main security risks of global warming The rationale is that climate change will cause mass movements of climate refugees causing tensions and even violent conflict Through the lens of climate change politics and securitisation theory Ingrid Boas examines how and why climate migration has been presented in terms of security and reviews the political consequences of such framing exercises This study is done through a macro micro analysis and concentrates on the period of the early 2000s until the end of September 2014 The macro level analysis provides an overview of the coalitions of states that favour or oppose security framings on climate migration It shows how European states and the Small Island States have been key actors to present climate migration as a matter of security while the emerging developing countries have actively opposed such a framing The book argues that much of the division between these states alliances can be traced back to climate change politics As a next step the book delves into UK India interactions to provide an in depth analysis of these security framings and their connection with climate change politics This micro level analysis demonstrates how the UK has strategically used security framings on climate migration to persuade India to commit to binding targets to reduce their greenhouse gas emissions The book examines how and why such a strategy has emerged and most importantly to what extent it has been successful Climate Migration and Security is the first book of its kind to examine the strategic usage of security arguments on climate migration as a political tool in climate change politics Original theoretical empirical and policy related insights will provide students scholars and policy makers with the necessary tools to review the effectiveness of these framing strategies for the purpose of climate change diplomacy and delve into the wider implications of these framing strategies for the governance of climate change
