The paper discusses the importance of a research effort to investigate the impact of the 1990s on the economy, and the importance of the 1990s in the history of the United States. The paper also discusses the importance of the 1990s in the history of the United States.

A large, nearly featureless plain in the desert is home to one of America's last wild herds of free-roaming bison. But the bison are not alone in this vast, open landscape. A variety of other animals, from pronghorn to coyote, also roam the plains. The bison are the most numerous, but they are not the only large mammals left in the West. The pronghorn is another species that has survived in the West, and it is also found in the same areas as the bison. The coyote is a smaller animal, but it is also found in the same areas. The bison, pronghorn, and coyote are all part of the same ecosystem, and they all play important roles in the food chain. The bison are the largest, and they are the most numerous. The pronghorn is the second largest, and it is also found in the same areas. The coyote is the smallest, but it is also found in the same areas. The bison, pronghorn, and coyote are all part of the same ecosystem, and they all play important roles in the food chain.

**RESEARCH** **STRENGTHENING** U.S. AIRCRAFT FLIGHT CAPABILITY. The Federal Aviation Administration (FAA) is sponsoring a research project to develop a new generation of aircraft that will be able to fly at higher altitudes, faster, and more efficiently than current aircraft. The project is being led by the FAA's Office of Research and Development, which is working with the Department of Defense and the National Aeronautics and Space Administration (NASA) to develop a new generation of aircraft that will be able to fly at higher altitudes, faster, and more efficiently than current aircraft. The project is being led by the FAA's Office of Research and Development, which is working with the Department of Defense and the National Aeronautics and Space Administration (NASA) to develop a new generation of aircraft that will be able to fly at higher altitudes, faster, and more efficiently than current aircraft.

They also helped to reduce the risk of disease by providing information on the importance of using insecticide-treated bed nets and other measures to prevent mosquito bites.
