Galileo Decisive Innovator:

Galileo Michael Sharratt,1996-04-11 An entertaining accessible biography of one of the greatest innovators ever known

Galileo Michael Sharratt,1994 **Galileo** Mitch Stokes,2011-04-11 We learn about life through the lives of others Their experiences their trials their adventures become our schools our chapels our playgrounds Christian Encounters a series of biographies from Thomas Nelson Publishers highlights important lives from all ages and areas of the Church through prose as accessible and concise as it is personal and engaging Some are familiar faces Others are unexpected guests Whether the person is Galileo William F Buckley John Bunyan or Isaac Newton we are now living in the world that they created and understand both it and ourselves better in the light of their lives Their relationships struggles prayers and desires uniquely illuminate our shared experience HERO OR HERETIC GENIUS OR BLASPHEMER It s no mystery how profound a role Galileo played in the Scientific Revolution Less explored is the Italian innovator s sincere guiding faith in God In this exhaustively researched biography that reads like a page turning novel Mitch Stokes draws on his expertise in philosophy logic math and science to attune modern ears with Galileo s controversial genius Emerging from the same Florentine milieu that produced Dante da Vinci Machiavelli Michelangelo Amerigo Vespucci Galileo questioned with a persistence that spurred his world toward an unabating era of discovery Stokes confronts the myth that Galileo s stance on heliocentricity stood astride a church vs science divide and explores his calculations for the dimensions of Dante s hell his understanding of motion and his invention of the pendulum clock To read this volume is to journey through Galileo s remarkable life from his inquisitive childhood to his dying days when although blind and decrepit he soldiered on dictating mathematical thoughts and mentoring young proteges *Galileo* Michael Sharratt,1994-01-01 In this entertaining and authoritative new biography the author examines the flair and imagination the hard headedness and clarity the combativeness and penetration of the person many people call the founder of modern science Galileo Calilei No great scientist has excelled him in making novel ideas intelligible to nonexperts To follow his career as he exploited unforeseen opportunities to unseat established ways of understanding nature is to understand a crucial stage of what is now known as the scientific revolution Galileo was a path breaker for the newly invented telescope the decoder of nature s mathematical language and a quite brilliant popularizer of science Even his reluctant excursion into theology has at last been officially and handsomely recognized in Pope John Paul s recent and widely reported rehabilitation of the Inquisition s most famous victim This condemnation and subsequent rehabilitation is fully discussed in the last chapter Galileo appears here with all his zest for living gregariousness impulsiveness vulnerability prickliness unfairness and creativity This book makes his lasting contributions accessible to those who are not scientists and his mistakes are not passed over This is not a mythical story but the biography of an innovator one of the greatest ever known 10 Christians Everyone Should Know John Perry,2012-09-03 Jane Austen Sergeant York Saint Patrick What did they have in common Two thousand years and still going strong that s the story of Christianity And while

the Christian martyrs and saints and orators may have gotten more press the fact is the faith has been carried through history in the hearts and deeds of believers who though beloved to us now were simply living ordinary lives of devotion It would be almost impossible to imagine ten people more different from each other than these editor John Perry says This is the first truth of Christian living anybody anywhere can be a champion of the faith an example and inspiration to all who follow There s no dry biography here though Each story teems with fresh insight D L Moody did some of his most powerful evangelizing by befriending ragged street children in Chicago William F Buckley never delivered a sermon yet a Christian worldview informed his erudite witty output in print and broadcasting To compose her poems Anne Bradstreet had to understand science history the Bible and literature not to mention the political scene in both Massachusetts and England You ll look with new eyes also on the lives of George Washington Carver Jane Austen Galileo Johann Sebastian Bach Sergeant York John Bunyan and Saint Patrick You might think you know their stories but you don t Not yet For lovers of biography for homeschool or study groups for anyone seeking encouragement in the Christian walk 10 Christians Everyone Should Know is a valuable resource

