Why Don't Jumbo Jets Flap Their Wings? David Alexander,2009-06-02

What do a bumble bee and a 747 jet have in common It s not a trick question The fact is they have quite a lot in common They both have wings They both fly And they re both ideally suited to it They just do it differently Why Don t Jumbo Jets Flap Their Wings offers a fascinating explanation of how nature and human engineers each arrived at powered flight What emerges is a highly readable account of two very different approaches to solving the same fundamental problems of moving through the air including lift thrust turning and landing The book traces the slow and deliberate evolutionary process of animal flight in birds bats and insects over millions of years and compares it to the directed efforts of human beings to create the aircraft over the course of a single century Among the many questions the book answers Why are wings necessary for flight How do different wings fly differently When did flight evolve in animals What vision knowledge and technology was needed before humans could learn to fly Why are animals and aircrafts perfectly suited to the kind of flying they do David E Alexander first describes the basic properties of wings before launching into the diverse challenges of flight and the concepts of flight aerodynamics and control to present an integrated view that shows both why birds have historically had little influence on aeronautical engineering and exciting new areas of technology where engineers are successfully borrowing ideas from animals

The Innovators Behind Leonardo Plinio Innocenzi,2018-06-27 This engaging book places Leonardo da Vinci s scientific achievements within the wider context of the rapid development that occurred during the Renaissance It demonstrates how his contributions were not in fact born of isolated genius but rather part of a rich period of collective advancement in science and technology which began at least 50 years prior to his birth Readers will discover a very special moment in history when creativity and imagination were changing the future shaping our present They will be amazed to discover how many technological inventions had already been conceived or even designed by the engineers and inventors who preceded Leonardo such as Francesco di Giorgio and Taccola the so called Siena engineers This engaging volume features a wealth of illustrations from a variety of original sources such as manuscripts and codices enabling the reader to see and judge for him or herself the influence that other Renaissance engineers and inventors had on Leonardo
