Liner Conferences in Competition Law Hongyan Liu, 2009-09-24 A liner conference as a self regulation organisational form of liner shipping companies constitutes a typical hard core cartel with significant anti competitive effect One of the main three trade routes of liner shipping traffic is the Europe Asia Trade on the two ends of which both the European Community EC and the People's Republic of China PRC play important roles in the international liner shipping market However the competition regimes on liner conferences in both jurisdictions are not equivalent From a comparative point of view this book reviews the historical development of maritime policy and regulatory legislation in the EC and the PRC catches insight into the system of regulation regime and individual provisions in substantive and procedural meaning and finally provides a wide ranging perspective on the future competition regulation in respect of the latest developments in both jurisdictions 107-2

*Joint Committee Print: Country Reports On Economic Policy And Trade Practices, February 2002, **, 2002 107-1 *Joint Committee Print: Country Reports on Economic Policy and Trade Practices, July 2001*, 2001 The European Union's Trade Defence Modernisation Package Patricia Trapp, 2022-01-03 Anti dumping and anti subsidy measures are the most important elements of the European Union's trade defence instruments Since the beginning of the European integration process they

have been used to combat trade practices which are considered unfair and their distortive effects on competition in the internal market. However, while the imposition of trade defence measures aims to level the playing field between EU producers and their foreign competitors, it also produces negative effects on competition itself. Based on the role attributed to competition and trade defence policy respectively throughout the European integration process, this book argues that the trading bloc's trade defence instruments should not be designed or applied with the objective of granting maximum protection to EU producers but that their use should be limited to what is necessary to ensure fairness in competition between EU producers and exporting producers. However, an analysis of the changes made to the European Union's Basic Anti-Dumping Regulation and the Basic Anti-Subsidy Regulation by the Trade Defence Modernisation Package reveals that several aspects of the European Union's modernised trade defence instruments do not meet this requirement. Rather than being limited to offsetting the unfair competitive advantages of producers practicing dumping or benefiting from subsidies, the reformed provisions go beyond this, distorting competition in favour of the EU industry instead. Furthermore, the book critically assesses the reformed rules relating to the integration of social and environmental aspects in the imposition of anti-dumping or anti-subsidy measures, as well as the modernised basic regulations' compatibility with WTO law.

Principles of Macroeconomics Asia-Pacific Edition with Online Study Tool S 12 Months Robin Ellen Stonecash, Jan Libich, Joshua Gans, Stephen King, N. Gregory Mankiw, Martin Byford, 2017-09-15. The brief and student-friendly approach of this book boils economics down to its essentials by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues, including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models, and policy changes and updates for the Principles of Macroeconomics text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy and less on formal economic theory. Principles of Macroeconomics 7e encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.

Principles of Macroeconomics Howard J. Sherman, Michael A. Meeropol, 2015-03-10. Principles of Macroeconomics by Howard J. Sherman and Michael A. Meeropol differs from other texts in that this book stresses far more the inherent instability of the macro economy. The details of the business cycle come early and are integrated throughout the core of usual macro topics. C I G X The book puts inflation into its proper perspective by recognising that unemployment is

the much greater threat to the economic well being of the vast majority of the people. Instead unemployment and its human toll are given far greater emphasis than other texts. The Keynesian model is fully developed so is the statistical analysis of Wesley Mitchell. The neoclassical model is covered in both its historical evolution and in its implications for current policy debates. Finally there is strong coverage of the Euro zone crisis and its linkages to the United States.
