Helleiner, 1994 With the relationship between trade policy and industrialization coming in for increasingly close scrutiny this book assesses how far trade policy has promoted economic growth in fourteen developing countries in the 1970s and 1980s      **Credit Policies and the Industrialization of Korea** Yoon-Je Cho, Joon-Kyung Kim, 1995-01-01 World Bank Discussion Paper No 286 This report was commissioned as part of a project on the effectiveness of credit policies in East Asian countries In the Republic of Korea the government has played a pervasive role in promoting industrialization      **Foreign Aid and the Development of the Republic of Korea** David I. Steinberg, 1985      **Korea's Political Economy** Lee-Jay Cho, 2019-03-07 Over the past three decades South Korea has moved along a path of strong economic growth and political democratization attracting worldwide attention and providing valuable lessons for other developing economies Yet Korea still must grapple with many intractable problems fueled by its rapid industrialization and uneven growth including unbalanced distribution of

wealth concentrated economic power and adversarial relationships between management and labor Within the context of these sweeping changes this volume explores options for economic and social institutional reform in Korea Drawing on models of economic development from Japan the United States and Europe a distinguished group of Asian and Western scholars relates the experiences of previously industrialized economies to each facet of Koreas economic system including national management taxation and banking land ownership and use trade and industrial strategy and relations among business ownership management and labor In so doing the contributors provide valuable insights and fresh proposals for a viable model of social and economic modernization Throughout the volume the contributors emphasize the importance of Koreas cultural heritage not only in explaining the nations recent growth but also as a key element of its continued success By providing an overview of the evolution and interaction of Korean economic political and sociocultural institutions the contributors make clear how these structures mediate the movement between cultural values and economic progress

*Trade Policy and Industrialization in Turbulent Times* Gerry Helleiner, 2002-09-11 The relationship between trade policy and industrialization has provoked much controversy Can trade policy promote economic growth in developing countries Those actively working in the area are becoming increasingly sceptical about the conventional advice given by international policy advisors and organizations This volume builds upon earlier theoretical and empirical research on trade policy and industrialization but is the first cross the board attempt to review developing country experiences in this realm for twenty years The experience of fourteen developing countries in the 1970s and 1980s is assessed by the contributors each of whom have a detailed understanding of their country s recent experience

**Growth, Crisis and the Korean Economy** Dongchul Cho, 2015-03-02 Since the 2008 global financial crisis policymakers as well as academicians have been seeking to fathom why subsequent recoveries remain tenuous Other outstanding issues that they have been trying to understand include why do some economies grow faster than others How should the exchange rate volatility be understood and what factors make an economy more likely to fall into an exchange rate crisis What policies need to be taken during tranquil periods and how should they be changed once the crisis is triggered As a partial effort to meet such interests this book provides insights into these issues This book examines growth and convergence Part I exchange rate volatility and the Asian crisis Part II and the global crisis Part III In addition the book also draws lessons from South Korea s experiences a country which has undergone three different crises and brisk recoveries Part IV The book also includes some practical and policy oriented analysis This is a truly comprehensive book bringing together varied topics and diversity under one common theme economic growth and crisis

Han Unbound John Lie, 1998 Because the author sees South Korean development as contingent on a variety of particular circumstances he ranges widely to include not only the information typically gathered by sociologists and political economists but also insights gained from examining popular tastes and values poetry fiction and ethnography showing how all of these aspects of South Korean life help elucidate his main themes

**Changes by Competition** Hyeong-ki

Kwon,2021-02-11 By tracing the evolution of South Korean state led capitalism and comparing it with other economies this book critiques prevalent theories including neoliberalism the developmental state and institutionalism and proposes a theoretical alternative focusing on endogenous changes through elites competition within and outside the state Unlike the arguments of neoliberals this volume asserts that the state can still play an active role in reconstituting the national economy through globalization The Korean state successfully fosters economic growth by nurturing industrial commons through globalization rather than by adopting a neoliberal free market system This volume asserts that the Korean economy has successfully grown over the past 50 years because it has moved toward a new version of state led developmentalism In order to better account for the evolution of state led developmentalism this book proposes changes by competition within as well as outside the state in order to bring about changes in developmentalism and the ability to adjust to new contexts Unlike prevalent accounts of developmental state theory *Changes by Competition* argues that the state is neither unitary nor cohesive but a locus of competition *Capital Mobility and Distributional Conflict in Chile, South Korea, and Turkey*

