Galileo, Bellarmine, and the Bible:

Galileo, Bellarmine, and the Bible Richard J. Blackwell, 1991-01-31 Considered the paradigm case of the troubled interaction between science and religion the conflict between Galileo and the Church continues to generate new research and lively debate Richard J Blackwell offers a fresh approach to the Galileo case using as his primary focus the biblical and ecclesiastical issues that were the battleground for the celebrated confrontation Blackwell's research in the Vatican manuscript collection and the Jesuit archives in Rome enables him to re create a vivid picture of the trends and counter trends that influenced leading Catholic thinkers of the period the conservative reaction to the Reformation the role of authority in biblical exegesis and in guarding orthodoxy from the inroads of unbridled spirits and the position taken by Cardinal Bellarmine and the Jesuits in attempting to weigh the discoveries of the new science in the context of traditional philosophy and theology A centerpiece of Blackwell's investigation is his careful reading of the brief treatise Letter on the Motion of the Earth by Paolo Antonio Foscarini a Carmelite scholar arguing for the compatibility of the Copernican system with the Bible Blackwell appends the first modern translation into English of this important and neglected document which was placed on the Index of Forbidden Books in 1616 Though there were differing and competing theories of biblical interpretation advocated in Galileo's time the legacy of the Council of Trent the views of Cardinal Bellarmine the most influential churchman of his time and finally the claims of authority and obedience that weakened the ability of Jesuit scientists to support the new science all contributed to the eventual condemnation of Galileo in 1633 Blackwell argues convincingly that the maintenance of ecclesiastical authority not the scientific issues themselves led to that tragic trial

Galileo, Bellarmine, and the Bible Richard J. Blackwell, 1991 Considered the paradigm case of the troubled interaction between science and religion the conflict between Galileo and the Church continues to generate new research and lively debate Richard J Blackwell offers a fresh approach to the Galileo case using as his primary focus the biblical and ecclesiastical issues that were the battleground for the celebrated confrontation Blackwell's research in the Vatican manuscript collection and the Jesuit archives in Rome enables him to re create a vivid picture of the trends and counter trends that influenced leading Catholic thinkers of the period the conservative reaction to the Reformation the role of authority in biblical exegesis and in guarding orthodoxy from the inroads of unbridled spirits and the position taken by Cardinal Bellarmine and the Jesuits in attempting to weigh the discoveries of the new science in the context of traditional philosophy and theology A centerpiece of Blackwell's investigation is his careful reading of the brief treatise Letter on the Motion of the Earth by Paolo Antonio Foscarini a Carmelite scholar arguing for the compatibility of the Copernican system with the Bible Blackwell appends the first modern translation into English of this important and neglected document which was placed on the Index of Forbidden Books in 1616 Though there were differing and competing theories of biblical interpretation advocated in Galileo's time the legacy of the Council of Trent the views of Cardinal Bellarmine the most

influential churchman of his time and finally the claims of authority and obedience that weakened the ability of Jesuit scientists to support the new science all contributed to the eventual condemnation of Galileo in 1633 Blackwell argues convincingly that the maintenance of ecclesiastical authority not the scientific issues themselves led to that tragic trial

The Reading and Preaching of the Scriptures in the Worship of the Christian Church, Volume 4 Hughes Oliphant Old, 2002-05-02 Covering the story of preaching from the Protestant Reformation to the end of the 17th century the latest volume in this series covers not only what the Reformers preached but also the reform of preaching itself

Galileo Jr. James Reston, 2005 A suspenseful narrative and spiritive rendition of the life of Galileo

The Bible Bruce Gordon, 2024-09-17 A wonderful highly comprehensive John Barton author of A History of the Bible global history of the world's best known and most influential book For Christians the Bible is a book inspired by God Its eternal words are transmitted across the world by fallible human hands Following Jesus's departing instruction to go out into the world the Bible has been a book in motion from its very beginnings and every community it has encountered has read heard and seen the Bible through its own language and culture In The Bible Bruce Gordon tells the astounding story of the Bible's journey around the globe and across more than two thousand years showing how it has shaped and been shaped by changing beliefs and believers radically different needs The Bible has been a tool for violence and oppression and it has expressed hopes for liberation God speaks with one voice but the people who receive it are scattered and divided found in desert monasteries and Chinese house churches in Byzantine cathedrals and Guatemalan villages Breathtakingly global in scope The Bible tells the story of this sacred book through the stories of its many and diverse human encounters revealing not a static text but a living dynamic cultural force

The Bible, Protestantism, and the Rise of Natural Science Peter Harrison, 2001-07-26 An examination of the role played by the Bible in the emergence of natural science

