Draut,Peter D. Clift,David W. Scholl,2008-01-01 Inspired by a GSA Penrose Conference held in 2005 cosponsored by the International Association of Sedimentologists and the British Sedimentological Research Group the 17 papers in this volume explore sedimentary environments in arc collision zones and their utility in recording the evolution of modern and ancient convergent margins The first set of papers in the collection focuses on formation and evolution of the sedimentary record in arc settings and arc collision zones concentrating on modern intra oceanic examples Papers include studies of flexural modeling and factors that affect development of siliciclastic and carbonate deposits around modern arcs The second half of the volume presents new applications of arc sedimentary records These relate primarily to constraining tectonic events in the evolution of arc systems but also concern the links among tectonic uplift collision and geomorphic and climatic feedback mechanisms in arc collision zones Publisher's website      Geology of México Susana A. largest most technologically advanced indigenous group in northwest Mexico but today though their descendants presumably live on in Sonora almost no one claims descent from the patas The patas seem to have disappeared as an ethnic group their languages forgotten except for the names of the towns plants and geography of the Opater a where they lived Why did the patas disappear from the historical record while their neighbors survived David Yetman a leading ethnobotanist who has traveled extensively in Sonora consulted more than two hundred archival sources to answer this question The result is an accessible ethnohistory of the patas one that embraces historical complexity with an eye toward Opatan strategies of resistance and assimilation Yetman s account takes us through the Opatans initial encounters with the conquistadors their resettlement in Jesuit missions clashes with Apaches their recruitment as miners and several failed rebellions and ultimately arrives at an explanation for their disappearance Yetman s account is bolstered by conversations with present day residents of the Opater a and includes a valuable appendix on the languages of the Opater a by linguistic anthropologist David Shaul One of the few studies devoted exclusively to this indigenous group The patas In Search of a Sonoran People marks a significant contribution to the literature on the history of the greater Southwest Lower Colorado River Multi-species Conservation Program ,2004 **Lower Colorado River Multi-Species Conservation Program: Final programmatic environmental impact statement** ,2004 Tectonics, Sedimentary Basins, and Provenance: A Celebration of the Career of William R.
