Competition Law and Consumer Protection Katalin Judit Cseres, 2005-01-01 The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged The theory seems uncontroversial However because a positive interaction between the two is presumed to be self evident the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis with no overarching legal authority There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist Dr Cseres in depth analysis provides that understanding Proceeding from the dual perspective of law and economics that is of justice fairness and reasonableness on the one hand and of efficiency of the other she fully considers such underlying issues as the following the role of competition law and consumer law in a free market economy the notion of consumer welfare the effect of the modernisation of EC competition law for consumers economics theories of information bounded rationality and transaction costs the special significance of vertical agreements and merger control and how consumers are affected by information asymmetries The ultimate focus of the book is on current and emerging EC law in which a rapprochement between the two areas seems to be under way Dr Cseres provides a knowledgeable guide to the various strands of theory policy and jurisprudence that she shows ought to be taken into account in the process including schools of thought and law and policy experience in both Europe and the United States A special chapter on Hungary where post 1989 law and practice reveal a fresh and distinctly forward looking understanding of the matter is one of the book s most extraordinary features Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily It will be of immeasurable value to a wide range of professionals from academics and researchers to officials policymakers and practitioners in competition law consumer protection advocacy economic theory and planning business administration and various pertinent government authorities

Critical Game Theory Wayne Eastman, 2023-12-05 The models in mainstream game theory generally assume that actors act according to a single consistent utility function Empirical studies common sense and humanistic wisdom all suggest that that assumption is too simple This book starts with an assumption that actors are controlled by diverse inconsistent forces and demonstrates that introducing this level of complexity allows for the creation of critical game theory models that can help to attain new insights into nature human nature human institutions and human behavior The book begins with an evolutionary or Evo model in which the players have concerns for the other player as well as egoistic interests Part I analyzes the Prisoner's Dilemma using a literary or Lit model in which the players have entropic or Entropic masochistic and sadistic drives as well as altruistic and egoistic ones Part II suggests that the Lit model opens the door to a where Entropic is let Evo be critical perspective on politics Part III considers how core stories in mainstream game theory can be usefully supplemented and deepened by critical models and reflects on possible futures for critical game theory The discussion of games and subgames includes poems as well as matrices in pursuit of a mode of presentation that respects the complex simultaneously humanistic and scientific qualities of critical game theory The vision of critical game theory advanced in the book will be of significant interest to researchers in an array of theoretical and applied disciplines including but not limited to literature psychology political science economics computer science ethics business ethics law and law and economics
