Especies Charles Darwin, Raul Bracho, 2014-11-01 Ya se habían propuesto varias ideas evolucionistas para explicar los nuevos descubrimientos de la biología Hubo un apoyo cada vez mayor a estas ideas entre los anatomistas disidentes y el público en general pero durante la primera mitad del siglo XIX la comunidad científica inglesa estaba estrechamente vinculada a la Iglesia de Inglaterra mientras que la ciencia era parte de la teología natural Las ideas sobre la transmutación de las especies fueron controvertidas ya que entraban en conflicto con las creencias de que las especies eran parte inmutable de una jerarquía diseñada y que los seres humanos eran únicos sin relación con otros animales Las implicaciones políticas y teológicas fueron debatidas intensamente pero la transmutación no fue aceptada por la corriente científica El libro fue escrito para lectores no especializados y suscitó un gran interés a partir de su publicación Como Darwin era un científico eminente sus conclusiones fueron tomadas en serio y las pruebas que presentaba generaron un debate científico filosófico y religioso El debate sobre el libro contribuyó a la campaña de Thomas Huxley y sus compañeros del X Club para secularizar la ciencia promoviendo el naturalismo científico *EL ORIGEN DE LAS ESPECIES POR LA SELECCIÓN NATURAL* Charles
