Information and Communication in Economics Robert E. Babe, 1993-11-30 Although there is a burgeoning interest among economists in information economics much of the literature adopts a reductionist conceptualization of information defining it exclusively as reduction in uncertainty exploring the implications of imperfect information on markets This neoclassical treatment obscures major interrelations between economic and communicatory processes Drawing on a range of distinguished scholarship from both the economic and communication studies disciplines *Information and Communication in Economics* explores the implications for economic analysis and our understanding of economic processes of employing a more complete conceptualization of information information as locus of power information as evolutionary agent and media systems as devices for control

**The Global Political Economy of Communication** Edward A. Comor, 1996-09-18 This collection examines the theoretical analytical and political implications of global developments involving telecommunications and related technologies The book s contributors from fields such as economics political science and communication studies relate research on the political economy of communication with the work of international political economy scholars The book stimulates cross disciplinary debates among readers in these and other areas in order to first critically evaluate recent global developments involving communications and second to encourage the development of a more holistic and inclusive approach to these and related issues

*The economics of information* Przemysław Deszczyński, 2021-01-11

The economics of information Theory and practice is an English language version of the monograph *Ekonomia informacji* written in September 2019 and published at the beginning of 2020 The idea of translating it into English was born after posting the texts on Research Gate Then requests to make it available in English appeared Rapid changes that have taken place in the world economy over the past year caused some authors to consider it necessary to include them in their texts Therefore the update of the texts have been provided mainly in the context of consequences of the pandemic but also concerning the entry of Brexit into the next phase Attention was paid not only to the theoretical but most of all to the practical dimension of information economics Moreover the comments that appeared in reviews published in scientific journals including those concerning the structure of work have been taken into account The monograph consists of eight chapters Each of them was written by a different author In the first chapter the conceptualization of the term economics of information was presented It covers the genesis of information economics an original definition and methodological foundations It is a starting point and supporting structure of the entire book The authors of the remaining chapters refer to and comply with the adopted convention of analysis presented by the research editor The second chapter is devoted to the economics of information in internal communication in the era of social media It constitutes a sort of bridge between information economics and public relations narrowed down to internal communication Jacek Tr becki refers to the relationship between behavioral economics and classical economics He emphasizes that the consequence of information asymmetry may be its influence on distortion of decisions Chapter three by Waldemar Rydzak Changes in Access to Information in Crisis Situations as intended by the author is to be a starting point for a discussion about the role of information in the contemporary market which is more and more frequently discussed in the context of the fourth digital wave of development with significant influence of mass media and the Internet also in the context of the COVID related situation In the fourth chapter Filip Kaczmarek used the assumptions of counterfactual analysis in his considerations and on the basis of its results he showed that the so called opportunity costs or cost of non Europe are used as an instrument of legitimizing the European Union In chapter five by Aleksandra Rabczun Brexit and the Economics of Information the Brexit case was analyzed in the context of the role played by information economics in this process Chapter six written by Izabela Janicka is an example of using the concept of economics of information to analyze one country in this case Germany It was also assumed that both macro and micro aspects are taken into account The author points to the overriding role of information in the post industrial economy and to the fact that information has become one of the basic production factors She also introduces the concept of a functional information

minimum and an information gap In the seventh chapter Marcin Leszczy ski defines the role of the state s reputation in reducing information asymmetry in the global market The chapter ends with the analysis of policy and diplomacy in shaping trust in a government and the demand for products from a given country on the example of the trade war between the US and China In the eighth chapter Information Welfare and Migrations Practical Remarks in the Context of the Economics of Information Katarzyna wierczy ska fitted into the scope of research on the impact of information on economy and economic decisions of entities at the mega economic level

**Economics of Information Technology and the Media** Linda Low,2000 Interest in information technology and the media is growing apace This book has been specially written to provide an economics framework for analysing the nature and scope as well as issues pertaining to the new information and communication technology and revolution It also presents some trends and perspectives from the Asia Pacific region While the economic principles of efficiency and competition are the same everywhere many socio political issues with respect to information technology and the media are unique to some specific cultural contexts The book will be useful to students researchers and policymakers in mass communication information technology and the media

**Imagining the Internet** Robin Mansell,2012-07-12 This book is an impressive survey of our collective and cumulative understanding of the evolution of digital communication systems and the Internet Whilst the information societies of the twenty first century will develop ever more sophisticated technologies the Internet is now a familiar and pervasive part of the world in which we live work and communicate As such it is important to take stock of some fundamental questions whether for example it contributes to progress social cohesion democracy and growth and at the same time to review the rich and varied theories and perspectives developed by thinkers in a range of disciplines over the last fifty years or more In this remarkably comprehensive but concise and useful book Robin Mansell summarizes key debates and reviews the contributions of major thinkers in communication systems economics politics sociology psychology and systems theory from Norbert Wiener to Brian Arthur and Manuel Castells and from Gregory Bateson to William Davidow and Sherry Turkle This is an interdisciplinary and critical analysis of the way we experience the Internet in front of the screen and of the developments behind the screen all of which have implications for privacy security intellectual property rights and the overall governance of the Internet The author presents fairly the ideas of the celebrants and the sceptics and reminds us of the continuing need for careful critical and informed analysis of the paradoxes and challenges of the Internet offering her own views on how we might move to greater empowerment and suggesting policy measures and governance approaches that go beyond those commonly debated This concise book will be essential reading for anyone who wants to understand the challenges the Internet presents in the twenty first century and the debates and research that can inform that understanding
