The Routledge Companion to Museum Ethics Janet Marstine, 2012-05-23 Routledge Companion to Museum Ethics is a theoretically informed reconceptualization of museum ethics discourse as a dynamic social practice central to the project of creating change in the museum Through twenty seven chapters by an international and interdisciplinary group of academics and practitioners it explores contemporary museum ethics as an opportunity for growth rather than a burden of compliance The volume represents diverse strands in museum activity from exhibitions to marketing as ethics is embedded in all areas of the museum sector What the contributions share is an understanding of the contingent nature of museum ethics in the twenty first century its relations with complex economic social political and technological forces and its fluid ever shifting sensibility The volume examines contemporary museum ethics through the prism of those disciplines and methods that have shaped it most It argues for a museum ethics discourse defined by social responsibility radical transparency and shared guardianship of heritage And it demonstrates the moral agency of museums the concept that museum ethics is more than the personal and professional ethics of individuals and concerns the capacity of institutions to generate self reflective and activist practice

Hot Topics, Public Culture, Museums Fiona Cameron, Lynda Kelly, 2020-05-22 Hot Topics Public Culture Museums engages the highly problematic and increasingly important issue of museums science centres their roles in contemporary societies their engagement with hot topics and their part in wider conversations in a networked public culture Hot topics such as homosexuality sexual and racial violence massacres drugs terrorism GMO foods H1N1 swine flu and climate change are now all part of museological culture The authors in this collection situate cultural institutions in an increasingly interconnected complex globalising and uncertain world and engage the why and how institutions might form part of activate conversations and action through discussions that theorise institutions in new ways to the very practical means in which institutions might engage their constituencies

Reculturing Museums Doris B. Ash, 2022-02-27 Reculturing Museums takes a unified sociocultural theoretical approach to analyze the many conflicts museums experience in the 21st century Embracing conflict Ash asks What can practitioners and researchers do to create the change they want to see when old systems remain stubbornly in place Using a unified sociocultural cultural

historical activity theoretical approach to analyzing historically bound conflicts that plague museums each chapter is organized around a central contradiction including finances Who will pay for museums demographic shifts Who will come to museums the roles of narratives Whose story is it ownership of objects Who owns the artifact and learning and teaching What is learning and how can we teach equitably The reculturing stance taken by Ash promotes social justice and equity making change first within museums called inreach rather than outside the museum called outreach challenges existing norms is sensitive to neoliberal and deficit ideologies and pays attention to the structure agency dialectic Reculturing Museums will be essential reading for academics students museum practitioners educational researchers and others who care about museums and want to ensure that all people have equal access to the activities objects and ideas residing in them

Tourism Support Services Patrick Kalasa Kalifungwa, 2025-06-02 Tourism can thrive anywhere in the World on Land on sea and in the Air Certain parameters have to exist to facilitate its establishment and growth We have tried to explore various aspects that require being in place to support tourism development and growth The development of technology and transport infrastructure such as jumbo jets low cost airlines and more accessible airports have made many types of tourism to be more affordable Airplanes facilitate tourism mobility and receipts The more planes you land at an airport the more visitors you receive The ultimate goal of tourism promotion and marketing is an increase in visitors and investments The tourism Industry is unlike any other industries because Instead of a physical product you are selling a place and all the things it has to offer services You are competing with the entire world every time you promote tourism in a given destination and this high level of competition demands a creative and unique approach The variability among living organisms from all sources including inter alia terrestrial marine and other aquatic ecosystems and ecological complexes support tourism development Natural environment or wilderness wild animals rocks birds forest and in general those things that have not been substantially altered by human intervention support tourism activities Therefore support services have to complement the sustenance of tourism at various levels

Museums and Truth Annette B. Fromm, Viv Golding, Per B. Rekdal, 2014-10-16 Museums are usually seen as arenas for the authorised presentations of reality based on serious professional knowledge Yet in spite of the impossibility of giving anything but a highly abstract and extremely selective impression in an exhibition very few museums problematize this or discuss their priorities with their public They don't ask what are the other truths of the matter Though the essays in this collection are not written with museums and truth as their explicit subject they highlight contested truths the absence of the truth of the underprivileged whether one truth is more worthy than the other and whether lesser truths can dilute the value of greater truths One of the articles included here lets youngsters choose which truth is most probable or just while another talks about an exhibition where the public must choose which truth to adhere to before entering One shows how a political change gives a new opportunity to finally restore valuable truths of the past to the present and another describes the highly dangerous task of making museums and memorials for the truths of the oppressed Lastly one explores whether we live in a period where the sources for authorized truths are fragmented and questioned and asks what should the consequences for museums be **Intentional Practice for Museums** Randi Korn, 2018-11-05 Intentional practice is an impact driven way of thinking and working that places a museum's raison d'être achieving impact at the center of its work A prerequisite to achieving impact is articulating the kind of impact the museum would like to achieve An impact statement embodies three essential ideas staff members' passions for their work the museum's distinct qualities and notions of what is relevant to

audiences The statement as well as other work generated from intentional practice becomes part of an Impact Framework that serves as a guidepost for all subsequent work as any and all museum work should focus on achieving its intended impact If the museum chooses work that moves it away from its central purpose it is wasting resources dollars and staff time

Intentional Practice for Museums A Guide for Maximizing Impact first explains how the idea of intentional practice grew from a confluence of political concerns observations of museum in the marketplace and the increasingly deafening call for museums to be accountable The book presents and deconstructs the Cycle of Intentional Practice which includes four quadrants with actions and corresponding questions situated around the centerpiece impact In no particular order The Plan quadrant asks What impact do you want to achieve The Evaluate quadrant asks In what ways have you achieved impact The Reflect quadrant asks What have you learned What can you do better and The Align quadrant asks How do we align our actions to achieve impact The Cycle is symbolic too as impact driven work is ongoing and museums that choose to pursue impact through intentional practice will benefit as will their audiences both will continually learn albeit through very different means

Intended for intentionally minded museum professionals the book also describes the seven principles of intentional practice and provides basic intentional practice strategies exercises and facilitation questions so they can begin facilitating impact driven workshops at their museums
