Elder Mistreatment Deciding Who Is At Risk:

Elder Mistreatment Tanya F. Johnson, 1991-03-30 Mistreatment of the elderly became recognized as a serious and growing problem in the late 1970s as a result of governmental investigations and research in the public and private sectors. Although in most states elder mistreatment is handled by social service agencies other professionals are also needed to broaden the identification team and help alleviate the risk to the older adults. This book is designed for human services professionals who are not necessarily adult protective services specialists but who provide direct ongoing services to elder adults. Its purpose is to offer guidelines for detecting elder mistreatment so that assistance can be given to the vulnerable older adults to preserve their particular quality of life. The book is arranged into seven chapters. The first discusses why elder serving human services professionals should become involved in mistreatment identification while chapter two focuses on the various starting points in the definition of elder mistreatment. Chapters three and four review research on risk factors in elder mistreatment and detail varieties of mistreatment measures and methods for distinguishing between them. A review of risk instruments used in adult protective services and non adult protective services settings forms the basis of chapter five and chapter six outlines a proposed risk assessment model specially designed for elder serving human service professionals. The final chapter offers some prospects for the future of elder mistreatment risk assessments. The work concludes with a set of four appendices covering contact persons in lead agencies, report receiving authorities within jurisdictions, health status risk assessment and prevention strategies. This volume will be a useful tool for human services professionals, mental health care providers and social health care and legal services professionals as well as a useful addition to reference collections in public academic and medical libraries.

Elder Mistreatment Tanya F Johnson, 1995-11-08 In this guidebook authors from various disciplines distinguish conflicts in ethical issues among elder abuse victims, precipitators and professional care providers and propose ways to address these differences. *Elder Mistreatment: Ethical Issues, Dilemmas and Decisions* identifies key differences and similarities in professional ethical protocols and shows how differences may be addressed to achieve consensus in ethical decisionmaking. For some time now helping professionals involved with cases of elder abuse have recognized the need to begin a dialogue on applying ethical principles to practice. The subject of ethics while always a part of services has been difficult to articulate in practice because its roots come from principles of belief rather than objective absolute criteria. For this reason professionals have erred on the side of practice methods rather than the deeper issues of values protocols for clients and professionals. *Elder Mistreatment* raises the question of how to identify ethical values and their starting points among all parties in the elder abuse situation, determine whether dilemmas may arise with competing values and initiate moves toward consensus. Professionals from the fields of medicine, social work, law, religion and ethics review three cases of mistreatment, identify the ethical values, issues and dilemmas as they relate to both the client/patient and their particular profession. In this way the reader can compare the similarities and differences among

professional starting points The final chapter in this book written by a medical ethicist describes how members from different professions working as a multidisciplinary team might be able to integrate differing perceptions of the dilemmas into greater consensus in the process of ethical decisionmaking in cases of elder mistreatment Throughout the case studies and chapters these topics are covered in depth communicative ethics autonomy beneficence non maleficence justice community based multidisciplinary care legal competence clinical competence Readers at all levels in the following fields will benefit from this guidebook social workers physicians nurses allied health professionals psychologists therapists psychiatrists clergy lawyers paralegals and ethicists

understanding elder abuse in minority populations moral and ethical implications of elder abuse sexual violence against elderly women helping victims and more For public health personnel Old Age Abuse Mervyn Eastman, Age Concern England (Organization), 2013-11-11 Age Concern always seeks to be at the forefront in raising issues of importance as part of our continuing fight to improve the quality of life of older people To this end we are privileged in being able to draw on the skills of people with the commitment expertise and enthusiasm to press for much needed change When some years ago we published a book by Mervyn Eastman on old age abuse the subject was largely unrecognized He played a pioneering role in drawing attention to this difficult and sensitive topic classifying the various types of abuse analysing their causes their tragic effects and the different contexts in which they were likely to occur Earlier when I joined Age Concern I had been struck by the paucity of knowledge of old age abuse My previous work with children and young people provided me with stark reminders of how much more developed both policy and practice were in dealing with the abuse of children Even in that field there was still much to learn and subsequent legislation policy guidelines and codes of practice have taken us further down the road by constructing clear lines of accountability and by protecting and representing children at risk by helping potential abusers and developing practice that avoids punishing victims through removing them from their homes **Elder Abuse Work** Jacki Pritchard, 1999-01-01 The abuse neglect and exploitation of older people in community and residential care settings is increasingly being recognised and addressed as a serious social concern in Britain and Canada Elder Abuse Work gives an overview of the developments and issues in both countries and draws out good practice guidelines **Family Crimes Against the Elderly** Patricia J. Brownell, 2014-01-14 First Published in 1999 Family Crimes Against the Elderly A Study of Elder Abuse and the New York Police Department represents an important contribution to the available knowledge on elder abuse as a criminal justice issue While most studies of elder abuse to date have examined this social problem from a health mental health or social service perspective few have focused on it from the perspective of law enforcement **Abuse of Older Men** Jordan I. Kosberg, 2014-01-02 Learn the causes and consequences from elder abuse of men For the most part often only women are considered the victims of elder abuse However men are also subject to this disturbing social problem Abuse of Older Men examines the diverse aspects of this surprisingly widespread issue that includes sexual abuse abuse by intimates and benign neglect in the health care field as well as effective treatment strategies This unique resource provides the latest research and crucial discussions of why the problem is often invisible under studied and under treated Detailed explorations include risk assessment differential detection of abuse of one gender over the other the risk of abandonment economic exploitation and the issues of older men who had been abused in childhood In the past elder abuse literature has quite correctly mainly focused on the abuse of women who represent the majority of older persons Abuse of Older Men expands the discussion of this distressing social challenge to include the other gender reviewing the different types of abuse and the reasons why it is not readily apparent in today's society This compelling text examines in detail the causes and

