Economic Development Competing Par:

Competition Law and Development D. Daniel Sokol, Thomas K. Cheng, Ioannis Lianos, 2013-09-11 The vast majority of the countries in the world are developing countries there are only thirty four OECD Organisation for Economic Co operation and Development countries and yet there is a serious dearth of attention to developing countries in the international and comparative law scholarship which has been preoccupied with the United States and the European Union Competition Law and Development investigates whether or not the competition law and policy transplanted from Europe and the United States can be successfully implemented in the developing world or whether the developing world experience suggests a need for a different analytical framework The political and economic environment of developing countries often differs significantly from that of developed countries in ways that may have serious implications for competition law enforcement The need to devote greater attention to developing countries is also justified by the changing global economic reality in which developing countries especially China India and Brazil have emerged as economic powerhouses Together with Russia the so called BRIC countries have accounted for thirty percent of global economic growth since the term was coined in 2001 In this sense developing countries deserve more attention not because of any justifiable differences from developed countries in competition law enforcement either in theoretical or practical terms but because of their sheer economic heft This book the second in the Global Competition Law and Economics series provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context

Competition Law and Antitrust David J. Gerber, 2020 Competition law now affects virtually all aspects of economic life in many parts of the world This book provides an overview of competition law s substantive content and methods as well as an analysis of its dynamics It is a critical tool for anyone dealing with competition law

New Developments in Competition Law and Economics Klaus Mathis, Avishalom Tor, 2019-03-18 This book further develops both the traditional and the behavioural approach to competition law and applies these approaches to a variety of timely issues It discusses several fundamental questions regarding competition law and economics and explores the applications of competition law and economics In turn the book analyses the interplay of intellectual property rights and patents in various aspects of competition law and investigates the impacts that developments in information technology such as big data analytics have on competition law The book also discusses the impact of energy law reforms on energy markets from a competition law perspective Competition law is a classic field of economic analysis This is largely due to the fact that competition law uses terms such as market price and competition and must therefore rely on economic know how and analyses In the United States economic analysis has greatly influenced not just the scholarship on antitrust law but also judicial decisions and agency enforcement Antitrust law and economics are based on the traditional paradigm of neoclassical economics which relies on the assumption that the market players i e consumers and producers are rational This approach to competition law was later received in Europe under the banner of a more economic approach For

the past two decades behavioural law and economics which seeks to generate better insights into legal phenomena by providing more realistic psychological foundations for economic models and to offer a multitude of applications in legislation and legal adjudication has challenged the traditional economic approach to law in general and more recently to competition law specifically

Competition Law in Latin America Julián Peña, Marcelo Calliari, 2016-02-18 In the past few years Latin American countries have taken giant steps to reposition their competition authorities in the global antitrust arena granting them much greater autonomy both domestically and internationally This is the first book to offer an in depth analysis of this complex scenario At the heart of the presentation are seven chapters detailing the competition regimes of the most active national jurisdictions in the region Argentina Brazil Chile Colombia Mexico Peru and Uruguay Written by practicing experts with considerable hands on experience in their respective countries each of these chapters provides a comprehensive description and explanation of the evolution current state and prospects for antitrust in the country Preceding these country by country analyses are more general chapters on the use of economic analysis and on the special field of the information and communications technology industry as well as chapters on the working of competition law in countries with regulated markets and in the cluster of Central American countries Topics addressed encompass the following and more relevant institutions and legislation cartel investigations unilateral conduct policies merger review international coordination enforcement and remedies Each chapter includes analysis of relevant case law allowing the reader to gauge the positions views and tendencies of each competition law regime The authors also pay attention to the specificities and idiosyncrasies that are so important for a correct understanding of the practical realities of competition policy and enforcement With its wide ranging and in depth approach this book provides an incomparable analysis of a challenging region poised to become increasingly important in the international recognition and enforcement of antitrust law It is in this sense an essential guide for lawyers economists corporations academics and government officials interested in understanding where competition law is and where is it is going to in Latin America

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective

Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law

EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility Inge Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject

EC Competition Law Giorgio Monti, 2007-08-06 Monti explores the development of EC competition law through an interdisciplinary approach focusing on the political and economic considerations that affect the way the rules are interpreted Written with competition law students in mind it should also be of interest to undergraduate and

postgraduate students of EU politics and economics

Changes by Competition Hyeong-ki Kwon, 2021-02-11 By tracing the evolution of South Korean state led capitalism and comparing it with other economies this book critiques prevalent theories including neoliberalism the developmental state and institutionalism and proposes a theoretical alternative focusing on endogenous changes through elites competition within and outside the state Unlike the arguments of neoliberals this volume asserts that the state can still play an active role in reconstituting the national economy through globalization The Korean state successfully fosters economic growth by nurturing industrial commons through globalization rather than by adopting a neoliberal free market system This volume asserts that the Korean economy has successfully grown over the past 50 years because it has moved toward a new version of state led developmentalism In order to better account for the evolution of state led developmentalism this book proposes changes by competition within as well as outside the state in order to bring about changes in developmentalism and the ability to adjust to new contexts Unlike prevalent accounts of developmental state theory *Changes by Competition* argues that the state is neither unitary nor cohesive but a locus of competition

Economic Development E. Wayne Nafziger, 2006 In this fourth edition of his textbook E Wayne Nafziger analyzes the economic development of Asia Africa Latin America and East Central Europe This comprehensive and clearly written text explains the growth in real income per person and income disparities within and between developing countries The author explains the reasons for the fast growth of Pacific Rim countries Brazil Poland and recently India and the increasing economic misery and degradation of large parts of sub Saharan Africa The book also examines China and other post socialist economies as low and middle income countries without however overshadowing the primary emphasis on the third world The text is replete with real world examples The exposition emphasizes the themes of poverty inequality unemployment the environment and deficiencies of people in less developed countries The guide to the readings through bibliography and websites with links to development resources makes the book useful for students writing research papers

Offshore Financial Centers and Regulatory Competition Andrew P. Morriss, 2010-06-16 In *Offshore Financial Centers and Regulatory Competition* a group of leading international law and finance experts argues that offshore jurisdictions have become key players in corporate finance and captive insurance markets

Strategies to Achieve a Binding International Agreement on Regulating Cartels John Sanghyun Lee, 2016-11-24 This book addresses the lack of binding multi lateral international agreement on cartels through analysis of trials and failures It also suggests strategic approaches to overcome current standstills In addition the book contrasts international agreement on cartels with inter governmental commodity agreement which has been developed separately through international law Through this project the author puts forth that successful international law on cartels needs to reflect the interests and arguments of developing countries

The Future Of Rural America Kenneth Pigg, 2019-07-09 It has been my pleasure to work with a distinguished committed and cooperative group of contributors to this volume They have taught me how to perform the editing role and put

up with innumerable and probably insufferable suggestions I have been privileged to work with exceptionally fine individuals in this endeavor and will count that among my many blessings

World Economic Growth and Competition United States. Congress. Joint Economic Committee. Subcommittee on Foreign Economic Policy, 1956 Examines economic growth in developing countries in the context of resistance to the expansion of Communist bloc influence

Law and Competition in Twentieth Century Europe David J. Gerber, 1998 Protecting economic competition has become a major objective of European governments David Gerber explains the framework of competition law and emphasises the political and economic issues it raises

Global Competition David Gerber, 2012-01-26 A key factor in the emerging relationship between law and economic globalization is how global competition now shapes economies and societies Competition law is provided by those players that have sufficient power to apply their laws transnationally This book examines this important and controversial aspect of globalization

Custodians of Place Paul George Lewis, Max Neiman, 2009 Custodians of Place provides a new theoretical framework that accounts for how different types of cities arrive at decisions about residential growth and economic development Lewis and Neiman surveyed officials in hundreds of California cities of all sizes and socioeconomic characteristics to account for differences in local development policies This book shows city governments at the center of the action in shaping their destinies frequently acting as far sighted trustees of their communities They explain how city governments often can insulate themselves for the better from short term political pressures and craft policy that builds on past growth experiences and future vision Findings also include how conditions on the ground local commute times housing affordability composition of the local labor force play an important role in determining the approach a city takes toward growth and land use What types of cities tend to aggressively pursue industrial or retail firms What types of cities tend to favor housing over business development What motivates cities to try to slow residential growth Custodians of Place answers these and many other questions
