better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War

**Economics**

**and Sociology** Richard Swedberg, 2020-11-10 The boundary between economics and sociology is presently being redefined but how why and by whom Richard Swedberg answers these questions in this thought provoking book of conversations with well known economists and sociologists Among the economists interviewed are Gary Becker Amartya Sen Kenneth Arrow and Albert O Hirschman the sociologists include Daniel Bell Harrison White James Coleman and Mark Granovetter The picture that emerges is that economists and sociologists have paid little attention to each other during most of the twentieth century social problems have been analyzed as if they had no economic dimension and economic problems as if they had no social dimension Today however there is a dialogue between the two fields as economists take on social topics and as sociologists become interested in rational choice and new economic sociology The interviewees describe how they came to challenge the present separation between economics and sociology what they think of the various proposals to integrate the fields and how they envision the future The author summarizes the results of the conversations in the final chapter The individual interviews also serve as superb introductions to the work of these scholars
