Leftwich, 1971 Student Workbook and Study Guide to Accompany Economic Thinking in a Canadian Context Gordon F. (Gordon Francis) Boreham, Joseph J. Klos, Leftwich, Richard H, 1971 Instructor's Key to the Study Guide to Accompany Economic Thinking in a Canadian Context Gordon F. (Gordon Francis) Boreham, Joseph J. Klos, Leftwich, Richard H, 1971 *A History of Canadian Economic Thought* Robin Neill, 1991-06-06 A History of Canadian Economic Thought investigates the relationship between the evolution of economic theory and the particular geographical and political context of that theory Theories and policies are critiqued by testing them against both the conditions to which they were applied and against competing theories Not surprisingly Canadian economics reflects a number of significant issues in Canadian history Neill argues that there were distinctive economic movements in nineteenth century Ontario and in early twentieth century Quebec but that these have been displaced by an emerging North American discourse The book includes full accounts of the work of all the major figures in Canadian economics including John Rae H A Innis and Harry Johnson **Student Workbook and Study to Accompany Economic Thinking in a Canadian Context** Gordon Francis Boreham, 1971 Economic Theory, Welfare, and the State Athanasios Asimakopulos, Robert D. Cairns, 1991-02-01 Economic Theory Welfare and the State looks at how economic theory can be used to investigate and analyse the operations of market economies and to provide the basis for improvements in government policy making The collection begins with two chapters on the history of economic thought followed by an exploration of possible areas of conflict between the interests of groups and individuals and an insightful blend of economic history and economic theory that sheds light on the Canadian government's policy of settling the Prairies by providing land grants Also included are a critical analysis of rational expectations models and their use in econometrics an examination of why money should be treated as a public good and two contributions on international trade theory Two chapters deal with the problem of maintaining satisfactory levels of employment and three chapters examine different aspects of public pensions Among the contributors to this volume are a former teacher of Weldon's his fellow students and colleagues and former students They are Louis Asch Athanasios Asimakopulos Clarence Lyle Barber Kenneth E Boulding John Burbidge Robert D Cairns John S Chipman John H Dales Christopher Green Peter Howitt Murray C Kemp Gideon Rosenbluth Robin Rowley Thomas K Rymes David Schwartzman Dan Usher and Shigemi Yabuuchi **A new theory of value** Robin Neill, 1972-12-15 Continuing problems in the Canadian economy have been the occasion of a partisan debate between nationalists and continentalists both of whom claim the staples thesis to be the premise of their proposed solutions As one of the principal progenitors of that premise Harold Innis contributed much to the roots of this debate and its present flowering cannot be understood apart from what he

had to say This is an account of the Canadian problem as it was elaborated in the staples thesis of H A Innis But it is more than that In order to cope with the economics of a satellite country in the age of machine and post machine industry Innis found it necessary to fill in the empty boxes of neoclassical value theory and at times to make new ones when the standard theory provided insufficient room to contain the facts of the case He went beyond price theory to come to grips with the unsolved problems of growth and to work out answers of his own The result was a new kind of economics based as was the economics of J M Keynes on the assertion of a new ethical foundation Unlike Keynes Innis was concerned with the long run for we can survive now only by understanding the coping with the long run consequences of past policies and given the right policies now the nation as a whole will live on Innis and Keynes are like two sides of a coin in the new issue of value theory We can flip that coin to see which policy will come up or we can account for both sides in some sort of rational compromise A New Theory of Value is a plea for a rational approach to the problem

Political Thought in Canada Katherine Fierlbeck, 2006-03-01 What if anything makes Canada's political identity unique Pollsters can measure values but they cannot explain how these values arose over time why they changed or how people have attempted to make sense of them within a changing social and political environment By examining the history of political ideas in Canada we can better understand why Canada takes the shape that it does In this book Katherine Fierlbeck looks at the legacy of ideas taken from or shaped in reaction to the nations that have been most influential to Canada's development the United Kingdom and the United States The first section looks specifically at the nature of toryism constitutional liberalism and market liberalism Then she examines the evolution of social justice in Canada Does the country have as J S Woodsworth hoped a definitive third way The final section focuses upon debates over cultural identity and minority rights Contemporary political discussions in Canada are very much based upon the expressions of French Canadian nationalism that have existed as long as and perhaps even longer than the country itself

How have these ideas influenced current thinking about culture and accommodation The experiences characterized by Canadian political thought also provide insight and ideas for nations around the world as their citizens struggle with similar questions The political dynamics of the present are a product of how Canadians have viewed their country or a vision of their country in the past These ideas of Canada in history and in myth provide a way of thinking about politics that may provoke and inspire Canadians and others to reflect upon their future

Recent Social Trends in Canada, 1960-2000 Lance W. Roberts, 2005 Canadian society has changed dramatically since 1960 This work captures the scope and range of these changes through a systematic documentation of seventy eight social trends The introduction summarizes and locates the major waves of change The authors then document each trend in relation to eighteen thematic groups that include age community women labour management stratification social relations the state mobilizing institutions social forces ideologies households lifestyle leisure education integration and attitudes and values In contrast to many recent works and journalistic reports Recent Social Trends in Canada concentrates on the trajectory of change rather than on current events It provides a longitudinal context in which unfolding events can be interpreted in a broader historical and international context Comparable volumes in the McGill Queen's Comparative Charting of Social Change series describe similar tendencies in the United States Quebec France Germany Italy Greece Russia and Bulgaria making it possible to situate the Canadian experience in a global context

The New Industrial Geography Trevor Barnes, Meric S Gertler, 2002-01-04 Drawing on the theoretical resources of institutional economics The New Industrial Geography opens new perspectives in economic geography In its focus on historical and geographical context institutional embeddedness and tacit rules and formal regulations institutional economics is shown to be the perfect basis for understanding the profound economic and geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development
