Kreps,2019-09-19 I began this monograph which at the time was a nascent paper with the objective of understanding how and how well continuous time models of economic phenomena and in particular models that employ Brownian motion relate to near by discrete time models We know by examples that the connections are sometimes not altogether obvious see for instance Fudenberg and Levine 2009 and Sadzik and Stacchetti 2015 So it seemed to me a general theory connecting the two types of models ought to be available *Economic Thought and Discourse in the 20th Century* Warren J.
