Directory, 2000 **Data: A Guide to Humans** Phil Harvey, Noelia Jiménez Martínez, 2021-01-21 Data is humanity's most important new resource It has the capacity to provide insight into every aspect of our lives the planet and the universe at large it changes not only what we know but also how we know it Exploiting the value of data could improve our existence as much as if not more than previous technological revolutions Yet data without empathy is useless There is a tendency in data science to forget about the human needs and feelings of the people who make up the data the people who work with the data and those expected to understand the results Without empathy this precious resource is at best underused at worst misused Data A Guide to Humans will help you understand how to properly exploit data why this is so important and how companies and governments are currently using data It makes a compelling case for empathy as the crucial factor in elevating our understanding of data to something which can make a lasting and essential contribution to your business your life and maybe even the world CVC Veri a Guide to the Epic of the Martian Empire Lee Streiff, 2013-05-22 Introduction By Lee Streiff In

1937 James Streiff and Bob Parks created the Epic of the Martian Empire in 1942 Paul Carter added his vision of the Cosmic Vortex to it and the Universe was never the same again Lee Streiff Once we lived in the world of the Martian Empire but that now seems like a long time ago it all began in those last remaining years before World War II changed our consciousness forever It was an ephemeral still time a quiet space in which we could dream about the future without the burden of its consequences ghastly war genocide the atomic bomb It was in 1937 and my brother James was 13 and in the eighth grade at Robinson Junior High School in Wichita Kansas And in James's mind he was fashioning a cosmic empire filled with strange

and wonderful creatures and races in which a stalwart group of Exiles from the planet Mars were the chief actors and heroes This Empire the Martian Empire eventually spread over most of the known Universe before it finally faded away in 1948 During the eleven years it flourished however the Martian Epic became very elaborate covering some 15 billion years of Martian history and Martian technology manners and morals art music religion language and literature And it generated a narrative Epic that encompassed many galaxies Although a number of people became involved in this epic Bob Parks John Roth Robert Frickel Charles Goodrum and Robert Arnold among others it was first and foremost the vision of James who worked out and brought together the maps timelines the celestial spaces the customs and the characters that made up the Martian Empire in all its diverse grandeur In early 1937 I was only four years old and so it was that most of my childhood and youth were somehow surrounded or suffused with the images and tales of the Epic However it was not until I reached the age of eleven that I became the brief inheritor of and participant in the affairs of the Epic itself It was during World War II in 1943 that I first took over the job of running the business of the Martian Empire while all of its members were away from Wichita in the Army Navy and Air Force Knowing that he would soon be drafted James began grooming me for the task early in that year He reported for active Military duty on June 3 1943 and that changed the course of my daily life I was now on my own with a heavy responsibility I published The Martian News Letter the official journal of the group using carbon paper and a bit later a hectograph published The Order of Shultz which circulated the business of the inner circle reorganized The Files answered correspondence among the far flung Martians scattered around the globe and did research for a number of topics for James using my contacts in the world of Science Fiction Fandom When James returned from active service in February of 1946 my task had been completed and in any case my interests were largely turning in other directions By 1947 in my sophomore year at East High School I was even leaving Science Fiction itself behind and was now involved in art and literature But then that is another story In the Following seven Chapters Lee Streiff describes in his Guide to the Epic of the Martian Empire of how the tales and creation of the Epic all came about
