Divine Numbers Saket Shah,2021-01-07 In ancient India people lived very religious lives They prayed and worshipped several divinities in whom they had faith They believed that the purpose of human life was to achieve liberation from the cycle of births and deaths and ascend to sunlit worlds They did not believe in withdrawing from life or abnegation of duty as a necessary condition to pursue God Enjoyment of life and material wealth were important goals of human life but not the ultimate The highest aim was moksha or liberation from the delusions and distractions of life through spiritual discipline and self surrender The best way to achieve it was through a divine centered life where every activity was meant to achieve inner purity and experience God as the witness guardian guide and rescuer They reflected this attitude in many aspects of their lives Whether it was the practice of a profession or study of the Vedas or tending of the cattle or engaging in some mundane affair they sought the intervention of divinities through the practice of dharma They reflected the same attitude in using the numbers and believed them to be symbols each having a potency and symbolic significance of its own They believed that the numbers could be used in the practice of religion and spiritual discipline to reference the divinities and their attributes To the intuitive seekers of Brahman the numbers offered many opportunities to meditate upon and realize the hidden symbolism In the following paragraphs we will try to explore the symbolic significance hidden in the numbers from zero to ten And in doing so we will also realize why the decimal system and the use of present day symbols for numbers originated in ancient India
