Corporate Romanticism Daniel M. Stout, 2016-12-01 Corporate Romanticism offers an alternative history of the connections between modernity individualism and the novel In early nineteenth century England two developments the rise of corporate persons and the expanded scale of industrial action undermined the basic assumption underpinning both liberalism and the law that individual human persons can be meaningfully correlated with specific actions and particular effects Reading works by Godwin Austen Hogg Mary Shelley and Dickens alongside a wide ranging set of debates in nineteenth century law and Romantic politics and aesthetics Daniel Stout argues that the novel a literary form long understood as a reflection of individualism s ideological ascent in fact registered the fragile fictionality of accountable individuals in a period defined by corporate actors and expansively entangled fields of action Examining how liberalism the law and the novel all wrestled with the moral implications of a highly collectivized and densely packed modernity Corporate Romanticism reconfigures our sense of the nineteenth century and its novels arguing that we see in them not simply the apotheosis of laissez fair individualism but the first chapter of a crucial and distinctly modern problem about how to fit the individualist and humanist terms of justice onto a world in which the most consequential agents are no longer persons
