Centrally Planned Economies Libor Židek, 2019-05-14 Offering a retrospective view of how the system operated in Communist Czechoslovakia this book is an important voice in the discussion about the systems of central planning The unique features of the book include in depth research comprising both archival records and analyses of around 75 interviews conducted with period managers across a wide range of management levels They provided evidence of pervasive inefficiency resulting in appalling economic outcomes The book begins with a background to the politico sociological system in Czechoslovakia and proceeds to describe the Marxist Leninist ideological foundation of the regime which underpinned the formal setting of the Czechoslovak model These initial chapters set the context for the subsequent analysis of the real functioning of the system The book explores the economic outcomes that must be understood as a natural consequence of the ways in which this system operated The author finishes by answering the important question of why centrally planned economies trailed behind the market economies The book s unique use of the interview research format brings a vivid close up view of the everyday economic life in the centrally planned system This will be a valuable contribution to the discussion surrounding the day to day reality of the system which was found to be more colourful than is generally deemed The book will appeal to both economic historians and students of economic history A warning against repeating past mistakes this book will also be of interest to those seeking a greater knowledge of the realities and consequences of centrally planned economies

Whither Capitalism? Makoto Nishibe, 2019-11-22 This book is the first to clarify the essential meaning and serious impact of globalization at the most abstract level from the point of view of Polanyi's three socioeconomic principles of exchange reciprocity and redistribution It also provides a theoretically coherent explanation of the evolution of the market and capitalist economies with respect to the advancement of commodification through Marx's internalization of the market into the community and state Globalization is the long term tendency of the market to extensively expand and deepen and of the community and state to contract and become shallower The ultimate goal of globalization is free investment capitalism for all people not only capitalists and speculators but workers students and housewives as well The book also examines Hayek's criticism of a centrally planned economy and Lange's proposal of market socialism in the Socialist Calculation debate which has been ongoing since the 1920s and acknowledges Hayek's vision of a distributed market with local and tacit knowledge to explain why socialism is infeasible and capitalism is robust The outcomes of globalization are disastrous in socioeconomic cultural and ecological realms As such it argues that in the twenty first century a post capitalist cooperative market economy mediated by new forms of money as communication media must be achieved These new media will include community currencies and local exchange trading systems LETS that can maintain the merits of money and the market and can overcome the defects of free investment capitalism Lastly this English version of the book includes a postscript explaining the significance and prospects of the socioeconomic changes around the globe since the publication of Japanese version in 2011

Producing Prosperity Randall G. Holcombe, 2013 The substantial prosperity that characterizes market economies at the beginning of the twenty first century is relatively recent in human history Prior to the Industrial Revolution economic progress was so slow that people would not have been able to recognize it in their lifetimes whereas today economic progress is so much a part of people's lives that they take it for granted In this new volume Randall G Holcombe argues that economic analysis as it developed through the twentieth century relies heavily on concepts of economic equilibrium and is not descriptive of the dynamic real world economy that is characterized by economic progress Even in dynamic settings economic models focus on income growth leaving out the entrepreneurial forces that generate economic progress resulting in the introduction of new goods and services and new production processes Economic analysis focuses on the forces that lead to an economic equilibrium not the forces that produce prosperity This characterization of economic analysis describes a substantial component of economics as it has developed over the past century However there are also economists who have analyzed the factors that lead to an entrepreneurial and innovative economy generating progress rather than equilibrium This volume does not question the value of past research but argues

that looking ahead economics should build on its past to focus on factors that create an entrepreneurial and innovative economy that is characterized by progress and prosperity This would make economic analysis more consistent with the remarkable progress and prosperity that characterizes the modern economy This volume lays out a framework for economic analysis that consistently incorporates the real world factors that produce prosperity