Galileo's Instruments of Credit Mario Biagioli, 2007-06-01 In six short years Galileo Galilei went from being a somewhat obscure mathematics professor running a student boarding house in Padua to a star in the court of Florence to the recipient of dangerous attention from the Inquisition for his support of Copernicanism In that brief period Galileo made a series of astronomical discoveries that reshaped the debate over the physical nature of the heavens he deeply modified the practices and status of astronomy with the introduction of the telescope and pictorial evidence proposed a radical reconfiguration of the relationship between theology and astronomy and transformed himself from university mathematician into court philosopher Galileo's Instruments of Credit proposes radical new interpretations of several key episodes of Galileo's career including his early telescopic discoveries of 1610 the dispute over sunspots and the conflict with the Holy Office over the relationship between Copernicanism and Scripture Galileo's tactics during this time shifted as rapidly as his circumstances argues Mario Biagioli and the pace of these changes forced him to respond swiftly to the opportunities and risks posed by unforeseen inventions further discoveries and the interventions of his opponents Focusing on the aspects of Galileo's scientific life that extend beyond the framework of

court culture and patronage Biagioli offers a revisionist account of the different systems of exchanges communication and credibility at work in various phases of Galileo's career Galileo's Instruments of Credit will find grateful readers among scholars of science studies historical epistemology visual studies Galilean science and late Renaissance astronomy The New Science and Jesuit Science M. Feingold, 2013-03-09 This volume makes an important contribution toward a nuanced appreciation of the Jesuits' interaction with modernity and a greater recognition of their contribution to the mathematization of natural philosophy and experimental science The six essays provide a cross section of the complex Jesuit encounter with the mathematical sciences during the 17th century Hebrew Bible / Old Testament: The History of Its Interpretation Magne Sæbø, Michael Fishbane, Jean Louis Ska, 2008-01-23 Dieser Band setzt das große internationale Standardwerk zur Rezeption der Hebräischen Bibel des Alten Testaments das christliche und jüdische Fachleute aus der ganzen Welt vereint fort Es stellt die alttestamentliche Exegese von den Anfängen innerbiblischer Schriftdeutung bis zur gegenwärtigen Forschung umfassend dar Dieser Band widmet sich der Zeitspanne zwischen Renaissance und Aufklärung 1300-1800 *Where Have All the Heavens Gone?* John P. McCarthy, Edmondo F. Lupieri, 2017-05-04 Twenty years before his famous trial Galileo Galilei had spent two years carefully considering how the results of his own telescopic observations of the heavens as well as his convictions about the truth of the Copernican theory could be aligned with the Catholic Church's position on biblical interpretation and the authority of the magisterium The product of these two years was an unpublished letter to the Grand Duchess Christina of Tuscany the mother of his patron Cosimo II de' Medici Much has changed since this letter was written in 1615 but much has remained the same This collection of articles by renowned international scholars provides the historical context of the letter as well as a description of the scientific world of Galileo It also explores those issues that make this 1615 letter a document for our time the public role of religious authority the truth of the Bible and the relationship of scientific inquiry to social justice Galileo's letter to Christina has become a classic text in the history of the relationship between science and religion in the West for good reason this volume explores why the letter has earned its rightful place as a classic even for today *When Science & Christianity Meet* David C. Lindenberg, Ronald L. Numbers, 2024-05-31 This book in language accessible to the general reader investigates twelve of the most notorious most interesting and most instructive episodes involving the interaction between science and Christianity aiming to tell each story in its historical specificity and local particularity Among the events treated in *When Science and Christianity Meet* are the Galileo affair the seventeenth century clockwork universe Noah's ark and flood in the development of natural history struggles over Darwinian evolution debates about the origin of the human species and the Scopes trial Readers will be introduced to St Augustine Roger Bacon Pope Urban VIII Isaac Newton Pierre Simon de Laplace Carl Linnaeus Charles Darwin T H Huxley Sigmund Freud and many other participants in the historical drama of science and Christianity Taken together these papers provide a comprehensive survey of current thinking on key issues in the relationships between science and religion pitched as the editors intended at

just the right level to appeal to students Peter J Bowler Isis **Theology of the Old Testament** Walter Brueggemann,2012-06-01 In this powerful book Walter Brueggemann moves the discussion of Old Testament theology beyond the dominant models of previous generations Brueggemann focuses on the metaphor and imagery of the courtroom trial in order to regard the theological substance of the Old Testament as a series of claims asserted for Yahweh the God of Israel This provides a context that attends to pluralism in every dimension of the interpretive process and suggests links to the plurality of voices of our time **Jesuit Biblical Studies after Trent** Luke Murray,2019-08-12 In the field of biblical hermeneutics one area which scholarship has neglected is Catholic biblical scholarship during the early modern era A brief look through a standard textbook on hermeneutics reveals the all too common jump from Luther Calvin and the other Reformers straight to Spinoza and the pioneers of the historical critical method Catholic figures during the Reformation and afterward are often considered too reliant on tradition too entrenched in dogmatic disputes and too ignorant of historical methods to be taken as serious scholars of Scripture In this timely work Dr Murray addresses these misconceptions and systematically shows why they are inadequate and a more nuanced judgment is needed Beginning with a much needed overview of contemporary scholarship the work examines the historical context and key influences on the Catholic approach to the Bible After addressing the Council of Trent and the Jesuit Order it then examines two influential Jesuit biblical scholars in the next two chapters the Spanish Cardinal Franciscus Toletus 1532 1596 and the great Flemish exegete Cornelius a Lapide 1567 1637 Dr Murray examines the life works secondary literature and biblical hermeneutics of both great scholars showing that Catholics just like their Reformed brethren could be serious and quality exegetes While they lacked the historical knowledge and tools of today the work shows that the Jesuits were pioneers in showing how their faith and devotion could be compatible with a historical and scientific study of Scripture Jesuit Biblical Studies After Trent is a must read for those seeking to understand how Catholics were approaching the Bible after the Reformation and for those seeking to learn how to integrate their personal faith with a scientific study of Scripture Science and Christianity Tim Reddish,2016-08-15 Too often conversations on Science and Christianity skate over much deeper assumptions or perceptions on the nature and interpretation of Scripture and the nature of science and of God Instead the rhetoric goes quickly towards contentious issues like evolution global warming or genetic engineering without establishing a framework of mutual understanding Consequently conversations can take place between people who completely misunderstand each other because those foundations have not been clearly articulated In this introductory book you are invited on a journey of discovery one that makes us self aware of our starting assumptions It is only from a framework of critical engagement with both science and the Bible that contemporary issues and the needs of the church and society can be addressed While the Creator is one who brings order this book also reminds us that untamed chaos also has a God ordained place within creation The author explores the element of chance that seems to be at the heart of nature and shows how this can be incorporated

