C. L. Hirschfeld, Hirschfeld Hirschfeld, 2001-03-08 Hirschfeld s five volume Theorie der Gartenkunst published between 1779 and 1785 in both German and French has long been recognized for its importance in the history of gardening but its reputation has been primarily based on secondary sources Parshall s fluid translation from the German and judicious editing will change all that LandForum *Bourgeois and Aristocratic Cultural Encounters in Garden Art, 1550-1850* Michel Conan, 2002 Developments in garden art cannot be isolated from the social changes upon which they either depend or have some bearing Bourgeois and Aristocratic Cultural Encounters in Garden Art 1550 1850 offers an unparalleled opportunity to discover how complex relationships between bourgeois and aristocrats have led to developments in garden art from the Renaissance into the Industrial Revolution irrespective of stylistic differences These essays show how garden creation has contributed to the blurring of social boundaries and to the ongoing redefinition of the bourgeoisie and the aristocracy Also illustrated is the aggressive use of gardens by bourgeois in more or less successful attempts at subverting existing social hierarchies in renaissance Genoa and eighteenth century Bristol England as well as the opposite as demonstrated by the king of France Louis XIV who claimed to rule the arts but imitated the curieux fleuristes a group of amateurs from diverse strata of French society Essays in this volume explore this complex framework of relationships in diverse settings in Britain France Biedermeier Vienna and renaissance Genoa The volume confirms that gardens were objects of conspicuous consumption but

also challenges the theories of consumption set forth by Thorstein Veblen and Pierre Bourdieu and explores the contributions of gardens to major cultural changes like the rise of public opinion gender and family relationships and capitalism Garden history then informs many of the debates of contemporary cultural history ranging from rural management practices in early seventeenth century France to the development of a sense of British pride at the expansive Vauxhall Gardens favored equally by the legendary Frederick Prince of Wales and by the teeming London masses This volume amply demonstrates the varied and extensive contributions of garden creation to cultural exchange between 1550 and 1850 Publisher s description
