**Assembling the Dinosaur** Lukas Rieppel, 2023-01-18 A lively account of the dinosaur s role in Gilded Age America examining the connection between business paleontology and museums Although dinosaur fossils were first found in England a series of dramatic discoveries during the late 1800s turned North America into a world center for vertebrate paleontology At the same time the United States emerged as the world s largest industrial economy and creatures like *Tyrannosaurus* *Brontosaurus* and *Triceratops* became emblems of American capitalism Large fierce and spectacular American dinosaurs dominated the popular imagination making front page headlines and appearing in feature films *Assembling the Dinosaur* follows dinosaur fossils from the field to the museum and into the commercial culture of North America s Gilded Age Business tycoons like Andrew Carnegie and J P Morgan made common cause with vertebrate paleontologists to capitalize on the widespread appeal of dinosaurs using them to project American exceptionalism back into prehistory Learning from the show stopping techniques of P T Barnum museums exhibited dinosaurs to attract entertain and educate the public By assembling the skeletons of dinosaurs into eye catching displays wealthy industrialists sought to cement their own reputations as generous benefactors of science showing that modern capitalism could produce public goods in addition to profits Behind the scenes museums adopted corporate management practices to control the movement of dinosaur bones restricting their circulation to influence their meaning and value in popular culture Tracing the entwined relationship of dinosaurs capitalism and culture during the Gilded Age Lukas Rieppel reveals the outsized role these giant reptiles played during one of the most consequential periods in American history Praise for *Assembling the Dinosaur* A

penetrating study of legitimacy and capitalism in the realm of fossils Verlyn Klinkenborg The New York Review of Books A solid entry into the growing body of literature on Gilded Age American paleontology but it is particularly valuable for its contribution to enhancing our understanding of how science and its representation during that period were influenced by and in turn affected society as a whole By incorporating cultural economic and scientific developments Rieppel shines new light on the history of both American paleontology and museum exhibition practice Ilja Nieuwland Science

**When Life Nearly Died: The Greatest Mass Extinction of All Time** Michael J. Benton, 2003-05-17 Michael Benton's splendid book brings back to Earth Science a sense of adventure It is both a wonderfully good read and a valued reference James Lovelock author of Gaia and Homage to Gaia Today it is common knowledge that the dinosaurs were wiped out by a meteorite impact 65 million years ago that killed half of all species then living Far less well known is a much greater catastrophe that took place at the end of the Permian period 251 million years ago 90 percent of life was destroyed including saber toothed reptiles and their rhinoceros sized prey on land as well as vast numbers of fish and other species in the sea This book documents not only what happened during this gigantic mass extinction but also the recent rekindling of the idea of catastrophism Was the end Permian event caused by the impact of a huge meteorite or comet or by prolonged volcanic eruption in Siberia The evidence has been accumulating through the 1990s and into the new millennium and Michael Benton gives his verdict at the very end From field camps in Greenland and Russia