Kurtuluş Gemici,2020-05-04 Why did many emerging countries pursue risky financial opening policies in a reckless manner even after the painful example of the Latin American debt crisis Unlike trade liberalization which has mostly been beneficial in emerging countries the removal of capital controls has led to boom bust patterns in many countries It is not simply driven by class or sectoral interests nor is it just a result of ideational changes in policy making circles or international pressure Gemici argues that to fully understand the motivation for these policies we need to take into account distributional struggles prior to their enactment In this book Gemici shows that conflictual distributional relations significantly increase the likelihood of capital account liberalization Through in depth comparative case studies he also demonstrates that countries which liberalize in the most comprehensive manner tend to be the countries characterized by a high degree of distributional conflict The case studies Argentina Chile South Korea and Turkey have been chosen to maximise variation in distributional relations and to escape regional clustering showing quite different trajectories of capital account liberalization This will be of great interest to readers in sociology international political economy and heterodox economics as well as specialists in the countries examined *The Newly Industrializing Economies of East Asia* Anis Chowdhury,Iyanatul Islam,2005-08-09

The phenomenal success of the East Asian Newly Industrializing Economies NIEs of Korea Taiwan Hong Kong and Singapore is now well known and documented Their success has been discussed to such an extent that it has become entrenched as part of the folklore of development economics The Newly Industrializing Economies of East Asia takes a fresh look at the relevant literature and sifts the rhetoric from the reality In the course of surveying the vast range of writing two competing paradigms become clear the neo classical approach which interprets the East Asian economic miracle as the predictable outcome of good policies and the statist perspective which draws attention to the central role of the government in guiding East Asian economic development Throughout the book the authors mix country specific experiences with broader trends

*Experimental Learning, Inclusive Growth and Industrialised Economies in Asia* Chan-Yuan Wong, 2022-07-05 This book explores how small nations can mobilise and use productive activities to generate inclusive growth and rapidly move up the economic ladder In this study Dr Wong explores how Korea and Taiwan came to balance between commanding critical technological competencies and driving inclusive economic agendas and ultimately culminates decades of moving up the value chain for the two Asian dynamos In a world dominated by superpowers Dr Wong demonstrates how agile nimble mid sized economies can move fast innovate and achieve post industrial catch up development This book will interest scholars of the Asian manufacturing sector those with an interest in the role semiconductors play in the global economy and scholars of Asian development

**The Financial Development of Japan, Korea, and Taiwan** Hugh T. Patrick, Yung Chul Park, Yōng-ch'öl Pak, 1994 The analysis shows how financial development has occurred in two distinct phases Initially interest rates were regulated to remain below market levels entry of new financial institutions was restricted financial markets were segmented and domestic finance was insulated from world financial markets The second phase has seen a steady if sometimes slow removal of these restrictions

**Korea and Globalization** James B. Lewis, Amadu Sesay, 2013-07-04 Korea faces two challenges in the twenty first century unification and globalization Both entail problems of economic political and cultural integration In the past Koreans successfully unified in various forms and globalized in many ways This book is a study of the theme of globalization addressing various aspects of Korea's integration into the global community from a social scientific or humanistic perspective This investigation begins with a focus on contemporary South and North Korea the globalized southern daily life South Korean labour as a global player the southern development state and the cultural division that poses the greatest threat to reunification Moving outwards in concentric circles chapters address Korea's connections with its region and Koreans contributions to the wider world Relations with Japan Korea's most difficult bilateral relationship are surveyed to identify both patterns and images The thirteenth century Tripitaka Koreana is the most complete collection of Buddhist scripture in Chinese and its recent digitization points towards a renaissance of this world religion South Korea's pursuit of a Nobel Prize in Literature is put in perspective when one considers Korean contribution to the pre modern Sinitic literary world South Korea may owe its existence to the United Nations but since entering the UN in 1991 it has taken to heart the altruistic urge of global peacekeeping

**Developmental Mindset** Elizabeth Thurbon, 2016-03-31 The Asian financial crisis of 1997 1998 was supposed to be the death knell for the developmental state The International Monetary Fund supplied emergency funds for shattered economies but demanded that states liberalize financial markets and withdraw from direct involvement in the economy Financial liberalization was meant to spell the end of strategic industry policy and the state directed policy lending it involved Yet largely unremarked by analysts South Korea has since seen a striking revival of financial activism Policy lending by state owned development banks has returned the state to the core of the financial system Korean development banks now account for one quarter of all loans and take the lead in providing low cost finance to

local manufacturing firms in strategic industries Elizabeth Thurbon argues that an ideational analysis can help explain this renewed financial activism She demonstrates the presence of a developmental mindset on the part of political leaders and policy elites in Korea This mindset involves shared ways of thinking about the purpose of finance and its relationship to the productive economy The developmental mindset has a long history in Korea but is subject to the vicissitudes of political and economic circumstances Thurbon traces the structural institutional political and ideational factors that have strengthened and at times weakened the developmental consensus culminating in the revival of financial activism in Korea In doing so Thurbon offers a novel defense of the developmental state idea and a new framework for investigating the emergence and evolution of developmental states She also canvasses the implications of the Korean experience for wider debates concerning the future of financial activism in an era of financialization energy insecurity and climate change
