

ELECTRONIC DEMOCRACY

Using The Internet To Transform American Politics

Graeme Browning

Use the Internet to ...

- Research political issues
- Tap into important resources
- Reach legislators & the media
- Organize grassroots campaigns
- Let your voice be heard!

**Second
Edition**

"By harnessing the power of the Internet to inform, organize, and advocate, Americans can use technology to broaden and deepen their role in our representative democracy. Combining political savvy with computer know-how, Graeme Browning shows us how."

Electronic Democracy Anne Rawley Saldich,1979

Political Satire, Postmodern Reality, and the Trump

Presidency Mehnaaz Momen,2018-12-11 This book attempts to grasp the recent paradigm shift in American politics through the lens of satire It connects changes in the political and cultural landscape to corresponding shifts in the structure and organization of the media in order to shed light on the evolution of political satire on late night television Satire is situated in its historical background to comprehend its movement away from the fringes of discourse to the very center of politics and the media Beginning in the 1990s certain trends such as technological advances media consolidation and the globalization of communications reinforced each other paving the way for satire to claim a prized spot in the visual media a tendency that only gained strength after September 11 While the Bush presidency presented itself as an apposite target for satirists their stronghold on American television was made possible by a number of transitions in broader culture which are encapsulated in the shrinking space available for political engagement under neoliberalism This largely underestimated development can be understood through the framework of postmodernism which focuses on the relationship between language power and the presentation of reality These trends and transitions reached a climax in the 2016 election where President Trump was elected embodying what can only be considered a significant turning point in American politics The bigger narrative contains various subplots represented in the rise of the neoliberal economy the acceptance of postmodernism as the dominant cultural code and the role of the voyeur superseding that of the engaged citizen It is only through understanding each of these pieces and connecting them that we can comprehend the current political transformation The present moment may feel like a golden age of satire and it may well be but this book addresses the hardest questions about the realities behind such a claim what can we conclude about when and how satire is effective judging by the history of this genre in its various incarnations and how can the apolitical postmodern media landscape be reconciled with what the best of this genre has had to offer during times of political duress

Television in Society Arthur Asa Berger,2017-09-29 Is television a cultural wasteland or a medium

that has brought people more great art music dance and drama than any previous media How do we study and interpret television What are the effects of television on individuals and society and how do we measure them What is the role of television in our political and economic life Television in Society explores these issues in considering how television both reflects and affects society The book is divided into two sections The first focuses on programming and deals with commercials ceremonial events important series such as MASH and Lou Grant significant programs a production of Brave New World on television and the images of police on the medium The second part of the book deals with important issues and topics related to the medium the impact of television violence values found on television the impact of television on education

the significance of new technological developments and the always thorny issue of freedom of the press The articles are drawn together by a brilliant introductory essay by Arthur Asa Berger who examines television as culture *Electronic Democracy* Anne Rawley Saldich,1979 American Studies Jack Salzman,American Studies Association,1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988 *The Digital Sublime* Vincent Mosco,2005-09-23 Interpreting the myths of the digital age why we believed in the power of cyberspace to open up a new world The digital era promises as did many other technological developments before it the transformation of society with the computer we can transcend time space and politics as usual In *The Digital Sublime* Vincent Mosco goes beyond the usual stories of technological breakthrough and economic meltdown to explore the myths constructed around the new digital technology and why we feel compelled to believe in them He tells us that what kept enthusiastic investors in the dotcom era bidding up stocks even after the crash had begun was not willful ignorance of the laws of economics but belief in the myth that cyberspace was opening up a new world Myths are not just falsehoods that can be disproved Mosco points out but stories that lift us out of the banality of everyday life into the possibility of the sublime He argues that if we take what we know about cyberspace and situate it within what we know about culture specifically the central post Cold War myths of the end of history geography and politics we will add to our knowledge about the digital world we need to see it with both eyes that is to understand it both culturally and materially After examining the myths of cyberspace and going back in history to look at the similar mythic pronouncements prompted by past technological advances the telephone the radio and television among others Mosco takes us to Ground Zero In the final chapter he considers the twin towers of the World Trade Center our icons of communication information and trade and their part in the politics economics and myths of cyberspace **Ibss Poli Sci 29 1980** "International Committee For Social Sciences Documentation",2013-10-15 The International Bibliography of the Social Sciences IBSS is an essential tool for librarians academics and researchers wishing to be kept up to date with the published literature in the social sciences IBSS is compiled in four divisions Anthropology Sociology Economics and Political Science This is Volume XXIX of the International bibliography of political science as of 1980 **While America Watches** Jeffrey Shandler,2000-09-21 The Holocaust holds a unique place in American public culture and as Jeffrey Shandler argues in *While America Watches* it is television more than any other medium that has brought the Holocaust into our homes our hearts and our minds Much has been written about Holocaust film and literature and yet the medium that brings the subject to most people television has been largely neglected Now Shandler provides the first account of how television has familiarized the American people with the Holocaust He starts with wartime newsreels of liberated concentration camps showing how they set the moral tone for viewing scenes of genocide and then moves to television to explain how the Holocaust and the Holocaust survivor have gained stature as moral symbols in American culture From early teleplays to coverage of the Eichmann trial and the Holocaust miniseries as well as

documentaries popular series such as All in the Family and Star Trek and news reports of recent interethnic violence in Bosnia Shandler offers an enlightening tour of television history Shandler also examines the many controversies that televised presentations of the Holocaust have sparked demonstrating how their impact extends well beyond the broadcasts themselves While America Watches is sure to continue this discussion and possibly the controversies among many readers

Race and Ethnicity in Comparative Perspective Georgia A. Persons,2018-04-24 Contradictory forces are at play at the close of the twentieth century There is a growing closeness of peoples fueled by old and new technologies

of modern aviation digital based communications new patterns of trade and commerce and growing affluence of significant portions of the world's population Television permits individuals around the world to learn about the cultures and lifestyles of peoples of physically distant lands These developments give real meaning to the notion of a global village Peoples of the world are growing closer in new and increasingly important ways Nonetheless there are disturbing signs of a growing awareness of ethnic differences in all parts of the world the United States included and a concomitant rise in ethnic based conflicts many of them extraordinarily violent in nature Fear resentment intolerance and mistreatment of the other abound in world news accounts Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent global village but its emergence in the post cold war era internationally and the post civil rights era in the United States raises significant and compelling questions Why are such conflicts occurring now How do analysts explain these developments The essays in *Race and Ethnicity in Comparative Perspective* lucidly explore some of the complexities of the persistence and re emergence of race and ethnicity as major lines of divisiveness around the world Contributors analyze manifestations of race based movements for political empowerment in Europe and Latin America as well as racial intolerance in these same settings Attention is also given to the conceptual complexities of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity nationalism identity and ideology The book greatly informs discussions of race and ethnicity in the international context and provides an interesting perspective against which to view America's changing problem of race *Race and Ethnicity in Comparative Perspective* is a timely thought provoking volume that will be of immense value to ethnic studies specialists African American studies scholars political scientists historians and sociologists
