Galactic And Extragalactic Infrared Spectroscopy:

Galactic and Extragalactic Infrared Spectroscopy M.F. Kessler,J.P. Phillips,1983-12-31 The last major conference on infrared astronomy was the IAU Symposium No 96 in June 1980 Since then the discipline has continued to mature and to contribute to all branches of astrophysics One particular area of growth has been in spectroscopic capabilities at all infrared wavelengths The purpose of the Symposium in Toledo was to review the scientific questions to be addressed via infrared spectroscopy and to provide in the proceedings a useful summary of the field The sensitivity of infrared spectroscopic observations is still generally limited by detector characteristics or by thermal background radiation However in recent years improvements in detector technology together with developments in spectroscopic instrumentation have made possible both quite detailed spectroscopy of the brighter members of many classes of galactic sources and also begun to open up some infrared spectroscopy of extragalactic sources The potential of the field in the next decade or two is clear The IRAS mission has completed one of the pre requisites namely an all sky photometric survey Major space missions utilising cryogenic infrared telescopes have been approved in Europe ISO and seem likely in the USA SIRTf plans for space submillimeter telescopes are firming up On the ground large telescopes optimized for infrared observations are now in operation at high altitude sites and specialized submillimeter facilities are under construction The particular advantages of planned very large telescopes for infrared observations are widely accepted

Spectroscopy of Star Formation in Galactic and Extragalactic Regions National Aeronautics and Space Administration (NASA), 2018-06 Last year we submitted and had accepted a paper entitled The Far Infrared Emission Line and Continuum Spectrum of the Seyfert Galaxy NGC 1068 by Spinoglio L Malkan M Smith HA Gonzalez Alfonso E and Fischer J This analysis was based on the SWAS Monte Carlo code modeling of the OH lines in galaxies observed by ISO Since that meeting last spring considerable effort has been put into improving the Monte Carlo code A group of European astronomers including Prof Eduardo Gonzalez Alfonso had been performing Monte Carlo modeling of other molecules seen in ISO galaxies We used portions of this grant to bring Prof Gonzalez Alfonso to Cambridge for an intensive working visit A second major paper on the ISO IR spectroscopy of galaxies The Far Infrared Spectrum of Arp 220 Gonzalez Alfonso E Smith H Fischer J and Cernicharo J is in press Spitzer science development was the major component of this past year's research This program supported the development of five Early Release Objects for Spitzer observations on which Dr Smith was Principal Investigator or Co Investigator and another five proposals for GO time The early release program is designed to rapidly present to the public and the scientific community some exciting results from Spitzer in the first months of its operation The Spitzer instrument and science teams submitted proposals for ERO objects and a competitive selection process narrowed these down to a small group with exciting science and realistic observational parameters This grant supported Dr Smith's participation in the ERO process including developing science goals identifying key objects for observation and developing the detailed AOR observing formulae to be used by the instruments for mapping integrating etc During this year Dr Smith worked on writing up and publishing these early results The attached bibliography includes six of Dr Smith's articles During this past year Dr Sm

The Galactic Interstellar Medium W.B. Burton, B.G. Elmegreen, R. Genzel, 2006-04-18 The previous Saas Fee Advanced

Course dedicated to the interstellar medium took place in 1972 The tremendous scientific advances that have occurred in this field since then in particular owing to the availability of receivers working at completely unexplored wavelength bands fully justified a new set of lectures As a consequence the members of the Swiss Society for Astrophysics and Astronomy voted that The Galactic Interstellar Medium should be the subject of the 1991 course The 21st Saas Fee Advanced Course took place in Les Diablerets from 18 to 23 March 1991 gathering together about 80 participants from all over the world but mostly from Europe According to a rule that has proved to lead to success but also to challenge the lecturers energy the format of a Saas Fee Advanced Course consists traditionally of 28 lectures of 45 minutes which take place in the morning and late afternoon leaving ample time for discussions self study hiking or skiing Despite the inordinate work load imposed this year s lecturers felt that the subject was sufficiently dense to increase the lecture time by 1/3 This proved judicious and left more time for questions and discussions during the lectures
