Electromanipulation in Hybridoma Technology Carl A. K. Borrebaeck, Inger Hagen, 1989

Electromanipulation in Hybridoma Technology Carl A.K. Borrebaeck, Inger Hagen, 1990-06-18 A manual that details the techniques of electrofusion and electroporation by researchers who were the first to show that the platelet membrane glycoproteins GP IIb and GP IIIa are associated in a complex which triggered interest in electrofusion

A Practical Guide to Monoclonal Antibodies J. Eryl Liddell, A. Cryer, 1991-08-26 Includes all of the information required to produce monoclonal antibodies in the laboratory and to prepare them for use in a multitude of given applications Production procedures are treated in chronological order beginning with basic tissue culture techniques immunization strategies and screening test design followed by production of hybridoma cell lines and basic antibody characterization purification and labeling Each chapter contains explanatory text on each step with comparative analysis of methods where appropriate All necessary experimental protocols are presented in a self contained format that is easy to follow in the laboratory Alternative protocols are provided where relevant for others not included in full source references are presented Surveys the current status of human hybridoma production and antibody engineering using molecular biology techniques

Guide to Electroporation and Electrofusion Donald C. Chang, Bruce M. Chassy, James Saunders, Arthur E. Sowers, 2012-12-02 Electroporation is an efficient method to introduce macromolecules such as DNA into a wide variety of cells Electrofusion results in the fusion of cells and can be used to produce genetic hybrids or hybridoma cells Guide to Electroporation and Electrofusion is designed to serve the needs of students experienced researchers and newcomers to the field It is a comprehensive manual that presents in one source up to date easy to follow protocols necessary for efficient electroporation and electrofusion of bacteria yeast and plant and animal cells as well as background information to help users optimize their results through comprehension of the principles behind these techniques Covers fundamentals of electroporation and electrofusion in detail Molecular events Mechanisms Kinetics Gives extensive practical information The latest applications Controlling parameters to maximize efficiency Available instrumentation Presents applications of electroporation and electrofusion in current research situations State of the art modifications to electrical pulses and generators Application of electroporation and electrofusion to unique alternative cell and tissue types Gives straightforward detailed easy to follow protocols for Formation of human hybridomas Introduction of genetic material into plant cells and pollen Transfection of mammalian cells Transformation of bacteria plants and yeast Production of altered embryos Optimization of electroporation by using reporter genes Comprehensive and up to date Convenient bench top format Approximately 125 illustrations complement the text Complete references with article titles Written by leading authorities in electroporation and electrofusion

Permeability and Stability of Lipid Bilayers E. Anibal Disalvo, Sidney A. Simon, 2017-12-14 This book presents a comprehensive and coherent picture of how molecules diffuse across a liquid that is

on average only two molecules thick It begins by characterizing bilayers structurally using X ray diffraction and then mechanically by measuring elastic moduli and mechanisms of failure Emphasis is placed on the stability and mechanical properties of plant membranes that are subject to very large osmotic and thermal stresses Using this information the transport of molecules of increasing complexity across bilayers is analyzed *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *New Methods of Food Preservation* Grahame W.
