**REVISTA GEOMETRÍA Nº 4-5 / ALHAMBRA - DOCHLANDS** JOSÉ SEGUÍ PÉREZ y otros, 1988-01-01

GEOMETRÍA fue una revista técnica e independiente que dirigida por el Arquitecto José Segu se editó entre los años 1985 y 2000 tratando de recuperar el diálogo profesional entre las prácticas de la arquitectura y del urbanismo desarrollando y entendiendo el proyecto arquitectónico y urbanístico desde la propia estructura urbana que lo soporta y su referencia al proyecto global de la ciudad Esta conjunción de valores estéticos y prácticos que podríamos

definirlos como el arte de construir ciudades fue el centro de un debate profesional que construyó la disciplina de la arquitectura y del urbanismo como las dos caras inseparables de una misma moneda GEOMETRÍA busca as incorporar al debate profesional y a la investigación disciplinar materiales significativos en la experiencia de intervenir en nuestras ciudades tratando de descubrir en esta práctica profesional los elementos de la actual cultura urbanística y arquitectónica GEOMETRÍA was a technical and independent magazine which directed by the architect José Segu was published between 1985 and 2000 in an attempt to recover the professional dialogue between the practices of architecture and town planning developing and understanding the architectural and town planning project from the very urban structure that supports it and its reference to the global project of the city This conjunction of aesthetic and practical values which we could define as the art of building cities was at the centre of a professional debate that constructed the discipline of architecture and urban planning as the two inseparable sides of the same coin GEOMETRY thus seeks to incorporate into the professional debate and disciplinary research significant materials in the experience of intervening in our cities trying to discover in this
