Elections And Democracy In Greater China:

Elections and Democracy in Greater China Larry Diamond, Ramon H. Myers, 2001-05-10 The authoritarian Chinese regimes governing Taiwan Mainland China and Hong Kong allowed limited electoral competition during the last half century In Taiwan that process evolved over more than three decades before leading to the formation of an opposition party under martial law in late September 1986 and the blossoming of full democracy in March 2000 when that opposition party replaced the ruling party In Mainland China and Hong Kong limited electoral competition has only evolved over the last fifteen years or so This volume examines why and how limited electoral competition developed in Greater China The editors use a typology and different concepts to analyse how the political centre in these three Chinese societies historically interacted with society and how different regime change took place Their analysis attributes Taiwan's robust electoral competition under martial law to political breakthroughs in the political ideological economic and organizational marketplaces Without similar political breakthroughs in Mainland China and Hong Kong their limited electoral processes are not likely to lead to the election of one or more opposition parties in Mainland China and the direct election of a Hong Kong governor and parliament These two authoritarian regimes have adopted different institutions or rules to limit electoral competition Moreover different changes have been taking place in their political ideological economic and organizational marketplaces than occurred in Taiwan Therefore whether these two Chinese societies can mimic the Taiwan democratization path remains problematic Only the passage of time will reveal whether their limited electoral competitive processes can transform into full democracy

Grassroots Elections in China Kevin J. O'Brien, Suisheng Zhao, 2014-07-22 Twenty years after the launch of village elections the time is ripe to assess the progress and impact of China's most notable political reform Where have elections been conducted well and where have they been conducted poorly How have procedures changed over the years and have elections truly transformed how power is exercised in the countryside What methods are researchers employing to study elections and how have scholars from different disciplines contributed to our knowledge of grassroots politics in China This book carefully examines the implementation and effects of China's village township and people's congress elections both in terms of democratizing the polity and spurring other changes in state society relations The chapters in this book have been published across several issues of the *Journal of Contemporary China* *Debating Political Reform in China* Suisheng Zhao, 2014-12-18 The growing disconnect between China's market oriented economy with its emerging civil society and the brittle anachronistic and authoritarian state has given rise to intense discussion and debate about political reform not only by Western observers but also among Chinese intellectuals While some expect China's political reform to lead to democratization others have proposed to strengthen the institution of single party rule and provide it with a solid legal base This book brings the ongoing debate to life and explores the options for political reform Offering the perspectives of both Western and Chinese scholars it presents the controversial argument for building a consultative rule of law regime as an

alternative to liberal democracy It provides several critiques of this thesis and then tests the thesis through empirical studies on the development of the rule of law in China

The Failure of China's Democratic Reforms Zaijun Yuan, 2011-12-08 In its propaganda the Chinese Communist Party does not deny the value of democracy but it insists that democracy in China can be only socialist democracy with Chinese characteristics The most essential nature of such democracy is that it is under the single party system and it excludes multi party politics and competitive elections In recent years Chinese democracy has won more support because of achievements the party has made in developing economy This raises a question does this efficient authoritarian political system in China even if it is not democratic deserve applause because it can facilitate economic development The party also insists that it is democratic But is the party's theory of democracy compatible with western democracy Since 1998 the party has organized some political reforms such as direct elections for township executives direct elections for township party secretaries township party congress reform and deliberative democracy experiments while maintaining single party politics In the party's propaganda some of these reforms have become party achievements in improving socialist democracy with Chinese characteristics In addition to these four kinds of party organized reforms another reform originated from the grassroots the participation of independent candidates in a few local people's congress elections This book examines these five local political reforms It demonstrates that the four reforms instigated and organized by the party were tightly controlled and manipulated by the party Although some reform measures may possibly liberalize parts of China's political mechanism it is highly unlikely that the four reforms will eventually lead to political democratization in China In the fifth reform which was motivated from outside the bureaucratic system the party took drastic measures to repress the political participation of grassroots power As a result nearly all independent candidates in the local people's congress elections failed in their attempts to gain office The prospects for this reform are also poor The book argues that all five reforms have failed and that none will lead to China's democratization in the near future The book concludes that the party's authoritarian regime in China is by nature anti democratic and that so called socialist democracy with Chinese characteristics is not democratic

