Immanent Reasoning or Equality in Action Shahid Rahman, Zoe McConaughy, Ansten Klev, Nicolas Clerbout, 2018-08-16 This monograph proposes a new way of

implementing interaction in logic It also provides an elementary introduction to Constructive Type Theory CTT The authors equally emphasize basic ideas and finer technical details In addition many worked out exercises and examples will help readers to better understand the concepts under discussion One of the chief ideas animating this study is that the dialogical understanding of definitional equality and its execution provide both a simple and a direct way of implementing the CTT approach within a game theoretical conception of meaning In addition the importance of the play level over the strategy level is stressed binding together the matter of execution with that of equality and the finitary perspective on games constituting meaning According to this perspective the emergence of concepts are not only games of giving and asking for reasons games involving Why questions they are also games that include moves establishing how it is that the reasons brought forward accomplish their explicative task Thus immanent reasoning games are dialogical games of Why and How Muckle Jock and Other Stories of Peasant Life in the North Malcolm McLennan,1891