Galileo Jim Whiting,2020-02-10 From an early age Galileo Galilei was curious about the world around him He began conducting scientific experiments No one had ever done that before He invented many useful devices such as improved clocks and tools to help sailors find their way at sea His greatest fame came after he invented a more powerful version of the telescope This new telescope allowed him to observe the skies in more detail than anyone before him His observations soon led him to believe that Earth revolved around the sun This belief landed him in trouble with the Catholic Church which for many centuries had taught that the sun revolved around Earth Church leaders put him on trial They would determine whether Galileo lived or died

Galileo's New Universe Stephen P. Maran,Laurence A. Marschall,2009-02-10 The historical and social implications of the telescope and that instrument s modern day significance are brought into startling focus in this fascinating account When Galileo looked to the sky with his perspicillum or spyglass roughly 400 years ago he could not have fathomed the amount of change his astonishing findings a seemingly flat moon magically transformed into a dynamic crater filled orb and a large black sky suddenly held millions of galaxies would have on civilizations Reflecting on how Galileo s world compares with contemporary society this insightful analysis deftly moves from the cutting edge technology available in 17th century Europe to the unbelievable phenomena discovered during the last 50 years documenting important astronomical advances and the effects they have had over the years

Scientific Method Barry Gower,2012-10-12 The central theme running throughout this outstanding new survey is the nature of the philosophical debate created by modern science s foundation in experimental and mathematical method More recently recognition that reasoning in science is probabilistic generated intense debate about whether and how it should be constrained so as to ensure the practical certainty of the conclusions drawn These debates brought to light issues of a philosophical nature which form the core of many scientific controversies today Scientific Method A Historical and

Philosophical Introduction presents these debates through clear and comparative discussion of key figures in the history of science. Key chapters critically discuss Galileo's demonstrative method, Bacon's inductive method and Newton's rules of reasoning, the rise of probabilistic Bayesian methods in the eighteenth century, the method of hypotheses through the work of Herschel, Mill and Whewell, the conventionalist views of Poincaré and Duhem, the inductivism of Peirce, Russell and Keynes, Popper's falsification compared with Reichenbach's enumerative induction, Carnap's scientific method as Bayesian reasoning. The debates are brought up to date in the final chapters by considering the ways in which ideas about method in the physical and biological sciences have affected thinking about method in the social sciences. This debate is analyzed through the ideas of key theorists such as Kuhn, Lakatos and Feyerabend.

Dialogue on the Two Greatest World Systems Galileo, 2022-11-10

The truth which we arrive at by means of mathematical proofs is the same truth that is known to divine wisdom. Galileo's *Dialogue on the Two Greatest World Systems*, the most brilliant and persuasive defence of the Copernican theory that the Earth goes around the Sun, to have been written in the seventeenth century is one of the foundation texts of modern science. This new translation renders Galileo's lively Italian prose in clear modern English, making the whole of Galileo's text readily accessible to modern readers, while William Shea's introduction and notes give a clear overview of Galileo's career and draw on the most recent scholarship to explain the scientific and philosophical background to the text. This volume provides everything necessary for an informed reading of Galileo's masterpiece.

ABOUT THE SERIES For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

Science, Religion and Society Arri Eisen, Gary Laderman, 2015-03-04

This unique encyclopedia explores the historical and contemporary controversies between science and religion. It is designed to offer multicultural and multi-religious views and provide wide-ranging perspectives. *Science, Religion and Society* covers all aspects of the religion and science dichotomy, from humanities to social sciences to natural sciences, and includes articles by theologians, religion scholars, physicians, scientists, historians, and psychologists, among others. The first section, General Overviews, contains essays that provide a road map for exploring the major challenges and questions in science and religion. Following this, the Historical Perspectives section grounds these major questions in the past and demonstrates how they have developed into the six broad areas of contemporary research and discussion that follow. These sections: Creation, the Cosmos, and Origins of the Universe; Ecology, Evolution, and the Natural World; Consciousness, Mind, and the Brain; Healers and Healing; Dying and Death; and Genetics and Religion, organize the questions and research that are the foundation of the enormous interest and controversy in science and religion today.