China and Democracy Suisheng Zhao, 2014-06-11 China's dramatic economic growth in the last two decades of the last century and the prospect of its rise as a great power in this new one have greatly increased its weight and importance in world affairs Consequently the progress or lack of progress of China's transition to democracy has become a central concern of the international community This timely collection brings together many well known scholars to systematically explore China's current government and assess that transition toward democracy The contributors seek to bridge the gap between normative theories of democracy and empirical studies of China's political development by providing a comprehensive overview of China's domestic history economy and public political ideologies Overall the volume contends that Chinese culture and Confucianism are not the obstacles to democratic transition that some scholars have said they are and that the success of market reforms has eroded authoritarian rule This weakening does not guarantee a

successful transition however and the contributors show that there are many reasons to be skeptical about the short term prospects for democracy in China including historical failures the underdevelopment of civil society political apathy and competing social values Though China s political culture is essentially neither anti democratic nor pro democratic it must still overcome many obstacles in order to achieve democracy *Special Issue: Elections and Democracy in Greater China* Robert F. Ash,2000 New Dynamics in East Asian Politics Zhiquan Zhu,2012-02-02 Using a comparative and thematic approach this textbook looks at key aspects of the new dynamics in East Asian politics security political economy and society

Capitalists in Communist China Keming Yang,2012-10-28 Since 1949 Chinese capitalists have experienced some dramatic shifts in their political and economic life Keming Yang examines what such changes tell us about China s current political situation and future political development making use of both historical and current interdisciplinary evidence **Taxation without Representation in Contemporary Rural China** Thomas P. Bernstein,Xiaobo Lü,2003-03-27 The financial burden imposed upon the Chinese farmer by local taxes has become a major source of discontent in the Chinese countryside and a worrisome source of political and social instability for the Chinese government Bernstein and L examine the forms and sources of heavy informal taxation and shed light on how peasants defend their interests by adopting strategies of collective resistance both peaceful and violent Bernstein and L also explain why the central government while often siding with the peasants has not been able to solve the burden problem by instituting a sound reliable financial system in the countryside While the regime has to some extent sought to empower farmers to defend their interests by informing them about tax rules expanding the legal system and instituting village elections for example these attempts have not yet generated enough power from below to counter powerful local official agencies *Judicial Review in Greater China* Shiling Xiao,2025-06-13 This book examines the judicial review systems in the four areas of Greater China China Taiwan Hong Kong and Macau and uncovers judicial review activities of the apex courts of each region It provides a comparative assessment of judicial activism and deference The development of modern judicial review is one of the key elements of the twentieth century s legal heritage By enforcing the principles of constitutionalism the rule of law and human rights protection many courts have been vested with unprecedented powers and have played an essential role in supervising the exercise of government power through constitutional and administrative review This work investigates the most up to date aspects of judicial review in Greater China and reflects on the modern theory regarding the judicialization of politics in different political regimes democratic authoritarian and hybrid The volume collects all substantive judicial review decisions delivered in the past twenty years by the four apex courts the China s Supreme People s Court the Taiwan Constitutional Court the Court of Final Appeal of Hong Kong and the Court of Final Appeal of Macau This comprehensive dataset includes some 800 judicial review decisions presenting a comprehensive resource of fundamental baseline data for evaluating judicial review in Greater China The book will be an invaluable companion for scholars and researchers working in the areas of Comparative Public Law Comparative

Constitutional Law Constitutional Politics and Asian Studies **Exporting Virtue?** Pitman B. Potter, 2021-02-01 China's rise to prosperity on the international stage has been accompanied by increased tensions with international standards of law and governance. *Exporting Virtue* examines human rights as an example of China's international assertiveness and considers the implications of internationalizing PRC human rights policy and practice. Pitman B. Potter suggests that in the absence of clear and enforceable global human rights standards, China has been free to pursue its political interests and policy initiatives couched in terms of virtue but manifested as authoritarianism. China's international human rights activism invites scholars and policy makers around the world to engage critically with the issue. Drawing on both Chinese and English language sources, *Exporting Virtue* investigates the challenges that China's human rights orthodoxy poses to international norms and institutions, offering normative and institutional analysis and providing suggestions for policy response. Capitalism Without Democracy Kellee S. Tsai, 2007 Focusing on the activities and aspirations of the private entrepreneurs who are driving China's economic growth. Theorizing Chinese Citizenship Zhonghua Guo, Sujian Guo, 2015-10-08 This volume theorizes the concept of citizenship in contemporary China by probing into the formation of Chinese citizenship and synthesizing the practices of citizenship by different social groups. The first section, *Imagining Chinese Citizenship*, analyses how Chinese citizenship was first imagined by means of translation and education at the beginning of the twentieth century. The Chinese citizenship was then compared with the concept of Western citizenship and that of other Asian countries. The second section, *Citizenship of Chinese Migrant Workers*, explains the citizenship status of migrant workers by discussing the relationship between household registration hukou system and citizenship of the migrant workers, showing how migrant workers contest their citizenship rights and categorizing the resistance of migrant workers from the perspective of citizenship. Finally, the last section, *Chinese Citizenship Education*, discusses the conditions and challenges of citizenship education in Chinese schools. **China's Transition from Communism - New Perspectives** Guoguang Wu, Helen Lansdowne, 2015-11-06 As China moved from a planned to a market economy, many people expected that China's political system would similarly move from authoritarianism to democracy. It is now clear, however, that political liberalisation does not necessarily follow economic liberalisation. This book explores this apparent contradiction, presenting many new perspectives and new thinking on the subject. It considers the path of transition in China, historically makes comparisons with other countries, and examines how political culture and the political outlook in China are developing at present. A key feature of the book is the fact that most of the contributors are China-born Western-trained scholars who bring deep knowledge and well-informed views to the study. Remodeling Democracy Zhongyuan Wang, 2020-10-06 This book explores why, how, and under what conditions a single party regime uses formal democratic institutions to strengthen its rule. Zhongyuan Wang challenges the traditional perceptions that the Chinese congress acts either as mere window dressing or as an immediate catalyst for democratization. He argues that managed elections and mobilized representation are two strategic cards of China's one party

