Galaxy Atom As Above So Below:

The Conspiracy Rhetoric of Mankind Paul J. Linke, 2012-09 When we think we learned something new we are quite proud of it But it wears off quickly for an unknown reason So what is wrong with what we do When you start to think about the things you learn and what the reason or purpose actually is then you have to wonder sometimes is it really something new we just learned Because having in mind to learn something new can be quite exhausting at times Maybe we have to start to think about this in a different way and take a different approach in discovering new things It is like a treasure hunt imagine that we are all pirates looking for an adventure or treasures Obviously our life is about searching for something but most of the time we don't even know what we are looking for We do this quite instinctively maybe we are preprogrammed in a way and we are not aware of it But when you find out who we are then everything seems to make sense Our entire world Universe stands on myth and mythology including our history making us wonder if it is real Lets look at life in a different way Learn more about our history maybe we can learn from old things our ancestors already new and then set that aside and try to find your own way You most certainly will see things with different eyes This is what our life is all about it is a soul search where the experience we have along the way is the reward treasure In Australia the Aboriginal people are most likely a candidate for such an idea They go on a regular Walkabout which literally means looking for something They might find something which can be worth bringing home as an idea for which the whole community can benefit from This is what a walkabout is all about looking for something which is useful and has a value in the community After all we are constantly occupied by making a living or providing for our needs The westerners actually practice the same thing we call them the Backpackers People who go and see other parts of the world enjoy the diversity and beauty of nature as well as other cultures and traditions Yes we can learn something old have a lot of fun and it can be quite rewarding This book was taking shape based on an ironic thought How much knowledge there is and we know so little How come we know so little We know all the most complicated things there can be but we know very little of what life is about What is the cause for all things How does it all work What is the reason And last but not least How do we fit into everything Is it possible that we have taken valuable information from ancient Greek knowledge but ignored one of their most important practices the philosophy of all things Has everything to us become scientific or important because sciences can explain the real world Have we forgotten that this real world we live in comes from a mystical source something unseen Something we call a different dimension because we can't possibly explain it It is such an exotic source that it would take a lot of ancient knowledge to discover the truth Do you want to discover the truth This book might have some answers As Above, So Below Franklin Coolport, 2020-02-07 Some strange tales from around the world can they hold an element of truth **Waves of The Sea** Philip Rose, 2015 Thoughts on what has been called The Ancient Wisdom and on some of those thoughts which have occupied the minds of men over the centuries This book is a collection of short writings dating from 2006 when I was 81 years old and which I privately published over the next

this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe
