Parker, 2009-11-12 A theoretical and empirical investigation of how economics can contribute to our understanding of entrepreneurship **Entrepreneurship in the UK** David G. Blanchflower, Chris Shadforth, 2007 Entrepreneurship in the UK examines the causes and consequences of changes in the incidence of entrepreneurship in the United Kingdom by focusing on the characteristics of the self employed and how self employment has changed over time Entrepreneurship in the UK is comprehensive and complete in its review of time series trends in self employment in the UK and elsewhere the earnings of the self employed with those of wage and salary workers the characteristics of the self employed econometric analyses of the determinants of self employment and comparisons with US EU the importance of liquidity constraints and the role of inheritances and gifts and rising house prices in overcoming credit constraints macro economic consequences and correlates of self employment Entrepreneurship in the UK identifies the characteristics of the self employed and explains how and why their numbers have changed over time *Empirical Analysis of Entrepreneurship and Economic Growth* André van Stel, 2006-06-15 The importance of entrepreneurship for achieving economic growth in contemporary economies is widely recognized both by policy makers and economists It is deeply embedded in the current European policy approach that the creativity and independence of entrepreneurs contribute to higher levels of economic activity Indeed according to the European Commission 2003 p 9 The challenge for the European Union is to identify the key factors for building a climate in which entrepreneurial initiative and business activities can thrive Policy measures should seek to boost the Union s levels of entrepreneurship adopting the most appropriate approach for producing more entrepreneurs and for getting more firms to grow Audretsch 2003 p 5 states that Entrepreneurship has become the engine of economic and social development throughout the world The relation between entrepreneurship and economic growth is embedded in several strands of the economic literature A first strand of literature involves the general

understanding of the role of entrepreneurship in the modern economy Seminal contributions were made by Schumpeter 1934 Knight 1921 and Kirzner 1973 These economists stress different aspects of the role of the entrepreneur While Schumpeter stresses the innovating aspect Knight stresses the risk assuming aspect Kirzner finally stresses the role of the entrepreneur in leading markets to equilibrium Acs 1992 discusses the contribution of small firms in modern economies

Women and Global Entrepreneurship Maura McAdam, James Cunningham, 2021-04-05 Entrepreneurship in context has been described as the third wave in entrepreneurship research Accordingly specific socio economic political market and institutional contexts are key to fostering enabling and enacting entrepreneurial activity and behaviours These contexts shape everyday entrepreneurship experiences This book is based on the premise that how gender is articulated within the entrepreneurial debate has to acknowledge context However context is not a construct that only applies to those economies and situations that differ from the presumed norm of Western developed nations Adopting a more critical appraisal of how context is positioned within current theorizing around gender and entrepreneurial behaviours offers potential to progress debate whilst acknowledging that competing and contrasting contextual influences require clearer recognition This book therefore has the potential to unearth credible and robust approaches to further examining contextualisation and women entrepreneurship that advances new insights By exploring and examining how contextual influences shape women s entrepreneurship this book challenges the assumption that women entrepreneurship is the same throughout the world It will be of value to researchers academics and students with an interest in entrepreneurship political economy economics and public policy

Institutions, Entrepreneurship, and Economic Performance David Urbano, Sebastian Aparicio, David B. Audretsch, 2019-04-11

Using institutional economics as a theoretical framework this book analyzes institutional environment conducive to entrepreneurial activity in order to enhance economic performance across countries In particular the main contributions of this book to the entrepreneurship literature are the following Identify past and current research about the institutional context shaping entrepreneurial activity and its effect on economic growth Examine social progress orientation as those institutional factors that are shaping innovative entrepreneurial activity Explore the effect of different types of entrepreneurial activities on economic growth Examine how social progress orientation through opportunity driven entrepreneurship affects economic development Analyze the interrelationships between institutions entrepreneurial activity and economic development across countries Study how the country s institutional context influences the way in which entrepreneurial activity affects social progress Two sides of the same coin might be observed when analyzing policy aspects of those institutions affecting entrepreneurial activity On the one hand effective public policy to promote entrepreneurship is predicated on understanding the underlying forces as well as the consequences and impacts of entrepreneurship On the other hand different endeavors to promote entrepreneurial activity might have deleterious economic effects since they could actually reduce employment in the long term Thus it is crucial to understand the institutional environment in which entrepreneurs are interacting and making decisions The comprehension of these phenomena serves to move forward the theoretical practical and policy debate on entrepreneurship as a mechanism to achieve higher economic performance

entrepreneur and why how businesses are started which factors lead to success and which predict a likely failure The Illusions of Entrepreneurship is an essential resource for everyone who has dreamed of starting a new business for investors in start ups for policy makers attempting to facilitate the formation and survival of new businesses and for researchers interested in the economic impact of entrepreneurial activity Scott Shane offers research based answers to these questions and many others Why do people start businesses What industries are popular for start ups How many jobs do new businesses create How do entrepreneurs finance their start ups What makes some locations and some countries more entrepreneurial than others What are the characteristics of the typical entrepreneur How well does the typical start up perform What strategies contribute to the survival and profitability of new businesses over time