regime By downplaying input electoral competition but promoting output congressional representation the Chinese Communist Party has been committed to remodeling its unique brand of socialist democracy as an alternative to liberal democracy Such a model of democracy with Chinese characteristics features the Leninist trinity of the Party's leadership the rule of law and people's sovereignty as well as a new form of mobilized representation that relies heavily on non electoral accountability from the top down Remodeling democracy enables China's one party regime to enhance its resilience and consolidate and sustain its rule The Routledge Handbook of Chinese Citizenship Zhonghua Guo,2021-11-29 Two assumptions prevail in the study of Chinese citizenship one holds that citizenship is unique to the Western political culture and China has historically lacked the necessary conditions for its development the other implies that China is an authoritarian regime that has always been subject to autocratic power in which citizens and citizenship play a limited role This volume negates both assumptions On the one hand it shows that China has its own unique and rich experiences of the emergence development rights obligations acts culture education and sites of citizenship indicating the need to widen the scope of citizenship studies to include non Western societies On the other hand it aims to show that citizenship has been a core issue running through China's political development since the modern period urging scholars to bring citizenship into consideration in the study of Chinese politics This Handbook sets a new agenda for citizenship studies and Chinese politics Its clear accessible style makes it essential reading for students and scholars interested in citizenship and China studies

Tax Reform in Rural China Hiroki Takeuchi,2014-08-11 This book answers the important question how does China maintain authoritarian rule while it is committed to market oriented economic reforms **Understanding China's Legal System** C. Stephen Hsu,2003-03 Annotation View the Table of Contents nbsp nbsp nbsp Read the Introduction At the Crossroads of Post-Communist Modernisation C. Pursiainen,2012-09-10 This volume takes a comparative approach to understand general tendencies in post Communist transition in Russia and China Bringing together perspectives from Political Science Sociology and IR it analyses three arenas of social change socio economic systems political systems and foreign policies Toward Better Governance in China Baogang Guo,Dennis V. Hickey,2009-11-12 Toward Better Governance in China takes a fresh look at the latest efforts made by Chinese leaders to promote governance based reform It asserts that the improvement of governance has now become one of the breakthrough points of the much anticipated political reform Although the Chinese government continues to play down expectations about political reform many small scale reform experiments have been quietly undertaken by Chinese leaders at various levels in recent years including the new round of administrative reform centered on the creation of super ministries the enlargement of inner party democracy within the Chinese Communist Party CCP the strengthening of local legislative bodies and judicial reform designed to promote judicial independence and rule of law This strategy calls for strengthening governing capacity and changing government functions One of the advantages in placing the improvement of governance first is that it is less risky than embarking upon a full scaled

electoral reform Electoral democracy is undoubtedly an important element in a functional democracy But equally important is the effectiveness transparency accountability and openness of the governing process Better governance implies greater transparency open deliberation and participation and less adversarial political confrontation and conflict If constructed properly China may become the sort of democratic administration or administrative democracy that Robert Dahl discussed in 1947 Clearly political reform of this kind does not follow the conventional wisdom of a democratic transition which places heavy emphasis on electoral reform or the precedence of the electoral reform to the government reform This book is intended to shed some new light on the ongoing debate about the direction of China's political development
