Translingual Identities Tamar Steinitz, 2013 Explores the psychology of literary translingualism in the works of two authors finding it expressed as loss and fragmentation in one case and as opportunity and mediation in the other The works of translingual writers those who write in a language other than their native tongue present a rich field for study but literary translingualism remains underresearched and undertheorized In this work Tamar Steinitz explores the psychological effects of translingualism in the works of two authors the German Stefan Heym 1913 2001 and the Austrian Jakob Lind 1927 2007 Both were forced into exile by the rise of Nazism both chose English as a language of artistic expression Steinitz argues that translingualism which ruptures the perceived link between language and world as the writer chooses between systems of representation leads to a psychic split that can be expressed in the writer s work as a schizophrenic existence or as a productive doubling of perspective Movement between languages can thus reflect both the freedom associated with geographical mobility and the emotional price it entails Reading Lind s and Heym s works within their postwar context Steinitz proposes these authors as representative models respectively of translingualism as loss and fragmentation and translingualism as opportunity and mediation Tamar Steinitz teaches English literature at Queen Mary and Goldsmiths colleges University of London She has also worked as a literary translator

Foreign Policy Objectives in European Constitutional Law Joris Larik, 2016-03-24 Presenting the first comprehensive account of foreign policy objectives as a growing part of European constitutional law Joris Larik confronts the trend of enshrining international ambitions in the highest laws of states and the European Union Closely examining the provisions of foreign policy objectives Larik differentiates their legal force and functions situating them into the overall legal order of the state the EU and the composite European constitutional space He argues that the codification of foreign policy objectives suggests a progression in the evolution of the role of the constitution from limiting public authority to guiding it towards certain goals both at home and in the wider world Advancing a comparative constitutional perspective for the study of EU external relations this volume contributes a constitutional dimension to the normative power debate in the study of EU foreign policy Drawing on established national doctrines on constitutional objectives from Germany France and India the book provides a common vocabulary for coming to terms with foreign policy objectives as legal norms across different jurisdictions In the pluralist context and closely intertwined legal orders of the EU and its Member States it shows how objectives help to channel the individual ambitions of the Member States through the Union framework towards a more coherent external action Furthermore the book connects its legal findings with the debate on the EU as an actor in international relations exploring the role of these norms in inter institutional struggles and processes of identity shaping legitimization and socialization

Germans into Jews Sharon Gillerman, 2009-07-28 Germans into Jews turns to an often overlooked and misunderstood period of German and Jewish history the years between the world wars It has been assumed that the Jewish community in Germany was in decline during the Weimar Republic But Sharon Gillerman demonstrates that Weimar Jews sought to rejuvenate and reconfigure their community as a means both of strengthening the German nation and of creating a more expansive and autonomous Jewish entity within the German state These ambitious projects to increase fertility expand welfare and strengthen the family transcended the ideological and religious divisions that have traditionally characterized Jewish communal life Integrating Jewish history German history gender history and social history this book highlights the experimental and contingent nature of efforts by Weimar Jews to reassert a new Jewish particularism while simultaneously reinforcing their commitment to Germanness

The Transatlantic Kindergarten Ann Taylor Allen,2017-01-02 The kindergarten as institution as educational philosophy and as social reform movement is one of Germany s most important contributions to the world Swiss pedagogue Johann Heinrich Pestalozzi and his German student Friedrich Fröbel who founded the kindergarten movement around 1840 envisioned kindergartens as places of education and creative engagement for children across all classes not merely as daycare centers for poor families At first however Germany proved an inhospitable environment for this new institution After the failure of the 1848 revolutions several German governments banned the kindergarten as a hotbed of subversion because of its links to women s rights movements German revolutionaries who were forced into exile introduced the kindergarten to the United States where it soon found roots among native born as well as immigrant educators In an era when convention limited middle class women to the domestic sphere the kindergarten provided them with a rare opportunity not only for professional work but also for involvement in social reform in the fields of education and child welfare Through three generations American and German women established many kinds of contacts In this elegant book Ann Taylor Allen presents the first transnational history of the kindergarten as it developed in Germany and the United States between 1840 and World War I Based on a

large body of previously untapped sources in both countries The Transatlantic Kindergarten shows how a common body of ideas and practices adapted over time to two very different political and social environments Since the end of the First World War early childhood education in the United States and Germany has followed the patterns laid down in the nineteenth century However as Allen's nuanced analysis suggests the provision of public preschool education is still an unfinished and much discussed project on both sides of the Atlantic ... The Publishers Weekly, 1900 Post-Wall German Cinema and National History Mary-Elizabeth O'Brien, 2014 German history films that focus on utopianism and political dissent and their effect on German identity since 1989 Since unification a radical shift has taken place in Germans view of their country's immediate past with 1989 replacing 1945 as the primary caesura The cold war division the failed socialist state the 68 student movement and the Red Army Faction historical flashpoints involving political oppression civil disobedience and the longing for utopian solutions to social injustice have come to be seen as decisive moments in a collective history that unites East and West even as it divides them Telling stories about a shared past establishing foundational myths and finding commonalities of experience are pivotal steps in the construction of national identity Such nation building is always incomplete but the cinema provides an important forum in which notions of German history and national identity can be consumed negotiated and contested This book looks at history films made since 1989 exploring how utopianism and political dissent have shaped German identity It studies the genre including popular successes critical successes and perceived failures as a set of texts and a discursive network gauging which conventions and storylines are resilient At issue is the overriding question to what extent do these films contribute to a narrative that legitimizes the German nation state Mary Elizabeth O'Brien is Professor of German and The Courtney and
