**Rethinking Leadership for a Green World** Andrew Taylor, 2022-03-20 First James Lovelock and recently Prince William and David Attenborough believe that we have reached a tipping point in the process of climate change Whether they are right or not it is certainly true that the impact of humankind upon the ecology of the earth has reached a point where real changes in human behaviour are required If managers are to be enablers of planetary survival then we need to develop a new approach to risk which explicitly includes ecological limits upon economic behaviour This implies a fundamental reorientation of their role in allocating resources to minimise risk and maximise reward This book brings together some of the brightest contemporary thinkers on leadership complexity and sustainability to consider the big ideas that we will need to make the changes required and to outline the major themes that can inform a new approach to constructing a green world It looks at how to ensure that local models of sustainability are able to flourish in the context of global networks and presents specific case studies of markets and organisations that offer insights into the development integrated solutions and the leadership lessons we can learn Combining both theory and practice this book serves to guide business managers and provides deeper insight and critical perspectives on some of the key issues facing leaders moving towards the green economy It also provides useful supplementary reading for students in business and environmental studies

*Eco-Economy* Lester R. Brown, 2013-10-31 In 1543 Polish astronomer Nicolaus Copernicus challenged the view that the sun revolved around the earth arguing instead that the earth revolved around the sun His paper led to a revolution in thinking In Lester Brown's brilliant and invigorating account of the industrial economy he shows how a rethink of its fossil fuel based throwaway ethos is necessary to ensure that it works with not against the natural environment The issue now is whether the environment is part of the economy or the economy is part of the environment Brown argues the latter pointing out that treating the environment as part of the economy has produced an economy that is destroying its natural support systems One of the foremost experts on the new economic opportunities Brown shows the vast economic potential and environmental gains that exist from eliminating the waste and destruction of current consumption He describes how the global economy can

be restructured to make it compatible with the earth's ecosystem so that economic progress can continue with high standards of living and secure employment for all while conserving resources and restoring the environment. In the new economy, wind farms replace coal mines, hydrogen-powered fuel cells replace internal combustion engines, and cities are designed for people, not cars. *Eco Economy* is a map of how to get from here to there. It is an essential guide to the economy of the 21st century and will be compelling reading for business readers and environmentalists alike looking for ways to build a better future.

**Knowledge Systems of Societies for Adaptation and Mitigation of Impacts of Climate Change** Sunil Nautiyal, K.S. Rao, Harald Kaechele, K.V. Raju, Ruediger Schaldach, 2013-07-09 Climate change is broadly recognized as a key environmental issue affecting social and ecological systems worldwide. At the Cancun summit of the United Nations Framework Convention on Climate Change's 16th Conference, the parties jointly agreed that the vulnerable groups, particularly in developing countries and whose livelihood is based on land use practices, are the most common victims, as in most cases their activities are shaped by the climate. Therefore, solving the climate dilemma through mitigation processes and scientific research is an ethical concern. Thus, combining the knowledge systems of the societies and scientific evidences can greatly assist in the creation of coping mechanisms for sustainable development in a situation of changing climate. International Humboldt Kolleg focusing on

knowledge systems of societies and Climate Change was organized at ISEC This event was of unique importance as the year 2011-12 was celebrated as the 60th Anniversary of Diplomatic Relations between India and Germany with the motto Germany and India Infinite Opportunities This volume is the outcome of the papers presented during the IHK 2011 at ISEC India
