the federal government in terms of gaining rights to land. Part of the Cultural Survival Studies in Ethnicity and Change series, edited by David Maybury Lewis and Theodore Macdonald Jr. of Cultural Survival Inc., Harvard University. Sharply focused on key issues affecting indigenous and ethnic groups worldwide, this series of ethnographies builds on introductory material by going further in depth and allowing students to explore virtually first hand a particular issue and its impact on a culture.

Narrating the Future in Siberia Olga Ulturgasheva, 2012. The wider cultural universe of contemporary Eveny is a specific and revealing subset of post-Soviet society. From an anthropological perspective, the author seeks to reveal not only the Eveny cultural universe but also the universe of the children and adolescents within this universe. The first full-length ethnographic study among the adolescence of Siberian indigenous peoples, it presents the young people's narratives about their own future and shows how they form constructs of time, space, agency, and personhood through the process of growing up and experiencing their social world. The study brings a new perspective to the anthropology of childhood and uncovers a quite unexpected dynamic in narrating and foreshadowing the future while relating it to cultural patterns of prediction and fulfillment in nomadic cosmology.

Defending the Land Ronald Niezen, 2016-01-08. Suitable for both introductory anthropology and upper division courses in cultural anthropology. The campaign of the Cree people to protect their forest culture from the impact of hydroelectric development in northern Quebec has been widely documented. Few have heard in any detail about this campaign's outcome and impact upon indigenous societies' futures. This text gives equal attention to the Cree leadership's successful strategies for dealing with major social and environmental pressures with the forces of acculturation and native communities' social destruction. The titles in the Cultural Survival Studies in Ethnicity and Change series, edited by David Maybury Lewis and Theodore Macdonald Jr. of Cultural Survival Inc., Harvard University, focus on key issues affecting indigenous and ethnic groups worldwide. Each ethnography builds on introductory material by going further in depth and allowing students to explore virtually first hand a particular issue and its impact on a culture.

Exploring Sustainable Development Martin Purvis, Alan Grainger, 2013-06-17. Sustainable development is capturing the attention of

planners politicians and business leaders Within the academic sphere its study is increasingly breaching disciplinary boundaries to become a focus of attention for natural and social scientists alike But in studying such a key concept it is vital that there is a clear definition of what it means how it is applied on the ground and the influence it exerts upon people s perceptions of change in the physical environment economic activity and society Exploring Sustainable Development is a major new text which provides a multifaceted introduction to key areas of study in this field examining sustainability at the full range of spatial scales from the local to the global Building on existing theory it demonstrates the unique contributions that thinking geographically about space place and human environment relationships can bring to the analysis of sustainable development This book explores different interpretations of sustainable development in both theory and practice in developed and developing countries and in rural and urban areas It pays particular attention to the local national and international politics of implementation the future of climate and energy the role of business and different conceptions of agricultural sustainability This wide ranging text is ideal for undergraduates and postgraduates in geography environmental science development studies and related social and political sciences

Order and Disorder Keebet von Benda-Beckmann, Fernanda Pirie, 2008-02-01 Disorder and instability are matters of continuing public concern Terrorism as a threat to global order has been added to preoccupations with political unrest deviance and crime Such considerations have prompted the return to the classic anthropological issues of order and disorder Examining order within the political and legal spheres and in contrasting local settings the papers in this volume highlight its complex and contested nature Elaborate displays of order seem necessary to legitimate the institutionalization of violence by military and legal establishments yet violent behaviour can be incorporated into the social order by the development of boundaries rituals and established

processes of conflict resolution Order is said to depend upon justice yet injustice legitimates disruptive protest Case studies from Siberia India Indonesia Tibet West Africa Morocco and the Ottoman Empire show that local responses are often inconsistent in their valorization acceptance and condemnation of disorder

Redefining Shamanisms David Gordon Wilson,2013-01-31 Spiritualism and mediumship are often regarded as the product of lingering superstition in the Victorian era and as having limited relevance in modern Anglo American society Scholarship to date which has considered Spiritualism as a distinct religious tradition has focussed on analysing the phenomenon in terms of spirit possession only This volume analyses the development of shamanism communication with the spiritual world as a concept within North American English speaking scholarship with

particular focus on Mircea Eliade's influential cross cultural presentation of shamanism. By re-examining the work of Sergei Shirokogoroff one of Eliade's principal sources the traditional Evenki shamanic apprenticeship is compared and identified with the new Spiritualist apprenticeship. The author demonstrates that Spiritualism is best understood as a traditional shamanism as distinct from contemporary appropriations or neo-shamanisms. He argues that shamanism is the outcome of an apprenticeship in the management of psychic experiences and which follows the same pattern as that of the apprentice medium. In doing so the author offers fresh insights into the mechanisms that are key to sustaining mediumship as a social institution.

