Krause,Kim Kihwan,2023-11-15 Economic growth in all developing countries is guided and often accelerated by generally intrusive policies implemented by governments intent on playing an active role in furthering development As economies have grown and become more complex however even small market distortions are magnified and the tendency is to rely more heavily on the market for continued growth In this volume leading experts in economic development examine the variety of issues that arise as governments in some of the newly industrializing countries of Southeast Asia such as South Korea Taiwan and Singapore grapple with this difficult process of liberalization This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991      **Trade Liberalisation and Economic Development in Africa** Gift Mugano,2021-09-30 This book provides a thorough and rigorous discussion on the impact of trade liberalisation on economic development with a special focus on the African continent The author presents the rationale for trade liberalisation trade liberalisation frameworks the trade liberalisation economic development nexus impediments to trade and contemporary issues of international trade In this book notwithstanding the benefits from trade liberalisation the author shows that African trade as a share of global trade has remained flat at 3% as in 1975 while the continent s exports have remained raw materials and its intra regional trade at less than 15% of total trade which is the lowest in the world UNCTAD 2020 With respect to key economic development indicators such as economic growth poverty levels and employment levels this book shows that ironically and in direct contrast with the conventional views that trade liberalisation alleviates poverty trade liberalisation in Africa has resulted in high levels of unemployment and low economic growth which ultimately lead to increased poverty In addition this book provides a detailed analysis of why trade liberalisation has failed to yield meaningful benefits to Africa The binding constraints and blockages which prevent positive spin offs on trade liberalisation in Africa are discussed in detail in this book In the same vein the author provides practical strategies which must be adopted by African countries in order to gain from trade liberalisation making this work a must read for African governments academia trade experts regional trading blocs the World Trade Organization and development partners In view of this and as part of the disruptive and structural transformation policies the author discusses case studies and international experience contextualised to Africa as well as strategies for addressing the trade related infrastructure gap production capacities export promotion and aid for trade

bubbles preventing financial fragility and crises and recommends regional policy options for managing capital flows and exchange rates

**The Routledge Handbook of Tourism in Asia** C. Michael Hall, Stephen J. Page, 2016-09-13 Asia is regarded as the fastest growing area for international and domestic tourism in the world today and over the next 20 years. Given the economic, social and environmental importance of tourism in the region, there is a need for a comprehensive and readable overview of the critical debates and controversies in tourism in the region and the major factors that are affecting tourism development both now and in the foreseeable future. This Handbook provides a contemporary survey of the region and its continued growth and development as a key destination and generator of tourism which is marked by a high proportion of intra-regional travel. The book is divided into five sections. This first section provides an introduction to the region and context to the nationally focused chapters. The next three sections are then broadly based on the three UNWTO Asian regions: South East Asia, South and Central Asia, and East and North East Asia, providing readers with a valuable snapshot of tourism at various scales and from various approaches and positions. The concluding section considers future prospects for tourism in Asia. The handbook is interdisciplinary in coverage and is also international in scope through its authorship and content. It presents a range of perspectives and understanding of the processes and forces that are shaping tourism in this fascinating and dynamic region that is one of the focal points of global tourism. This is essential reading for students, researchers and academics interested in tourism in the growth region of Asia now and in the future.

**Urban Growth in Emerging Economies** Gordon McGranahan, George Martine, 2014-04-29 Along with globalization, urban transitions have been central in the southward shift in economic power towards the newly emerging economies. As this book shows, however, these transitions have not been painless and it is important for the rest of the urbanizing world to learn from the mistakes. It examines the role of urbanization and urban growth in the emerging economies, taking the BRICS countries: Brazil, Russia, India, China, and South Africa as case studies. Their different approaches towards urbanization have shaped their historical development paths and assisted or constrained their futures. Several of the BRICS bear heavy burdens from past failures to accommodate urban growth inclusively and efficiently, and many other urbanizing countries in Asia and Africa are in danger of replicating their mistakes. The overriding lesson of the book is that cities and nations must anticipate urbanization and accommodate urban growth proactively so as not to be left with an enduring legacy of inequalities and lost opportunities. This book is aimed at students and researchers in urban studies and development studies. It will also be of interest to policy advisors concerned with urbanization and the role of cities in a country's development.
