Table of contents **The History of the Science-fiction Magazine** Michael Ashley, 2000
This third volume in Mike Ashley's four volume study of the science fiction magazines focuses on the turbulent years of the 1970s when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science fiction magazines. Not only were they struggling to survive within the economic climate they also had to cope with the death of the father of modern science fiction John W. Campbell Jr. while facing new and potentially threatening opposition. The market for science fiction diversified as never before with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science fiction in college, the start of role playing, gaming magazines, underground and adult comics, and with the success of Star Wars media magazines. This volume explores how the traditional science fiction magazines coped with this from the death of Campbell to the start of the major popular science magazine Omni and the first dreams of the Internet. *The Good Old Stuff* Gardner Dozois, 2013-12-10
Nineteen ninety nine looms near and yet the stars are still far away but this anthology brings them closer with more than a dozen of the best SF adventure stories ever written. Among the gems collected here are 'The New Prime' by Jack Vance, Fritz Leiber's 'Moon Duel' and 'The Sky People' by Poul Anderson, along with masterpieces by less familiar names such as Murray Leinster and James H. Schmitz. With more than a dozen stories written between 1940 and 1970 from greats such as Brian W. Aldiss, Leigh Brackett, L. Sprague de Camp and A. E. van Vogt, this anthology ranges throughout our galaxy and into the stars. Whether you're revisiting past adventures or discovering these stories for the first time, you're sure to thrill to these wonderful adventures across the vast expanse of space. [Alfred Bester](#) Jad Smith, 2016-12-01
Alfred Bester's classic short stories and the canonical novel *The Stars My Destination* made him a science fiction legend. Fans and scholars praise him as a genre-bending pioneer and cyberpunk forefather. Writers like Neil Gaiman and William Gibson celebrate his prophetic vision and stylistic innovations. Jad Smith traces the career of the unlikelyst of SF icons. Winner of the first Hugo Award for *The Demolished Man*, Bester also worked in comics, radio, and TV, and his intermittent SF writing led some critics to brand him a dabbler. In the 1960s, however, New Wave writers championed his work and his reputation grew. Smith follows Bester's journey from consummate outsider to an artist venerated for foundational works that influenced the New Wave and cyberpunk revolutions. He also explores the little-known roots of a wayward journey fueled by curiosity, disappointment with the SF mainstream, and an artist's determination to go his own way.

Frederik Pohl Michael R Page,2015-09-30 One of science fiction's undisputed grandmasters Frederik Pohl built an astonishing career that spanned more than seven decades Along the way he won millions of readers and seemingly as many awards while producing novels short stories and essays that left a profound mark on the genre In this first of its kind study Michael R Page traces Pohl's journey as an author but also uncovers his role as a transformative figure who shaped the genre as a literary agent book editor and in Gardner Dozois's words quite probably the best SF magazine editor who ever lived