consequences of elder abuse of men The under reporting of abuse is addressed along with suggestions on ways to better approach various problems This insightful resource is extensively referenced and provides tables to clearly present data Issues discussed in Abuse of Older Men include intimate partner abuse perpetrated against older men sexual abuse of older men in nursing homes the impact of gender on the reporting of elder abuse neglectful aspects of osteoporosis in older men past relationships that increase the risk of the neglect of older fathers news accounts that repost the frequency and types of abuse against men identifying and treating victims societal forces that affect older men s risk of mistreatment recommendations for structuring services to better meet victim s needs the social construction of manhood as an important factor in understanding the abuse of older men Abuse of Older Men provides crucial information practitioners educators researchers and students in social work nursing medicine law gerontology adult protective services criminal justice sociology psychology domestic violence counseling ethics public policy and aging networks The Dimensions of Elder Abuse Gerry Bennett,Paul Kingston,Bridget Penhale,1997-11-11 Adopting an interdisciplinary framework in recognition of the range of domestic and institutional settings in which elder abuse can occur this book both explains the nature of this under reported and little understood problem and addresses the vital question of how practitioners can best work towards its prevention Locating elder abuse in a spectrum of family violence the book gives a balanced account of relevant perspectives on it drawn from the medical legal health and social welfare spheres **Elder Mistreatment** National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Committee on National Statistics,Panel to Review Risk and Prevalence of Elder Abuse and Neglect,2003-02-06 Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly policy makers and practitioners have sought ways to protect older Americans from physical psychological and financial abuse Yet during the last 20 years fewer than 50 articles have addressed the shameful problem that abusers and sometimes the abused themselves want to conceal Elder Mistreatment in an Aging America takes a giant step toward broadening our understanding of the mistreatment of the elderly and recommends specific research and funding strategies that can be used to deepen it The book includes a discussion of the conceptual methodological and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects It also looks at problems in determination of a report s reliability and the role of physicians EMTs and others who are among the first to recognize situations of mistreatment Elder Mistreatment in an Aging America will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected including family members caregivers and advocates for the elderly It will also be of interest to researchers research sponsors and policy makers who need to know how to advance our knowledge of this problem **Handbook of Forensic Psychology** William O'Donohue,Eric R. Handbook of Psychological Approaches with Violent Offenders
Vincent B. Van Hasselt, Michel Hersen, 2013-11-11 The past quarter century has witnessed a dramatic upsurge of violent crime in the United States and abroad In this country the rise in violent criminal activity has been consistently documented in such published accounts as the Uniform Crime Reports and the Statistical Handbook on Violence in America published by the FBI and the Violence Research Group respectively Further social scientists particularly those working in the fields of sociology and psychology have provided a convergence of findings attesting to the magnitude of one of today's most significant social problems domestic violence e.g. spouse child and elder abuse Such efforts have served as the impetus for heightened clinical and investigative activity in the area of violent behavior Indeed a wide range of mental health experts such as psychologists psychiatrists social workers counselors and rehabilitation specialists have endeavored to focus on strategies and issues in research and treatment for violent individuals and their victims The purpose of this book is to provide a comprehensive and timely examination of current psychological approaches with violent criminal offenders Despite the fact that we continue to have much to learn about perpetrators of violent acts in recent an increasingly large body of empirical data have been adduced about this year's issue However these data generally have appeared in disparate journals and books That being the case it is our belief that such a handbook now is warranted