constructively within Christian thinking Nature is not mere mechanism and is more open than we might first think This means that miracles are scientifically plausible and prayer can really change things **Conversations with Angels J. Raymond**,2011-08-09 Based on refractions of earlier beliefs modern angels at once terrible and comforting frighteningly other and reassuringly beneficent have acquired a powerful symbolic value This interdisciplinary study looks at how humans conversed with angels in medieval and early modern Europe and how they explained and represented these conversations

Sibyls, Scriptures, and Scrolls Joel Baden,Hindy Najman,Eibert J.C. Tigchelaar,2016-10-11 This volume a tribute to John J Collins by his friends colleagues and students includes essays on the wide range of interests that have occupied John Collins s distinguished career Topics range from the ancient Near East and the Hebrew Bible to the Dead Sea Scrolls and Second Temple Judaism and beyond into early Christianity and rabbinic Judaism The contributions deal with issues of text and interpretation history and historiography philology and archaeology and more The breadth of the volume is matched only by the breadth of John Collins s own work *Physica Sacra: Wunder, Naturwissenschaft und historischer Schriftsinn zwischen Mittelalter und Früher Neuzeit* Bernd Roling,2013-09-12 Was it a whale or a shark that devoured Jonah And how were the walls of Jericho brought down In his wide ranging study *Physica Sacra* Bernd Roling shows that the natural sciences and biblical exegesis have not always stood in stark opposition to one another From the high Middle Ages Bible commentators such as Albertus Magnus and Alonso Tostado made extensive use of the knowledge available in their times about zoology medicine and astronomy to explain the wonders of revelation and to defend their historical basis Even with the advent of modern Biblical criticism and in the age of Enlightenment as is shown here in detail their arguments were valid enough to refute critics like Spinoza Isaac de la Peyr re and Voltaire *New Heavens and a New Earth* Jeremy Brown,2013-06-13 Jeremy Brown offers the first major study of the Jewish reception of the Copernican revolution examining four hundred years of Jewish writings on the Copernican model Brown shows the ways in which Jews ignored rejected or accepted the Copernican model and the theological and societal underpinnings of their choices *Systematic Theology* Francis Schussler Fiorenza,John P. Galvin,2011-05-01 Unique among contemporary resources the landmark *Systematic Theology* and its distinguished contributors present the major areas or loci of Roman Catholic theology in light of contemporary developmentsespecially the seachange since Vatican II thought the best new historical studies of traditional doctrines and Scripture and the diverse creative impulses that come from recent philosophy and hermeneutics culture and praxis and ecumenical contacts This new volume combines and updates both previous volumes incorporates into the framework nearly twenty years of fresh thought and bibliography in each area and adds revisions to key articles to take account of a diverse fluid and postmodern situation **Nature and Scripture in the Abrahamic Religions: Up to 1700 (2 vols)** Scott Mandelbrote,Jitse van der Meer,2009-01-31 The four companion volumes of *Nature and Scripture in the Abrahamic Religions* contribute to a contextual evaluation of the mutual influences between scriptural exegesis and

hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other. We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation. Furthermore, questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories. We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences. Contributors are Peter Barker, Paul M. Blowers, James J. Bono, Pamela Bright, William E. Carroll, Kathleen M. Crowther, Maurice A. Finocchiaro, Carlos Fraenkel, Miguel A. Granada, Peter Harrison, Kenneth J. Howell, Eric Jorink, Kerry V. Magruder, Scott Mandelbrote, Charlotte Methuen, Robert Morrison, Richard J. Oosterhoff, Volker R. Remmert, T. M. Rudavsky, Stephen D. Snobelen, Jitse M. van der Meer, and Rienk H. Vermij.

Getting the books **Galileobellarmino The Bible** now is not type of challenging means.
