### **Introduction**

A community is a group of people that possess common interests. Sometimes it bears some differences toward achieving its objectives or rather performing its routine duties to the society. Occasionally, change is inevitable, and each community must experience it in the process of either integration. Most common changes and issues within the communities include political power change and leadership, Economic and social-cultural activities, religious perspectives, and finally, development changes. It is through the change some community hiccups manifest themselves as there is a conflict of interest to define what is right for the community. The pay will, therefore, discuss community issues based on the prevailing changes that are roaming within my community, New Square, New York.

### **Leadership and Political Change**

Concerning various changes, the structural development of leadership and political atmospheres are the core area that New Square, New York, have experienced. Leadership was initially organized in terms of the social groups that elected their leaders to manipulate and effectively influence the change within the community. Today elections are done within the constitutional structure that is monitored by the government to ensure that there is a fair and free election of the political leaders. Leaders, therefore, are democratically elected in the community and are given the power to make important decisions within the community. However, it is terrifying that most leaders within the community have developed some aspects of repossessing the legislative seat through non constituted means. The community had embraced authoritative leadership that was much oppressive to the subject. However, with the intrusion of the United Nations policies, leadership strategies have been changed, reducing unjust dealing of the community members. Generally, the development of the leadership has consistently created a good rapport with the community as the New Square village is now experiencing a new glow of democracy.

Hasidism practice often threatened the community; however, after some time, various lights have come to lead the community into development. Education has been the key approach that the current political leaders are using in ensuring that the community access the basic knowledge that is vital for the development and growth. The Hasidic community, my community, has also experienced some constraints in the process of changing leadership within the political context. Very few leaders have been able to address the issues that the community has gone through over decades. The community has severely experienced economic depression alongside other health issues that were induced by poor governance and leadership (Checkoway, 2009). Today, however, the community, through the assistance of the elite leaders, now has access to good health as well as economic development through education introduction and set up of other necessity programs in the village.

**Modern Political Economics** Yanis Varoufakis, Joseph Halevi, Nicholas J. Theocarakis, 2012-03-29 Once in a while the world astonishes itself Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism Modern Political Economics has a single aim To help readers make sense of how 2008 came about and what the post 2008 world has in store The book is divided into two parts The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008 The main finding is that all economic theory is inherently flawed Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality The only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science's tools e.g. calculus and statistics to second guess it The second part casts an attentive eye on the post war era on the breeding ground of the Crash of 2008 It distinguishes between two major post war phases The Global Plan 1947-1971 and the Global Minotaur 1971-2008 This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond Modern Political

Keynes' staggering achievement has been to remain relevant to economics and other disciplines even today and this book reflects that with an examination on his influence on modern economics. Leading economists from a variety of backgrounds including Ed Nell and Heinz Kurz have joined forces in this volume with internationally respected Japanese scholars to produce a strong collection of contributions to the debate on Keynes' monumental legacy. This book will be vital reading for historians of economic thought, economic methodologists as well as those economists with an interest in the overall development of their discipline.      **The Theory of Value and Distribution in Economics** Pierangelo Garegnani, Paul Samuelson, 2012-08-21 This new volume explores two alternative economic theories: the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists, Pierangelo Garegnani and Paul Samuelson. The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth. The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory. In the volume, the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it. At a time of economic crisis, the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time. A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments.      **Classical Economics and Modern Theory** Heinz D. Kurz, Neri

Salvadori,2005-08-12 The well known economists Kurz and Salvadori cover original findings and new vistas on old problems including alternative interpretations of classical economics new growth theory Sraffian theory and Von Neumann and the treatment of capital     **The Origins of David Hume's Economics** Willie Henderson,2010-10-04 The author argues that
