Moghaddam,Jaan Valsiner,2018-04-03 Since 2011 the world has experienced an explosion of popular uprisings that began in the Middle East and quickly spread to other regions What are the different social psychological conditions for these events to emerge what different trajectories do they take and how are they are represented to the public To answer these questions this book applies the latest social psychological theories to contextualized cases of revolutions and uprisings from the eighteenth to the twenty first century in countries around the world In so doing it explores continuities and discontinuities between past and present uprisings and foregrounds such issues as the crowds collective action identity changes globalization radicalization the plasticity of political behaviour and public communication *Economic and Social Changes in Czech Society After 1989* Lubomir Mlcoch,Machonin Pavel,Milan Sojka,2000-08 **Transition from Socialist to Market Economies** S. Ichimura,T. Sato,W. James,2009-10-21 20 years after the collapse of communism in Central Eastern European countries and 30 years after the start of market oriented reforms in China this book provides a framework for understanding the differing emphasis and sequencing of two reforms and explores in depth these issues in the demise of communism and the triumph of the market economy **Populating No Man's Land** János Mátyás Kovács,2018-09-15 This edited volume opening the new series Revisiting Communism Collectivist Economic Thought in Historical Perspective focuses

on the concepts of ownership the cornerstone of political economy in Soviet type societies The authors main objective is to contribute to the still unwritten chapter on collectivism in the history books of modern economic thought They trace the lengthy evolution of economic ideas of property reform under communism leading from the doctrine of blanket nationalization to projects of moderate privatization in eight countries of Eastern Europe and China The comparative analysis sheds light upon the tireless attempts of reform minded economists in communist countries to populate the no man s land of social property with quasi private economic actors such as bodies of workers self management and managers of state owned companies For a long time these were expected to crowd out the communist nomenklatura from its actual ownership position without challenging the primacy of collective property rights The fact that even the most radical reformers came to the conclusion that such surrogate owners would not be able to break the power of the ruling elite only on the eve of the 1989 revolutions demonstrates the immense strength of collectivist ideas The authors coin the term trap of collectivism to warn those demanding nationalization or other forms of non private ownership today it is rather easy even with the best intentions to walk into this trap but it may take long decades to break out from it Market Dreams Elaine Susan Weiner,2010-02-11

How have women experienced the transition from socialism to market economy in Eastern Europe **Sociocultural Psychology on the Regional Scale** Tania Zittoun,2019-12-12 This brief presents the case study of a hill in Czech Republic p and its region and contributes to theorization in sociocultural psychology on three points along three current debates First it contributes to the exploration of the mutual constitution of the lifecourse and of history uses a distinction between socio micro and ontogenesis and argues that a focus on a delimited geographical space enables to better observe the processes by which history daily situated interactions and courses of life shape each other Second in doing so it sketches an understanding of the role of the material spatial and semiotic specificities of landscapes in human development Especially it identifies some of the processes by which redundant dynamic patterns present in the environment may participate to the guidance of human experience Third it expands the reflection on case study construction and generalization On the one side it participates to a current debate in cultural psychology on the dynamics of generalization from single cases on the other it also dialogues with a more general reflection in the social sciences on social dynamics at the scale of small regions Altogether this brief is a first attempt to examine jointly these questions at the scale of a small region a unique natural laboratory of social and psychological change It will be of interest to researchers as well as graduate students in the fields of cultural and sociocultural psychology cognitive psychology and the social sciences *A Successful Transformation?* Petr Pavlínek,2008-04-30 I started researching the dramatic changes in the automobile industry of Central and East European countries in the late 1990s My interest grew out of my previous work on the post socialist transformation foreign rect investment and regional economic development While researching the economic and regional development effects of foreign direct inve ment I was increasingly drawn to the automobile industry because of the speed and depth of its transformation

through foreign direct investment and its potentially very significant economic and regional development effects. In addition to working on the Central and East European automobile industry as a whole I became interested in detailed case studies of enterprise restructuring as I wanted to understand its complex nature and the role of different actors in the restructuring of the automobile industry. In order to achieve this goal I visited dozens of automotive enterprises especially in the Czech Republic. In the Czech Republic to conduct in-depth interviews with key informants I have also interviewed key informants at ministries, automotive associations and academia and collected various secondary data and information. This book is the outcome of this work. In this endeavor I have benefited from various support. The University Committee on Research and Creative Activity at the University of Nebraska at Omaha funded three field work sessions in Czechia to conduct interviews and research for this book.

This is the first work in this field in which the frame of discussion is a comparative civilizational analysis. It focuses on issues that are at the heart of the contemporary human experience and culture. The contributors to this book, renowned scholars from all over the world, tackle these issues by referring to different temporal and spatial settings. This book is in homage to Shmuel Noah Eisenstadt. We honor his groundbreaking work in the comparative study of modernities and civilizations. Contributors are Jeffrey C. Alexander, Erik Allardt, Saad Arjomand, Johann P. Arnason, Eliezer Ben-Rafael, Raymond Boudon, Michael Confino, Ralf Dahrendorf, Gerard Delanty, Shmuel N. Transparent Lobbying and Democracy Šárka Labouťková, Vít Šimral, Petr Vymětal, 2020-02-04. The authors come up with some innovative tools, namely the Catalogue of transparent lobbying. They look at and evaluate the impact on both key stakeholders, lobbyists and targets of lobbying, monitoring of lobbying activities and sanctioning for breaches of rules. This tool holds out benchmarking capacity of sound framework for understanding of lobbying in the context of democracy, legitimacy of decision making and accountability. David Ondříčka, member of global Board of Transparency International, head of Transparency International Czech Republic. *Transparent Lobbying and Democracy* provides a comprehensive view into the phenomenon of lobbying. As a well-established scientist specializing in democracy, civil society and the public sphere, I see it as a useful and enriching contribution to the debate on lobbying, its necessary transparency and its role in the democratization process. This book has the potential to reach an international audience of experts and interested lay persons and both complement and compete with publications on similar issues. Karel B. Miller, University of Economics in Prague, Czech Republic. This book deals with the current, as yet unsolved problem of transparency of lobbying. In

the current theories and prevalent models that deal with lobbying activities there is no reflection of the degree of transparency of lobbying mainly due to the unclear distinction between corruption lobbying in general and transparent lobbying This book provides a perspective on transparency in lobbying in a comprehensive and structured manner It delivers an interdisciplinary approach to the topic and creates a methodology for assessing the transparency of lobbying its role in the democratization process and a methodology for evaluating the main consequences of transparency The new approach is applied to assess lobbying regulations in the countries of Central Eastern Europe and shows a method for how lobbying in other regions of the world may also be assessed *Communist Planning versus Rationality* János Mátyás Kovács, 2022-04-14

This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning **Three Social Science**
