**Highland Indians and the State in Modern Ecuador** A. Kim Clark, Marc Becker, 2007-08-26 Highland Indians and the State in Modern Ecuador chronicles the changing forms of indigenous engagement with the Ecuadorian state since the early nineteenth century that by the beginning of the twenty first century had facilitated the growth of the strongest unified indigenous movement in Latin America Built around nine case studies from nineteenth and twentieth century Ecuador Highland Indians and the State in Modern Ecuador presents state formation as an uneven process characterized by tensions and contradictions in which Indians and other subalterns actively participated It examines how indigenous peoples have attempted sometimes successfully to claim control over state formation in order to improve their relative position in society The book concludes with four comparative essays that place indigenous organizational strategies in highland Ecuador within a larger Latin American historical context Highland Indians and the State in Modern Ecuador offers an interdisciplinary approach to the study of state formation that will be of interest to a broad range of scholars who study how subordinate groups participate in and contest state formation

**Costume and History in Highland Ecuador** Ann Pollard Rowe, Lynn A. Meisch, 2012-10-03 The traditional costumes worn by people in the Andes women s woolen skirts men s ponchos woven belts and white felt hats instantly identify them as natives of the region and serve as revealing markers of ethnicity social class gender age and so on Because costume expresses so much scholars study it to learn how the indigenous people of the Andes have identified themselves over time as well as how others have identified and influenced them Costume and History in Highland Ecuador assembles for the first time for any Andean country the evidence for indigenous costume from the entire chronological range of prehistory and history The contributors glean a remarkable amount of information from pre Hispanic ceramics and textile tools archaeological textiles from the Inca empire in Peru written accounts from the colonial period nineteenth century European style pictorial representations and twentieth century textiles in museum collections Their findings reveal that several garments introduced by the Incas including men s tunics and women s wrapped dresses shawls and belts had a remarkable longevity They also demonstrate that the hybrid poncho from Chile and the rebozo from Mexico diffused in South America during the colonial period and that the development of the rebozo in particular was more interesting and complex than has previously been suggested The adoption of Spanish garments such as the pollera skirt and man s shirt were also less straightforward and of more recent vintage than might be expected

**Gender, State, and Medicine in Highland Ecuador** A. Kim Clark, 2014-03-13 In 1921 Matilde Hidalgo became the first woman physician to graduate from the Universidad Central in Quito Ecuador Hidalgo was also the first woman to vote in a national election and the first to hold public office Author Kim Clark relates the stories of Matilde Hidalgo and other women who successfully challenged newly instituted Ecuadorian state programs in the wake of the Liberal Revolution of 1895 New laws while they did not specifically outline women s rights left loopholes wherein women could

contest entry into education systems and certain professions and vote in elections As Clark demonstrates many of those who seized these opportunities were unattached women who were socially and economically disenfranchised Political and social changes during the liberal period drew new groups into the workforce Women found novel opportunities to pursue professions where they did not compete directly with men Training women for work meant expanding secular education systems and normal schools Healthcare initiatives were also introduced that employed and targeted women to reduce infant mortality eradicate venereal diseases and regulate prostitution Many of these state programs attempted to control women's behavior under the guise of morality and honor Yet highland Ecuadorian women used them to better their lives and to gain professional training health care employment and political rights As they engaged state programs and used them for their own purposes these women became modernizers and agents of change winning freedoms for themselves and future generations

**Handbook of South American Archaeology** Helaine Silverman,William Isbell,2008-04-06 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized If so this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume Not only does the Handbook of South American Archaeology HSAA provide immense and broad information about ancient South America the volume also showcases the contributions made by South Americans to social theory Moreover one of the merits of this volume is that about half the authors 30 are South Americans and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research It is inevitable that the HSAA will be compared with the multi volume Handbook of South American Indians HSAI with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird Gordon Willey John Rowe and John Murra Steward states frankly in his introduction to Volume Two that arch ology is included by way of background to the ethnographic chapters **A Prehistory of South America** Jerry D. instance such issues pertain to a conflict between upstream and downstream farmers located on a small stream or to a large dam located on the border of two nations Water conflicts are mostly studied as disputes around access to water resources or the formulation of water laws and governance rules However explicitly or not water conflicts nearly always also involve disputes among different philosophical views The contributions to this edited volume have looked at the politics of contested knowledge as manifested in the conceptualisation design development implementation and governance of large dams and mega hydraulic infrastructure projects in various parts of the world The special issue has explored the following core questions Which philosophies and claims on mega hydraulic projects are encountered and how are they shaped validated negotiated and contested in concrete contexts Whose knowledge counts and whose knowledge is downplayed in water development conflict situations and how have different epistemic communities and cultural political identities shaped practices of design planning and construction of dams and mega hydraulic projects The contributions have also scrutinised how these epistemic communities interactively shape norms rules beliefs and values about water problems and solutions including notions of justice citizenship and progress that are subsequently to become embedded in material artefacts
