Ecotoxicology Of Amphibians And Reptiles:

Ecotoxicology of Amphibians and Reptiles Donald W. Sparling, Greg Linder, Christine A. Bishop, Sherry Krest, 2010-06-02 Building on the success of its popular predecessor the second edition of Ecotoxicology of Amphibians and Reptiles presents newly available findings on the species that are important environmental indicators This new edition covers nearly twice as many topics as the first including recent developments in the ecotoxicology of amphibians and reptil

Amphibian and Reptile Adaptations to the Environment Denis Vieira de Andrade, Catherine R. Bevier, José Eduardo de Carvalho, 2017-12-19 Despite their diversity amphibians and reptiles share many physiological traits such as their dependence on external heat sources for body temperature regulation that are of pivotal importance to their ability to cope with the environment Considerable variation in physiological capabilities exists in these groups and often can be related to seasonal and geographic differences in environmental parameters This book provides a comprehensive and integrative view of the interplay between physiology and behavior in amphibians and reptiles leading to a better understanding of the subject The book covers topics that have recently been in the spotlight for scientific research on the physiology behavior and conservation of amphibians and reptiles It brings together recent information from a range of disciplines that address critical topics for understanding their biology As these studies are scattered across articles in specialized journals this book provides a single and expanded source summarizing such advancements Amphibian and Reptile Adaptations to the Environment Interplay Between Physiology and Behavior maintains a solid scientific basis for the biological topics covered However it presents the material in a clear and direct manner so that it is accessible even to non biologists interested in the basic biology behavior and ecology of these animals as well as how these elements are connected to their conservation

Toxicology of Reptiles Susan C. M. Gardner, Eva Oberdorster, 2016-04-19 Toxicology of Reptiles cohesively summarizes much of the cutting edge research taking place in fields such as reptilian endocrinology neurophysiology immunology and ecology It also addresses conservation needs along with the complications often associated with population studies The text is easy to synthesize and apply in the evaluation Wildlife Ecotoxicology John E. Elliott, Christine A. Bishop, Christy Morrissey, 2011-08-27 Many books have now been published in the broad field of environmental toxicology However to date none of have presented the often fascinating stories of the wildlife science and the steps along the way from discovery of problems caused by environmental pollutants to the regulatory and non regulatory efforts to address the problems This book provides case by case examinations of how toxic chemical effects on wildlife have brought about policy and regulatory decisions and positive changes in environmental conditions Wild animal stories whether they are about the disappearance of charismatic top predators or of grossly deformed embryos or frogs provide powerful symbols that can and have captured the public s imagination and have resulted in increased awareness by decision makers It is the intent of this book to present factual and balanced overviews and summaries of the science and the subsequent regulatory processes that followed to effect

change or not We cover a variety of chemicals and topics beginning with an update of the classic California coastal DDT story of eggshell thinning and avian reproduction to more recent cases such as the veterinarian pharmaceutical that has brought three species of Asian vultures to the brink of extinction Researchers regulators educators NGOs and the general public will find valuable insights into the processes and mechanisms involved both in environmental scientific investigation and in efforts to effect positive change

Multiple Stressor Effects in Relation to Declining Amphibian Populations Greg Linder,2003 For well over a decade scientists have been trying to pinpoint the environmental cause for declining populations of amphibians in many habitats across the globe Here scientists and resource management professionals from a range of disciplines discuss standardized amphibian toxicity tests and meth

Amphibian Ecology and Conservation C. Kenneth Dodd,2010 Describes the latest methodologies used to study the ecology of amphibians throughout the world Each of the 27 chapters explains a research approach or technique with emphasis on careful planning and the potential biases of techniques Statistical modelling landscape ecology and disease are covered for the first time in a techniques handbook

Amphibian Species in Environmental Risk Assessment Strategies Marcelo L Larramendy,Guillermo Eli Liwszyc,2023-12-18 With the expansion of human settlements and the environmental changes brought about by human activity and pollutants toxicology and risk assessment of amphibian species has become increasingly of interest to toxicologists involved in environmental research This book focuses specifically on environmental risk assessment in premetamorphic stages and adults of amphibians Amphibian ecotoxicology is not totally understood in scientific research and as such environmental risk assessment in these vertebrates is an area of rapidly growing interest It has the potential to answer some of the questions regarding risks to our environment An ideal companion this book will be useful to toxicologists and ecologists investigating risk assessment in the environments of amphibians while also of interest to those working in conservation biology biological invasion biocontrol and habitat management

Basics of Ecotoxicology Donald W. Sparling,2017-07-28 This textbook presents a comprehensive examination of environmental science and ecotoxicology for undergraduate students The material provides sufficient related background information leading to a competency to clearly understand ecotoxicology concepts and topics
