 involvement and policy implications It is the first book to both concentrate on the education of Puerto Ricans in particular
 and to bring together in one volume the major and emerging scholars who are developing cutting edge scholarship in the
 field Puerto Rican Students in U S Schools features both scholarly chapters conceptual and research studies and reflective
 essays as well as two poems combines broad overview studies with classroom practice and social action and includes
 chapters that trace the history of the education of Puerto Ricans in U S schools in general and its history in New York City
 and one chapter on return migrants **Street Science** Jason Corburn,2005-08-19 When environmental health problems
 arise in a community policymakers must be able to reconcile the first hand experience of local residents with
 recommendations by scientists In this highly original look at environmental health policymaking Jason Corburn shows the
 ways that local knowledge can be combined with professional techniques to achieve better solutions for environmental health
 problems He traces the efforts of a low income community in Brooklyn to deal with environmental health problems in its
 midst and offers a framework for understanding street science decision making that draws on community knowledge and
 contributes to environmental justice Like many other low income urban communities the Greenpoint Williamsburg
 neighborhood of Brooklyn suffers more than its share of environmental problems with a concentration of polluting facilities
 and elevated levels of localized air pollutants Corburn looks at four instances of street science in Greenpoint Williamsburg
 where community members and professionals combined forces to address the risks from subsistence fishing from the
 polluted East River the asthma epidemic in the Latino community childhood lead poisoning and local sources of air pollution
 These episodes highlight both the successes and the limits of street science and demonstrate ways residents can establish
 their own credibility when working with scientists Street science Corburn argues does not devalue science it revalues other
 kinds of information and democratizes the inquiry and decision making processes *Schools as Radical Sanctuaries* René

Antrop-González, 2011-11-01 Large comprehensive urban high schools were designed and constructed with the belief that they could meet the needs of all its students academic and otherwise. By and large however these schools have only done a good job of sorting students for specific jobs in a society based on capitalism and White supremacy. Consequently students schooled in these large institutions are often sorted depending on how they are situated and or perceived by institutional agents i.e. teachers, administrators, guidance counselors and other staff along racial, ethnic, class, gender, sexual orientation and ability lines. The overall result of such structurally and culturally based discriminatory practices has led to astronomically horrendous dropout/pushout rates among urban youth, particularly those of color who live in poverty. However in such a sea of despair there exist islands of hope and miracles. These islands of hope and miracles are constituted of small high schools that have become sanctuaries for their students, their families and communities of color. Moreover not only do these school sanctuaries exist but they have the potential to serve as inspirations to communities that are looking to the small schools initiative as a possible solution to the widespread failure of large comprehensive high schools to serve their needs. Although much recent small schools research discusses the benefits of smallness, very little of this research demonstrates or acknowledges the various ways in which communities have created small schools that have established the necessary conditions to make them sustainable, culturally relevant and linked to social justice while greatly impacting the improved academic achievement of their students. Therefore the focus of this book is to advance the school as radical sanctuary concept as described through the history, curricula and experiences of urban youth and their teachers in two small urban high schools. This book is important for those educationists who wish to deepen their understanding of small school reform and its implications for urban education.
