Electricians install domestic wiring and control electrical equipment through which electricity flows. They also install and maintain electrical equipment and machines in factories and a wide range of other businesses related to electrical. Electricians generally focus on either construction or maintenance, although many of them do both. An electrician is a tradesperson specializing in electrical wiring of buildings, stationary machines and related equipment. Electricians may be employed in the installation of new electrical components or the maintenance and repair of existing electrical infrastructure. They join an electrician apprenticeship program sponsored by the International Brotherhood of Electrical Workers (IBEW), National Electrical Contractors Association (NECA), Independent Electrical Contractors (IEC) or Industrial Training Institute (ITI) as electricians through a Government Institution. These programs include both classroom courses and on-the-job training and take about 2-4 years to complete. Construction electricians read blueprints of circuit diagrams, install wiring and electrical controls in residential or commercial buildings and follow the state and local building regulations. They might also dictate and train workers who are learning the skills. It is a practical guide for ITI apprentices preparing for service interview or already employed. Electricians may be employed in the installation of new electrical components, machines and equipment or the maintenance and repair of existing electrical infrastructure. All electricians should expect to maintain current knowledge of
