Library, 1926 **Economics in the Medieval Schools** Langholm, 2021-11-01 From the early thirteenth century social change and the emergence of a commercial economy caused theologians of the main scholastic tradition associated with the University of Paris to devote a small but significant part of their attention to economic problems Their primary purpose was to guide conduct but a concern with economic ethics acted as a stimulant to the development of predictive theory as well This book is a comprehensive survey of this tradition of economic thought until its decline in the mid fourteenth century The study focuses on exchange and value money and usury on fraud on duress and economic freedom The strong link between economic theory and the theory of property is accentuated It is based partly on familiar printed sources but a large body of previously unexplored manuscript sources are examined as well New interpretations are offered on several points of doctrine Its scope and the extent of the sources examined make this book an indispensable reference work for future research in medieval and early modern economic thought **Routledge Library Editions: Sociology of Religion** Various, 2021-07-14 This set collects together in 19 volumes a wealth of texts on Sociology of Religion An invaluable reference resource it contains classic books on a wide range of topics including religion and violence religion and family life religion and society culture and class The Medieval Frontiers of Latin Christendom Felipe Fernandez-Armesto, 2017-05-15 The aim of this first volume in the series The Expansion of Latin Europe is to sketch the outlines of medieval expansion illustrating some of the major topics that historians have examined in the course of demonstrating the links between medieval and modern experiences The articles reprinted here show that European expansion began not in 1492 following Columbus's voyages but earlier as European Christian society re-arose from the ruins of the Carolingian Empire The two phases of expansion were linked but the second period did not simply replicate the medieval experience Medieval expansion occurred as farmers merchants and missionaries reduced forests to farmland and pasture created new towns and converted the peoples

encountered along the frontiers to Christianity Later colonizers subsequently adapted the medieval experience to suit their new frontiers in the New World

Guilds, Price Formation and Market Structures in Byzantium George C. Maniatis, 2024-12-11 The essays reproduced in this volume analyze the guild system in Byzantium and the West and investigate for the first time the process of price formation in Byzantium Innovative approaches are devised to fathom the conceptual basis institutional parameters market organization and structures and market dynamics which shaped price determination Correlatively it is persuasively established that the Byzantine guilds unlike their counterparts in the West did not fix prices through concerted action as they did not command the requisite market power or institutional support Fundamentally these studies argue that the Byzantine economy was market oriented as the state was quite circumspect in its interventions and pursued market based policies within a regulatory framework aimed to thwart unfair business practices protect the consumer curb the concentration of economic power and prevent the emergence of monopolistic market structures The competitive process and market mechanism were buttressed by a panoply of legal and other institutional arrangements aimed to frustrate anti competitive practices and ensure correct business conduct to maintain a level playing field Even in guild organized sectors the authorities did not interfere with the firms decision making process relying on the dynamic interaction of market forces and letting the market mechanism take
