Proceedings of the First Australian Conference on Electrochemistry, Held in Sydney, 13-15th February and Hobart, 18-20th February 1963 J. A. Friend, F. Gutmann, 1965 PRACI, Proceedings of the Royal Australian Chemical Institute Royal Australian Chemical Institute, 1977 Trends in Electrochemistry John O'M. Bockris, D.A.J. Rand, B.J. Welch, 1977-01-01 This volume presents plenary lectures and invited papers that were delivered during the Fourth Australian

Conference on Electro chemistry held at The Flinders University of South Australia 16-20th February 1976. Electrochemistry for a Futur e Society was selected as the Conference theme since the organising committee were mindful of the rapid change in technological perspective which the world now faces. We no longer have a prospect of uncontrolled spontaneous expansion and change as the result of technological enterprise. Rather we face the task of attempting to reach a state of very restricted growth. In the next few decades special accent must be placed on minimizing pollution and maximizing the efficient utilization of all available energy sources. With this in mind the Conference organisers considered that a conventional electrochemistry symposium with its divisions into the various academic aspects would be less relevant than a meeting devoted to aspects of electrochemistry which may underlie parts of the new and necessary technology for the future state of affairs. What has actually been achieved by the Conference organisers is a balance between the ideals expressed and the resulting response from electrochemists. This response has a bias which reflects the dominance of certain resources e.g. metallic minerals within Australia. Consequently the papers included in *Trends in Electrochemistry* cover subjects which are of both global and local concern.
