**Transforming Higher Education** Stephen J. Rosow, Thomas Kriger, 2012-07-10 The university is being transformed and can be transformed This doubleness informs this book Transforming in transforming higher education can be read as adjective suggesting that higher education is being transformed by the social and political situation in which it is enmeshed Transforming can also be read as a gerund implying the critical activity of changing the university as signaling a creative and political act of radical possibility The essays in this book address the transformation of higher education and the transformative possibilities of its current conditions Only by viewing the university as a historical construction can we assess the dangers and opportunities of the new conditions of higher education and chart a reasonable course for the future The essays in this book are critical of recent developments in universities and higher education Most of us come from public universities and all remain committed to a democratic higher education that we see threatened by recent developments There is a danger that the combination of economic crisis market ideology and global pressures will continue to structure the debate about higher education in ways that freeze out the transformative and politically critical possibilities of the university Part I of the book examines the historical transformation of the university as it has changed into its current form Part II examines both the transformation of the university into a neoliberal institution and makes the case for the more political and radical idea of transforming the university in opposition to how it has been transformed in recent years Part III offers a number of studies aimed at illuminating possibilities for transforming the university in a more progressive democratic direction

**The New Walford Guide to Reference Resources** Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort For those looking for a selective and evaluative reference resource that really delivers on its promise look no further In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful With an emphasis on quality and sustainability the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher
