The Reception of Charles Dickens in Europe Michael Hollington, 2013-08-29 The Reception of Charles Dickens in Europe offers a full historical survey of Dickens s reception in all the major European countries and many of the smaller ones filling a major gap in Dickens scholarship which has by and large neglected Dickens s fortunes in Europe and his impact on major European authors and movements Essays by leading international critics and translators give full attention to cultural changes and fashions such as the decline of Dickens s fortunes at the end of the nineteenth century in the period of Naturalism and Aestheticism and the subsequent upswing in the period of Modernism in part as a consequence of the rise of film in the era of Chaplin and Eisenstein It will also offer accounts of Dickens s reception in periods of political upheaval and revolution such as during the communist era in Eastern Europe or under fascism in Germany and Italy in particular

Documenting Spain: Artists, Exhibition Culture, and the Modern Nation, 1929-1939 , The news media have given us potent demonstrations of the ambiguity of ostensibly truthful representations of public events Jordana Mendelson uses this ambiguity as a framework for the study of Spanish visual culture from 1929 to 1939 a decade marked on the one hand by dictatorship civil war and Franco s rise to power and on the other by a surge in the production of documentaries of various types from films and photographs to international exhibitions Mendelson begins with an examination of El Pueblo Espa ol a model Spanish village featured at the 1929 International Exposition in Barcelona She then discusses Bu uel s and Dal s documentary films relating them not only to French Surrealism but also to issues of rural tradition in the formation of regional and national identities Her highly original book concludes with a discussion of the 1937

Spanish Pavilion where Picasso's famed painting of the Fascist bombing of a Basque town Guernica was exhibited along with monumental photomurals by Josep Renau. Based upon years of archival research, Mendelson's book opens a new perspective on the cultural politics of a turbulent era in modern Spain. It explores the little-known yet rich intersection between avant-garde artists and government institutions. It shows as well the surprising extent to which Spanish modernity was fashioned through dialogue between the seemingly opposed fields of urban and rural fine art and mass culture.

After the project
 Sotoca Garcia, Adolf, 2012-04-02. It is often argued that the future city will be that one built on the already urbanized territory. This statement asks for a new approach to Urban Planning more attentive to regenerating existing urban fabrics than extending them. Within this context, Mass Housing Estates and their renovation become an issue of great relevance. Being one of the 20th century's genuine forms of urban growth, their accelerated and very explicit obsolescence demands profound reflection on strategies and interventions. This book shows some descriptions, thoughts, and tentative designs on this particular urban form. Opened to an international scope, most of the presented materials and writings are referred to Barcelona and its MHE, since it is an exceptional case study in this matter as it is in many other fields related to urbanism. The large number and diversity of housing estates that were developed throughout the last century set the framework for the analysis of three challenges that MHE renewal will face in the future: guarantee of basic living conditions, urbanity provision, and metropolitan integration. The relevance of MHEs was the opportunity to build residential neighbourhoods with a much greater potential than traditional ones. Some specific cases have shown us how to design residential environments, and others show us precisely the opposite: how not to. MHE shouldn't have been located in isolated sites with an excessive insistence on a certain type of architecture. Today, the centre of our metropolitan reality continues to be Barcelona; it is a key element extremely important. But let us look with a renewed attention at the metropolitan context. The baricentre of this metropolitan Barcelona is certainly not located in Ciutadella but somewhere in Collserola. It is in this change of scale that, in understanding the real city, we will find the key to redefine MHE as an integral part of a much broader and more complex system than the former periphery where they were once built. Now we have the capacity and sufficient perspective to discern what was a mistake; from the positive assets we can recover from these territories.
