previously published articles from the journal *Safundi South African Transitions* documents both the country's and the journal's mutual history over the past quarter century. Divided into five sections, the first part of the book explores the broad theme of South Africa's transition to non-racial democracy by foregrounding issues of nationalism, diplomacy, rural change, social trauma, historical commemoration, and political feeling at local, national, and international levels. The second section focuses on the question of civil society, including essays on media, racism, histories of segregation, legacies of criminal violence, and comparative patterns of incarceration, underscoring the endurance of certain long-term problems and the emergence of new ones. Part three surveys the role of education in transforming South Africa, while part four situates South Africa's opportunities and challenges within regional and global contexts to better understand the South African situation and its relationship to conditions around the world. The penultimate section has contributions that confront the present by identifying the struggles and crises of South Africa's current political moment, including labor movements, the matter of land restitution, feminist activism, LGBTQI rights, and the Marikana Massacre of 2012. The book ends with an essay on the fire at Jagger Library at the University of Cape Town by historian Bill Nasson, a moment of contingent destruction that speaks of the Covid-19 pandemic and the burgeoning climate crisis at present. *Traversing across time and place: South African Transitions* will be an indispensable resource for scholars, researchers, activists, and policymakers, as well as those readers who are generally interested in understanding South Africa's social, political, and intellectual transformations over the past several decades.

Reconciliation Discourse Annelies Verdoolaage, 2008 This volume is a research monograph analysing the South African Truth and Reconciliation Commission TRC from an ethnographic linguistic point of view The central proposition of this book is that the TRC can be regarded as a mechanism that leads to the hegemony of specific discourses thus exercising power The analysis illustrates how through a certain type of reconciliation discourse constructed at the TRC hearings a reconciliation oriented reality took shape in post TRC South Africa Basically the study points to the long term implications a truth commission can exert on a traumatised post conflict society The book is unique on several levels TRC discourse is explored in depth on the basis of personal stories from TRC testifiers a combination of

Poststructuralist and Critical Discourse Analysis approaches form the theoretical foundations and an extensive bibliography provides an impressive database of TRC publications

International Conflict Resolution After the Cold War National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on International Conflict Resolution, 2000-11-07 The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict Do the old methods still work Are there new tools that could work better How do old and new methods relate to each other International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners It considers recent applications of familiar conflict management strategies such as the use of threats of force economic sanctions and negotiation It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution including truth commissions engineered electoral systems autonomy arrangements and regional organizations It also opens up analysis of emerging issues such as the dilemmas facing humanitarian organizations in complex emergencies This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system

Settling Self-Determination Disputes Marc Weller, Barbara Metzger, 2008-01-31 The study is the result of an international collaborative project supported and funded by the Carnegie Corporation of New York This multi year venture has involved a research team of some forty chapter authors and commentators The research has been accompanied by three major workshops on project methodology initial chapter reviews and final discussions A point was made of including both scholars and practitioners involved in power sharing settlements in the review process in the hope that more would be learned about the actual implementation of the settlements under investigation The project team was united in its wish to explore whether long standing secessionist conflicts have been addressed effectively through the significant number of self determination settlements that were generated in response to the wave of internal conflicts of the 1990s It was also committed to testing whether consociationalist and integrative techniques of conflict settlement really are as mutually exclusive as is sometimes supposed or whether they can in fact be mutually reinforcing Finally the project derives its impetus from the necessity to critically

rethink the doctrine of self determination One may question whether its traditional restrictive interpretation will be adequate in confronting the wide variety of future challenges to the territorial integrity of states Finding the Words Thomas Moriarty,2003-10-30 The author accounts for South Africa s transition from apartheid to democracy from a rhetorical perspective Based on an exhaustive analysis of hundreds of public statements made by South Africa s leaders from 1985 to the present Moriarty shows how key constructions of the political scene paved the way for negotiations elections and national reconciliation These rhetorical changes moved South Africa out of the realm of violent conflict and into one of rhetorical conflict a democratic space in which the country could resolve its problems at the negotiating table and in the ballot box

Confronting the Challenges and Prospects in the Creation of a Union of African States in the 21st Century E. Ike Udogu,2010-02-19 Confronting the Challenges and Prospects in the Creation of a Union of African States in the 21st Century frames the discourse around the important issue of African unification against the backdrop of the region s political and economic marginalization Arguably the richest continent in the world in terms of its abundant untapped natural resources and human capital it still lags behind the other regions of the world developmentally Undeniably Africa is at the crossroads in this millennium within the context of the powerful events and effects of the New Globalization One of the central issues that academics and political actors interested in African development must tackle immediately is how to make the region politically and economically relevant in global affairs These objectives could be attained through continental amalgamation Accordingly this book debates and suggests inter alia strategies that might advance Africa s unification effort in order to provide the politico economic clout needed to spur continental development Further it argues that such a Union of African States is critical for promoting the good political life for all Africans **Framing the Race in South Africa** Karen E. Ferree,2010-11-15 Post apartheid South African elections have borne an unmistakable racial imprint Africans vote for one set of parties whites support a different set of parties and with few exceptions there is no crossover voting between groups These voting tendencies have solidified the dominance of the ruling African National Congress ANC over South African politics and turned South African elections into racial censuses This book explores the political sources of these outcomes It argues that although the beginnings of these patterns lie in South Africa s past in the effects apartheid had on voters beliefs about race and destiny and the reputations parties forged during this period the endurance of the census reflects the ruling party s ability to use the powers of office to prevent the opposition from evolving away from its apartheid era party label By keeping key opposition parties white the ANC has rendered them powerless solidifying its hold on power in spite of an increasingly restive and dissatisfied electorate Reflections on the 2019 South African General Elections Joleen Steyn Kotze,Narnia Bohler-Muller,2020-12-17 Reflections on the 2019 South African General Elections is a critical reflection on the key lessons of Elections 2019 in South Africa focusing on the future of the country s electoral democracy The volume engages questions on land election campaigns voter turnout voter apathy and how opposition parties will be forced to co exist in the

context of declining electoral dominance the ANC once comfortably held An important reflection on the lessons of the 2019 South African General Elections the contributors ask Quo Vadis South Africa The 2019 General Elections marked a watershed in South Africa's political landscape The ANC under the banner of a narrative of regeneration and getting back on the moral path dipped below the 60 % mark for the first time in South Africa's democratic history This decline in electoral support for the party may be interpreted as a degeneration of the ANC through the loss of its moral stature the erosion of its integrity and disillusionment with its performance as a governing party Opposition political parties could not capitalise on this seeming disillusionment with the ruling ANC Caught in their own factional battles and in the midst of corruption scandals opposition parties were unable to successfully increase their share of the vote and capture the undecided and disillusioned voter Considering the future of South Africa's electoral democracy at 25 years of democracy Reflections on the 2019 South African General Elections will be of great interest to scholars of African Studies South Africa Governance and Elections The chapters in this book were originally published as a special issue of Politikon South African Journal of Political Studies
