Delgado,2012-03-06 In 2001 while vacationing on Panama s Pacific coast maritime archaeologist James P Delgado came upon the hulk of a mysterious iron vessel revealed by the ebbing tides in a small cove at Isla San Telmo Local inquiries proved inconclusive the wreck was described as everything from a sunken Japanese suicide submarine from World War II to a poison laden craft of death that was responsible for the ruin of the pearl beds decades before His professional interest fully aroused Delgado would go on to learn that the wreck was the remains of one of the first successful deep diving submersibles built in 1864 by Julius H Kroehl an innovator and entrepreneur who initially sought to develop his invention for military use during the Civil War The craft s completion coming too late for that conflict Kroehl subsequently convinced investors that it could be used to harvest pearls from the Pacific beds off Panama in waters too deep for native pearl divers to reach In *Misadventures of a Civil War Submarine* Delgado chronicles the confluence of technological advancement entrepreneurial aspiration American capitalist ambition and ignorance of the physiological effects of deep diving As he details the layers of knowledge uncovered by his work both in archival sources and in the field excavation of Kroehl s ill fated vessel Delgado weaves the tangled threads of history into a compelling narrative This finely crafted saga will fascinate and inform professional archaeologists and researchers naval historians students and aficionados of maritime exploration and interested general readers      **Water and the California Dream** David Carle,2016-05-10 In the last one hundred years imported

water has transformed the environment of the Golden State and its quality of life with land ownership patterns and real estate boosterism dramatically altering both urban and rural communities The key to this transformation has been expanded access to water from the Eastern Sierra the Colorado River and Northern California rivers Whoever brings the water brings the people wrote engineer William Mulholland under whose leadership the process of growth through irrigation began Now using first person voices of Californians to reveal the resulting changes author David Carle concludes that it may be time to stop drowning the California dream of the good life with imported water Using oral histories contemporary newspaper articles and autobiographies Carle explores the historic changes in California showing how imported water has shaped the pattern of population growth in the state Because water choices remain the primary tool for shaping California s future Carle also argues that it is possible to improve both the state s damaged environment and the quality of life if Californians will step out of this historic pattern and embrace limited water supplies as a fact of life in this naturally dry region      Catalogue of the Public Library of Evansville, 1876 Public Library of Evansville,1876