Power and the People Yulian Konstantinov, 2023-09-02 This book discusses state periphery relations from the view point of a reindeer husbandry community in the Russian Far North Murmansk Region. The time is the current period of Putin-led Russia. The analysis is based on the premise that the mode of current top power governance can be described as selective de-centralization. Below a certain level of state power interests conflicts get resolved in favour of local communities. That gains support for the supreme leadership and reproduces a Soviet-like reality. Termed *sovkhoism* the latter holds the Soviet state farm *sovkhoz* as creating an ideal socio-economic environment. When issues are of significant interest to superior power selection favours cavalier bypassing of people friendly concerns. At this level power acts in an authoritarian mode favouring the interests of state power structures in conjunction with the upper tiers of the loyal oligarchate. It is shown how this governing mode contains significant potential for escalating centre vs periphery tensions.

Nomadic and Indigenous Spaces Judith Miggelbrink, Joachim Otto Habeck, Nuccio Mazzullo, Peter Koch, 2016-05-06 This volume is devoted to aspects of space that have thus far been largely unexplored. How space is perceived and cognised has been discussed from different stances but there are few analyses of nomadic approaches to spatiality. Nor is there a sufficient number of studies on indigenous interpretations of space despite the importance of territory and place in definitions of indigeneity. At the intersection of geography and anthropology the authors of this volume combine general reflections on spatiality with case studies from the Circumpolar North and other nomadic settings. Spatial perceptions and practices have been profoundly transformed by new technologies as well as by new modes of social and political interaction. How do these changes play out in the everyday lives, identifications and political projects of nomadic and indigenous people? This question has been broached from two seemingly divergent stances: spatial cognition on the one hand and production of space on the other. Bringing these two approaches together this volume re-aligns the different strings of scholarship on spatiality making them applicable and relevant for indigenous and nomadic conceptualizations of space, place and territory.

Lifestyle and Livelihood Changes Among Formerly Nomadic Peoples A. Allan Degen, Léo-Paul Dana, 2024-02-29 Contemporary policymakers as their predecessors continue to view nomadic people as a weak minority and their way of life and raising livestock as a backward and inefficient paradigm. Wherever nomads are not the dominant group the trend to settle them continues even today as in the past. This book describes the changes forced upon formerly nomadic groups and how they still attempt to maintain their

traditional social and cultural practices in their new settings The book deals with the several modes of livelihood of these communities including entrepreneurship and demonstrates the impact of investment oriented urbanization policies leading to eviction from ancestral lands and hurdles for nomadic mobility ultimately threatening their survival The book illustrates how some groups like the Borana and the Maasai practice livelihood diversity and raise productive livestock and how other groups migrate to urban centers in search of employment and remit money to family members left in the rural areas The book aims to raise awareness among the research community especially those who work on regional and demographic labor policies It helps in understanding why society needs to help build business and livelihood strategies without harming the values of nomadic groups

Words and Silences Laur Vallikivi, 2024-03-26 Words and Silences tells the story of an extraordinary group of independent Nenets reindeer herders in the northwest Russian Arctic Under socialism these nomads managed to avoid the Soviet state and its institutions of collectivization but soon after the atheist regime collapsed while some staunchly resisted many of them became fervent fundamentalist Christians By exploring differing concepts of how traditional and convert Nenets use and define words and of the meanings they ascribe to the withholding of speech Laur Vallikivi shows how a local form of global Christianity has emerged through intricate negotiations of self sociality and cosmology Moving beyond studies of modernization and globalization that have all too predictable outcomes for indigenous peoples Words and Silences invites us to view not only religious devotees but words themselves as agents of a complex and ongoing transformation

Hann, 2003 This is an age of neo liberalism in which the advantages and virtues of private property are often taken for granted Post socialist governments have privatized and broken up state farms and socialist cooperatives However economic outcomes and the social insecurity now experienced by many rural inhabitants highlight the need for a broader anthropological analysis of property relations which go beyond changes of legal form A century after Kautsky addressed The Agrarian Question in Germany it is necessary to address a post socialist Agrarian Question throughout Central and Eastern Europe the former Soviet Union and China The studies collected here derive from the first cycle of projects carried out at the Max Planck Institute for Social Anthropology They are prefaced by a substantial introduction by Chris Hann Chris Hann is Director of the Max Planck Institute for Social Anthropology Halle Saale **Settlers on the Edge** Niobe Thompson, 2009-01-01 Based on extensive research in the Arctic Russian region of Chukotka *Settlers on the Edge* is the first English language account of settler life anywhere in the circumpolar north to appear since Robert Paine's *The White Arctic* 1977 and the first to explore the experiences of Soviet era migrants to the far north Niobe Thompson describes the remarkable transformation of a population once dedicated to establishing colonial power on a northern frontier into a rooted community of locals now resisting a renewed colonial project He also provides unique insights into the future of identity politics in the Arctic the role of resource capital and the oligarchs in the Russian provinces and the fundamental human questions of belonging and transience *The Integration Imperative* Michael P.
