Economics for the Twenty-first Century Andrew M. Kamarck, 2001 **The Philosophy of Economics** Daniel M. Hausman, 2008 An anthology of works on the philosophy of economics including classic texts and essays exploring specific branches and schools of economics Completely revamped this edition contains new selections a revised introduction and a bibliography The volume contains 26 chapters organized into five parts I Classic Discussions II Positivist and Popperian Views III Ideology and Normative Economics IV Branches and Schools of Economics and Their Methodological Problems and V New Directions in Economic Methodology It includes crucial historical contributions by figures such as Mill Marx Weber Robbins Knight and Veblen and works by most of the leading contemporary figures writing on economic methodology including five Nobel Laureates in Economics *The Fox in the Henhouse* Si Kahn, Elizabeth Minnich, 2005-10-27 Privatization has been on the right wing agenda for years Health care schools Social Security public lands the military prisons all are considered fair game Through stories analysis impassioned argument even song lyrics Si Kahn and Elizabeth Minnich show that corporations are by their very nature unable to fulfill effectively what have traditionally been the responsibilities of government They make a powerful case that the market is not the measure of all things and that a vital public sector is an indispensable component of a healthy democracy *The Fox in the Henhouse* Elizabeth Minnich, Si Kahn, 2010-05 Read a transcript of Amy Goodman s interview with Si and Elizabeth on Democracy Now A legendary activist and a distinguished public philosopher address a timely but complex issue in a way that is accessible and compelling Evaluates privatization not just economically but in social political and human terms Offers principles and practices for creating alternatives to privatization and strengthening the public sector Privatization has been on the right wing agenda for years but now it has the power of the Bush administration behind it Health care schools Social Security public lands the military prisons all are considered fair game But does privatization really serve the public good Or is it a payoff to powerful corporations intent on replacing the government with a private profit culture in which there is no meaningful public

accountability and the bottom line rules all In this powerful book legendary activist Si Kahn and public philosopher Elizabeth Minnich argue that privatization is a threat whose seriousness few appreciate Kahn and Minnich expose the damage privatization has done in several specific areas of society as well as to society as a whole They argue that corporations are by their very nature unable to effectively fulfill what have traditionally been the responsibilities of government Some things that are worth doing simply cant indeed shouldnt be done purely for profit Unless there is a balance between the public and private sectors vulnerable populations will be chronically underserved and critical public functions will be under funded to the point of virtual elimination Privatization is usually dealt with in dry economic terms but Kahn and Minnich take an unusual and lively approach to the issue Combining stories analysis impassioned argument and even song lyrics they discuss how the concept of privatization has evolved and look at the different forces that work for and against it emphasizing the extreme anti government ideology motivating many privatization advocates And they outline principles and practices for combating privatization and its proponents *The Fox in the Henhouse* makes a powerful case that the market is not the measure of all things and that a vital public sector is an indispensable component of a healthy democracy *The Geography of Underdevelopment* Mariam Khawar, 2017-05-16 This book examines why the differences in comparative economic development across the world have a geographical pattern It argues that there is a missing component in the geography versus institutions debate namely the role of culture and its impact either directly on development or indirectly through the establishment of institutions The impact of geographical features such as climate and natural resources is studied both across countries and within political boundaries and is supplemented by the work of social scientists in other disciplines on culture and cultural evolution By examining the direct effects of geography on standards of living as well as its indirect effects via culture and institutions a case is made to tie all three factors into a cohesive explanation for underdevelopment This book will appeal to readers interested in wider perspectives on under development that go beyond explanations resting on standard neo classical economic theory *The Invisible Hands of U.S. Commercial Banking Reform* Margaret M. Polski, 2012-12-06 This book is a product of my commitment to developing both theory and practice in political economy I first became interested in economic and institutional change in the commercial banking industry when I took a seminar on financial institutions led by Robert Glauber in the Kennedy School of Government at Harvard University in the spring of 1995 In my experience Bob is one of a handful of teachers who has the verve to challenge and inspire both esoteric and practical inquiry the seminar grappled with practical business and policy problems in a way that posed a significant challenge to existing theories In addition to demonstrating the need to better integrate theory and practice it provided a perspective and an approach that I continue to find useful in research consulting and teaching Conducting the research for this study has taught me many things about banking regulation and policy making and I am grateful to a very large number of people for their assistance Bob Glauber continues to be generous in discussing the challenges of change in the financial services industry
