Electroceramics VI '98 N. Setter, E. Colla, D. Damjanovic, 1999-05-18 This collection of 185 papers results from contributions made at Electroceramics VI which forms part of the joint triple meeting held in Montreaux Switzerland in August 1998 The joint meeting covered recent advances in the broad and rapidly progressing field of electroceramics ferroelectrics and polar dielectrics More than 550 papers were presented at the triple meeting 250 of them at Electroceramics VI 98 including a series of plenary lectures highlighting research areas of strong current and emerging interests The meeting demonstrated the wide variety of new applications being developed based in particular on ferroelectrics polar dielectrics ionic conductors and any other functional ceramics In comparison with previous meetings the present one showed the growing importance of surfaces interfaces and other boundaries e.g. domain walls Size effects and questions related to nanotechnology were comprehensively discussed both on the academic level and for device realizations Microdevices and their integration problems and solutions were at the heart of many reports The papers reflected the extensive activities in this interdisciplinary area while the balance between presentations from academic laboratories and from industrial R D laboratories was a testimony to its vitality The volume contains 185 papers selected after refereeing of the 220 papers submitted for publication

Industrial Ceramics, 1987 *Advanced Science and Technology of Sintering* Biljana D. Stojanovic, Valery V. Skorokhod, Maria Vesna Nikolic, 2011-06-28 This volume entitled Advanced Science and Technology of Sintering contains the edited Proceedings of the Ninth World Round Table Conference on Sintering IX WRTCS held in Belgrade Yugoslavia September 1-4 1998 The gathering was one in a series of World Round Table Conferences on Sintering organised every four years by the Serbian Academy of Sciences and Arts SASA and the International Institute for the Science of Sintering IISS The World Round Table Conferences on Sintering have been traditionally held in Yugoslavia The first

meeting was organised in Herceg Novi in 1969 and since then they have regularly gathered the scientific elite in the science of sintering. It is not by chance that at these conferences G C Kuczynski, G V Samsonov, R Coble, Ya E Geguzin and other great names in this branch of science presented their latest results making great qualitative leaps in its development. Belgrade hosted this conference for the first time. It was chosen as a reminder that 30 years ago it was the place where the International Team for Sintering was formed, further growing into the International Institute for the Science of Sintering. The IX WRTCS lasted four days. It included 156 participants from 17 countries who presented the results of their theoretical and experimental research in 130 papers in the form of plenary lectures, oral presentations and poster sections.
